 Note

Note: There are some default pages and metafields that need to be imported. Please follow [Import Pages](#) and [Import Metafields](#) directions before using your theme.

## Recommended Apps

---

Bekay needs those bellow apps for some especial functions. These apps are not available in the theme package, you need to download them on [Shopify App](#).

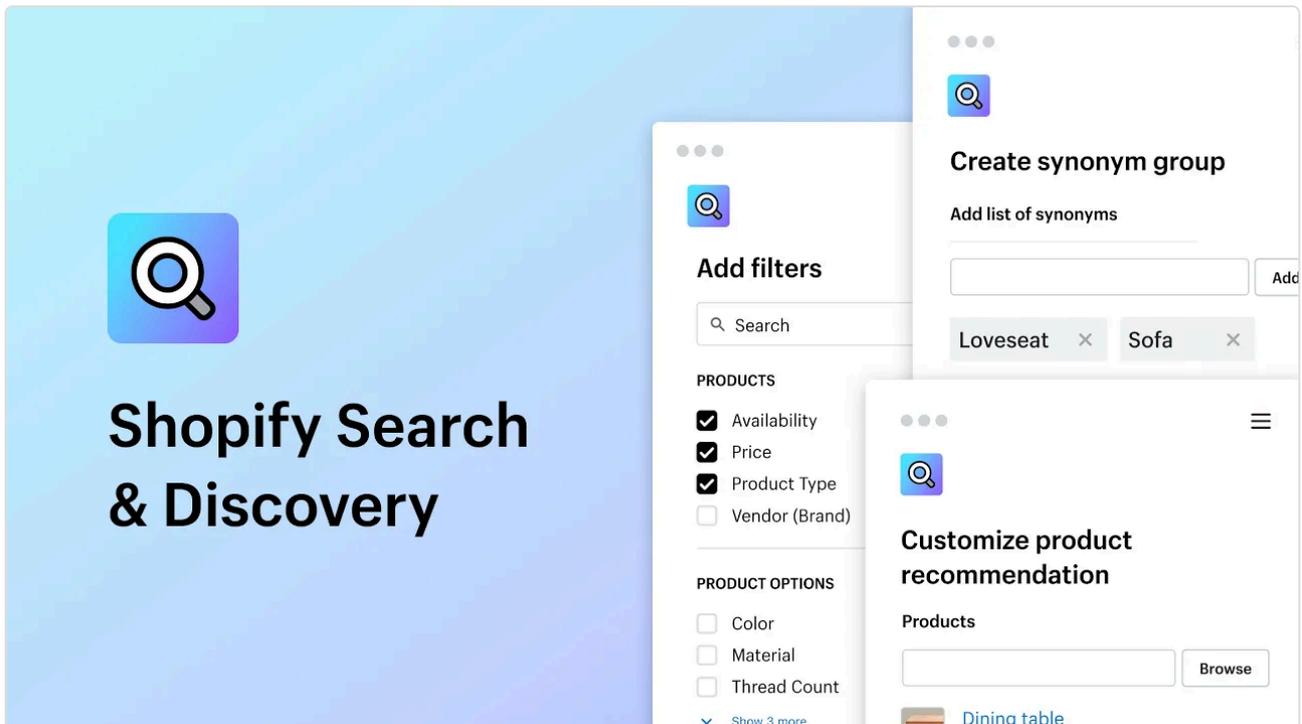

### 1. [Shopify Translate & Adapt](#)

[Shopify Translate & Adapt](#) lets you auto-translate up to two languages for free, and manually add as many translations as you wish. The side-by-side editor makes it easy to compare and review your translations, and can also be used to adjust content between markets that speak the same language to ensure cultural, seasonal, and regional relevance. Manually add, edit, and review translations with the side-by-side editor.

- Auto-translate 2 languages with Google Translate ([cloud.google.com/translate](https://cloud.google.com/translate)).
- Adapt content to reflect spelling and messaging variations between markets.
- Localize directly from the theme editor, or any resource page in your admin.
- Manage localized store content seamlessly from your Shopify admin.

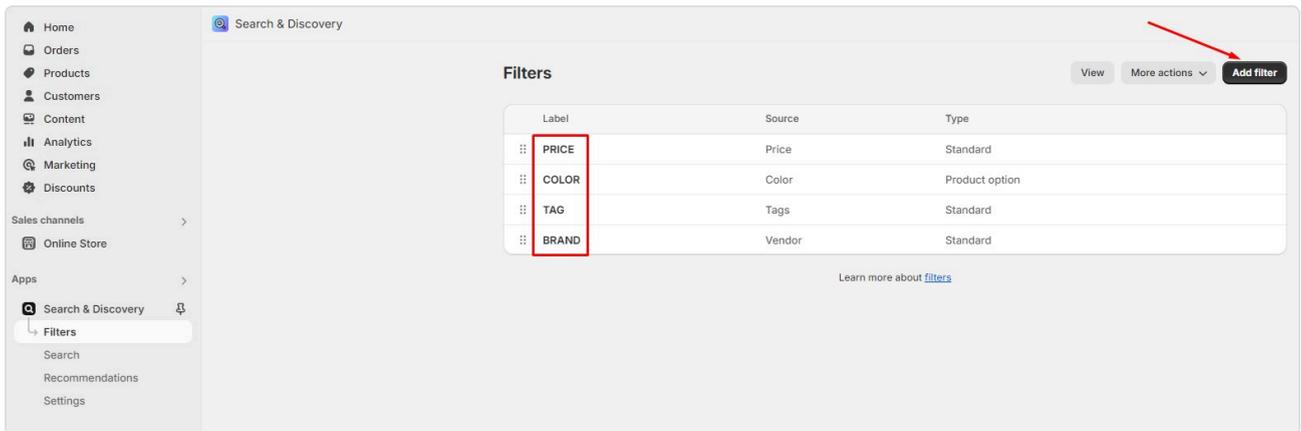

## 2. [Shopify Search & Discovery](#)

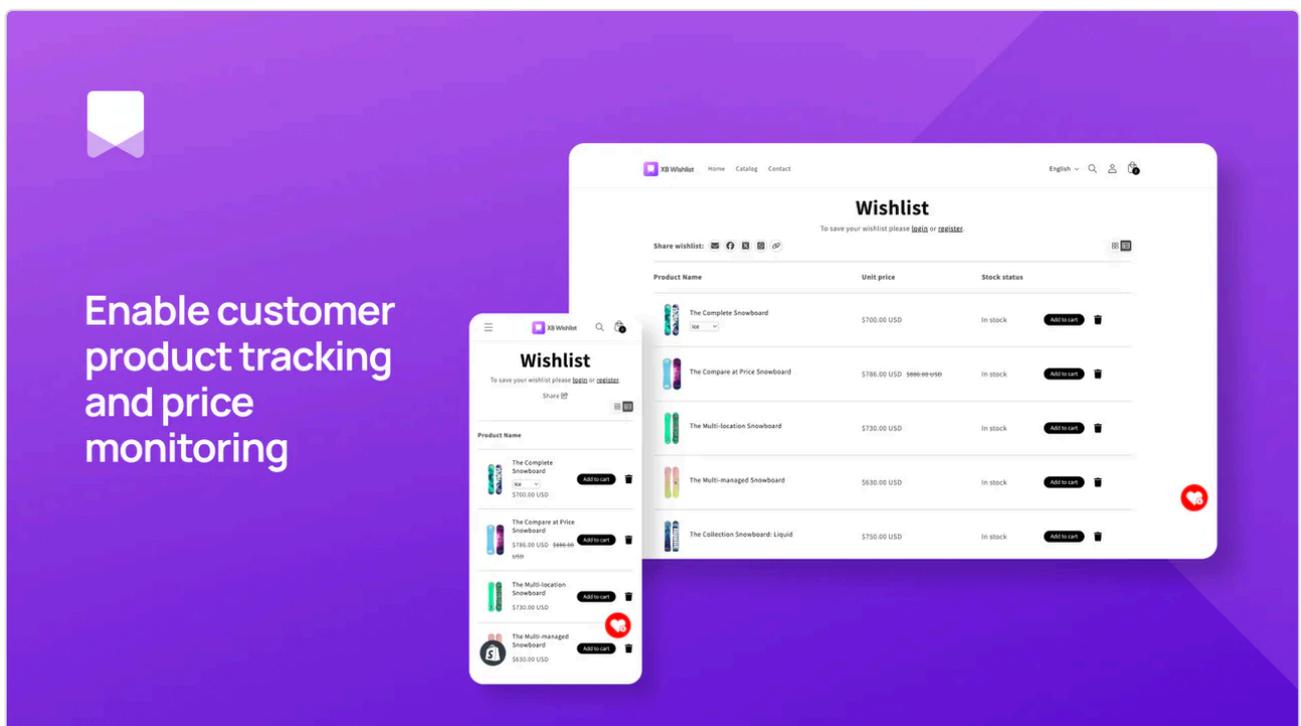

The [Shopify Search & Discovery](#) app gives you more control over how customers discover your products online. You can use the app to customize product search in your online store in the following ways:

- Create custom filters to let customers refine their search by multiple categories, which can surface more relevant results.
- Make and edit synonym groups, so your product descriptions match the terms customers use to search.
- Feature particular products in search results.
- Recommend related products on product detail pages to add to the recommendations that are automatically generated.

**Settings Shopify Search & Discovery:** Create filters: Click on *Add filter* and create filters.

### 3. [XB Wishlist](#)

Integrate wishlist easily, enhance conversions with wishlists.

[XB Wishlist](#) empowers your store by allowing customers to easily save and organize their favorite items, enhancing their shopping experience and driving repeat visits. With a user-friendly interface, this app integrates seamlessly with your store, offering a personalized shopping journey that encourages customer engagement and loyalty.

Stand out by providing a feature that helps customers track what they love, making it simple for them to revisit and purchase their saved products.

- Simple setup and integration with your store.
- Customers can access their wishlist from their account.
- Tailor the wishlist button to your store's design.
- Customers can save items and share their wishlists.

An 'Add option' button is located at the bottom of this section.
- Summary:** A box on the right titled 'Weekly Purchase' containing a list: '2 delivery frequencies' and 'Orange Juice'.

The screenshot shows the 'Get started with Shopify Subscriptions' setup guide. The left sidebar is identical to the previous screenshot. The main content area is titled 'Get started with Shopify Subscriptions' and includes a 'Setup guide' section with a 'Done' button and a list of steps:

- ✓ Create your first subscription plan
- ✓ Import your contracts
- ✓ Display subscriptions on your store
- ✓ Allow buyers to manage their subscriptions: This step is highlighted with a red box. It includes the text: 'Turn on subscription management to allow buyers to manage their subscriptions in new customer accounts. You will be able to continue using classic customer accounts. [Learn more about customer account settings](#)'. Below this text is a button labeled 'Turn on subscription management'.
- ✓ Customize notifications

A 'Dismiss guide' button is located at the bottom right of the setup guide.

The screenshot shows the 'Customer accounts' settings in a Shopify admin panel. On the left is a navigation menu with categories like General, Plan, Billing, Users and permissions, Payments, Checkout, Customer accounts (highlighted), Shipping and delivery, Taxes and duties, Locations, Markets, Apps and sales channels, Domains, Customer events, Notifications, Custom data, Languages, Customer privacy, and Policies. The main content area is titled 'Login links' and includes a toggle for 'Show login links' (checked), a note about login locations, and two options for account versions: 'New' (Recommended) and 'Classic'. Below this is the 'New customer accounts' section, which includes a 'Configurations' link, a toggle for 'Self-serve returns' (unchecked), and a toggle for 'Subscription management' (checked, with a red arrow pointing to it). ## Color

---

Change the color scheme to match the website's look and feel

You can define different color schemes in your theme settings and apply the color schemes to different sections throughout your online store with a color scheme picker. A color scheme is a set of colors. Your theme has a set of default color schemes applied that you can change at any time in the theme editor. You can add your brand colors to ensure a cohesive application of your color palette across your online store. Please follow this link for more clearly about Color Scheme: [Link](#)

To customize color in our theme please follow the steps:

:::tip[Steps]

1. In the theme editor (**Customize**), click **Theme settings**
2. Locate **Colors**
3. Make necessary changes
4. **Save** :::

![color demo](https://docs.themeocean.net/img/theme-settings/color.jpg)

## Color scheme

---

**Please follow the document to change the colors on your store.**

**Accent:** You can change the color when hover to Blog tilte, Add to cart button, Filter, Sortby,...

**Site background:** Your site background color

**Text:** You can change the text color of your store.

**Shadow:** Shadow color in your store.

**Border:** Border color in your store.

![[footer demo]](<https://docs.themeocean.net/img/theme-settings/color1.jpg>)

## Button color

---

Change background and text color for all call-to-action buttons and button hover.

- Button primary: used for the most important or prominent action on your webpage (ex: "Submit" button on a form, "Buy Now" button on an e-commerce site, ...)
- Primary button: used for actions that are less important or serve as alternatives to the primary action (ex: a "Cancel" or "Reset" button in a form, ...)

![[footer demo]](<https://docs.themeocean.net/img/theme-settings/color2.jpg>)

## Typography

---

Bekay has a dedicated options panel of its own, which lets you customize the styling of each part of your site to the finest detail. You can set the font style and size for the text.

## Show pickup availability to your customers

---

![pickup local](https://docs.themеоcean.net/img/product-information/pickup1.jpg)

**Your theme** lets you show customers whether a product is available for local pickup. On each product page, a pickup availability section shows whether the product is available,

and the estimated time frame for pickup. This information appears only for products that are stocked at at least one pickup location and have **This is a physical product** selected in the **Shipping** section of a product variant's details.

Steps:

1. From your Shopify Admin, go to **Products**.
2. Select a product.
3. Under **Variants**, select a variant.
4. Under **Shipping**, check **This is a physical product**.
5. Under **Inventory**, select locations that stock the selected variants.
6. **Save** the settings. If you have local pickup enabled for only one location, then the location and pickup availability is displayed for that location. Customers can click **View store information** to learn more about the pickup location. If you have local pickup enabled for more than one location, then the pickup availability section displays the location and pickup availability for one of your stores. Customers can click **Check availability at other stores** to check the product's availability at all of your locations that have pickup enabled.

## Set up local pickup

---

How to set up local pickup for your online orders?

You can set up the option for customers to pick up their online orders at your retail store, curbside, or any location that you choose.

After you enable the local pickup option, your customers can choose between **Ship** and **Pick up** in the Delivery method section of your checkout. When they select Pick up, they can choose the location where they want to pick up their order.

## Prerequisites

---

You need to complete the following before you can offer local pickup:

- Verify that the [fulfillment priority order](#) for your online orders is set up to meet your business needs.
- [Stock inventory at each pickup location.](#)
- Disable any pickup apps.
- Ensure that each person who is preparing items for pickup or marking orders as picked up has access to your Shopify admin.
- Update any [location names](#) so that customers can understand where to go to pick up their order.

- [Let each pickup location fulfill online orders.](#)

By default, letting a location fulfill online orders also means that non-pickup online orders can take inventory from your pickup or retail locations. Make sure that you review your [fulfillment priority](#) and modify it if necessary. If the **Continue selling when out of stock** option is selected for a product, then local pickup orders can be placed for locations without inventory.

## Set up local pickup option

---

Steps:

1. From your **Shopify Admin**, go to **Settings > Shipping and Delivery**.
2. In **Local pickup**, click **Manage** beside the location you want to enable local pickup. Click **Show more** if you have several locations. You must have a location set up already before you can select it, see [Locations](#) to set up multiple locations.
3. Under **Location status**, select **This location offers local pickup**.
4. Under **Information at checkout**, change the settings to meet your needs.
5. Under **Order ready for pickup notification**, enter pickup instructions for customers (Optional).
6. **Save** the settings.

## Show pickup availability to your customers

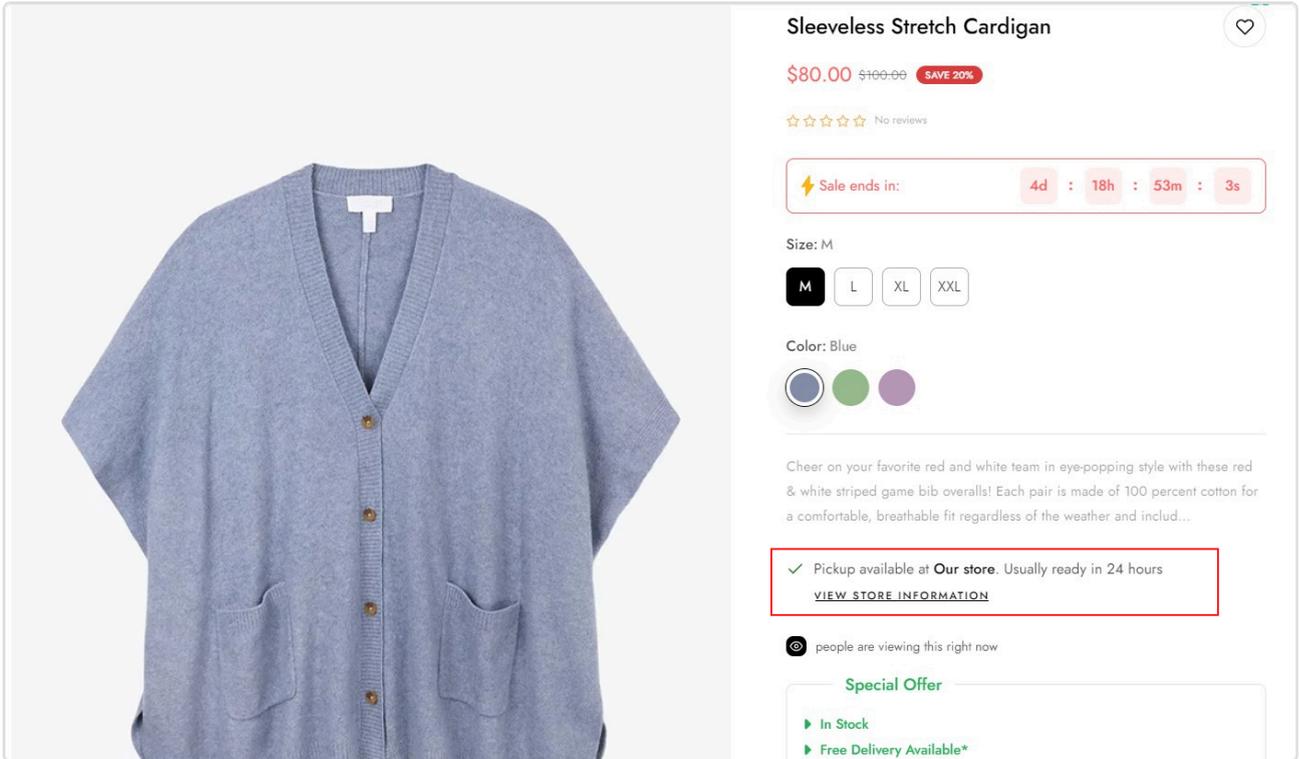

Your theme lets you show customers whether a product is available for local pickup. On each product page, a pickup availability section shows whether the product is available, and the estimated time frame for pickup.

This information appears only for products that are stocked at at least one pickup location and have **This is a physical product** selected in the **Shipping** section of a product variant's details.

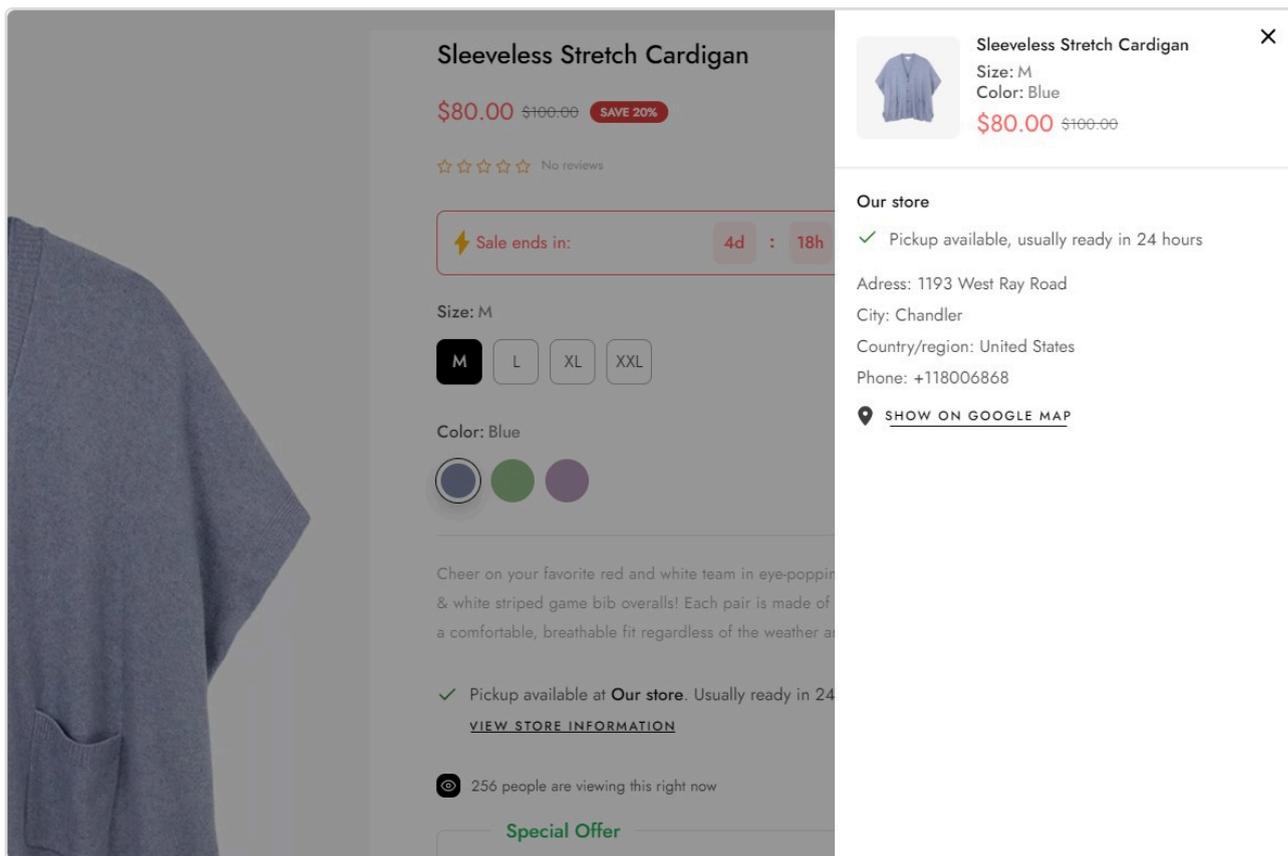

Steps:

1. From your Shopify Admin, go to **Products**.
2. Select a product.

3. Under **Variants**, select a variant.
4. Under **Shipping**, check **This is a physical product**.
5. Under **Inventory**, select locations that stock the selected variants.
6. **Save** the settings.

The screenshot shows a product page for a 'Sleeveless Stretch Cardigan'. On the left is a large image of the cardigan, which is light blue with a V-neck, short sleeves, and two chest pockets. On the right, the product details are displayed. The title is 'Sleeveless Stretch Cardigan' with a heart icon for wishlisting. The price is '\$80.00' with a crossed-out original price of '\$100.00' and a 'SAVE 20%' badge. Below the price is a star rating of five empty stars and the text 'No reviews'. A red countdown timer indicates 'Sale ends in: 4d : 18h : 53m : 3s'. The size selection is set to 'M', with options for 'M', 'L', 'XL', and 'XXL'. The color selection is set to 'Blue', with three color swatches shown. A description below reads: 'Cheer on your favorite red and white team in eye-popping style with these red & white striped game bib overalls! Each pair is made of 100 percent cotton for a comfortable, breathable fit regardless of the weather and includ...'. A red-bordered box highlights a pickup availability notice: '✓ Pickup available at **Our store**. Usually ready in 24 hours' with a link to 'VIEW STORE INFORMATION'. At the bottom, it says '👁 people are viewing this right now' and a 'Special Offer' section contains two items: '▶ In Stock' and '▶ Free Delivery Available\*'. A small heart icon is in the top right corner of the product area.

If you have local pickup enabled for only one location, then the location and pickup availability is displayed for that location. Customers can click **View store information** to learn more about the pickup location.

If you have local pickup enabled for more than one location, then the pickup availability section displays the location and pickup availability for one of your stores. Customers can click **Check availability at other stores** to check the product's availability at all of your locations that have pickup enabled.

## Add gift card product

---

You can think of these gift cards as you would for other products. Your customers can purchase them and then give them away to their friends.

When someone adds a product to their cart and starts the checkout process, they will be able to use the gift card to pay for that specific product.

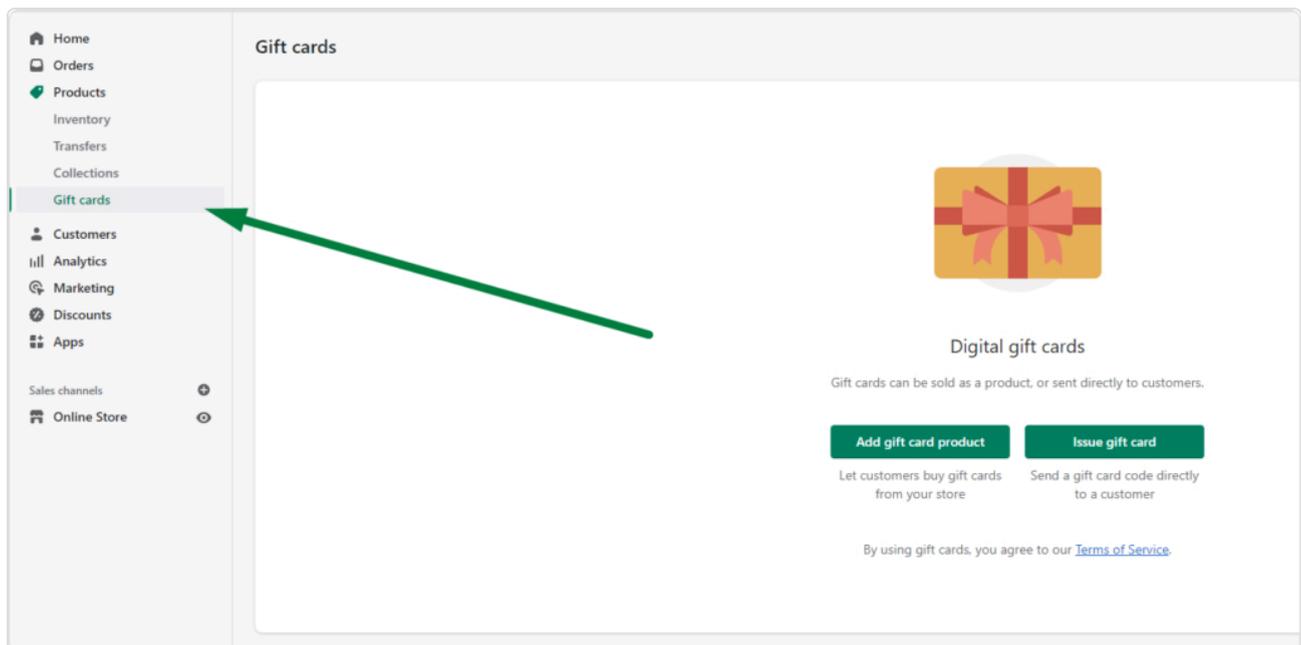

## How to create a Shopify gift card

---

There are two ways you can create gift cards: using Shopify's built-in functionality or an app.

Let's start with the built-in functionality and then move to some of the best apps.

**step 1.** Log into your Shopify store and go to **Products -> Gift cards**. Here you'll see two options; for now, simply click on the "Add gift card product."

**Step 2.** Complete the necessary product information. Chances are you have already added some products to your store, so this process should be pretty straightforward.

Make sure to give your product a descriptive name and description. An image would also work wonders.

**Step 3.** Choose your denominations. Shopify creates four denominations by default (\$10, \$25, \$50, and \$100), but you can always add extra or remove some of them if you feel like it.

As a best practice, you should match your gift card denominations with the average price of your products. For example, say your products cost around \$30 each. In that case, you might want to add a \$60 denomination so people can gift two products simultaneously.

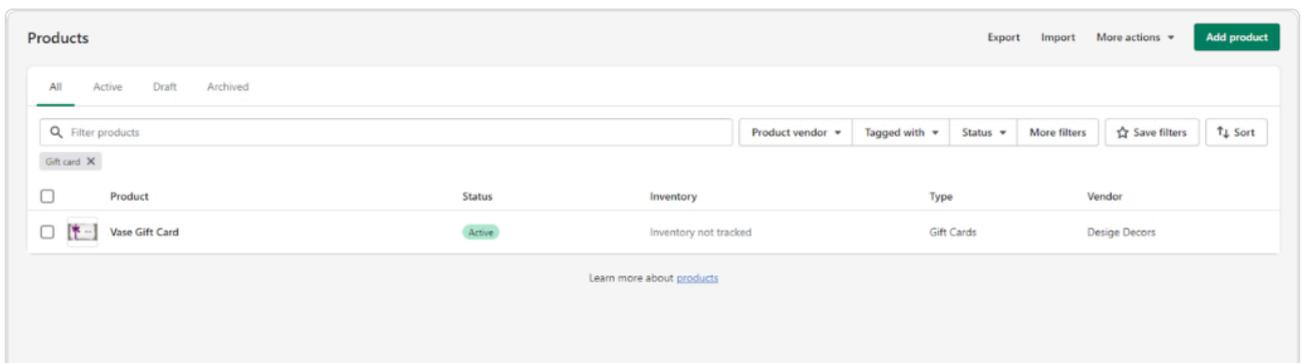

The screenshot shows a product configuration page for a gift card. At the top left, there is a main image area containing a stack of gift cards with a purple ribbon. To the right of this image is a dashed box containing an 'Add' button and a link 'Add from URL'. Below the main image area is a 'Denominations' section with five input fields: '\$ 10.00', '\$ 25.00', '\$ 50.00', '\$ 100.00', and '\$ 60.00'. Each input field has a trash icon to its right. A green arrow points to the trash icon for the '\$ 60.00' denomination. Below the input fields is an 'Add denomination' button. To the right of the denominations section are three more sections: 'Vendor' with an empty input field, 'Collections' with an empty input field, and 'Tags' with a 'Manage' link and a 'Find or create tags' input field. Below these is an 'Online store' section with a 'Theme template' dropdown set to 'Default product', a descriptive text, a 'Gift card template suffix' dropdown set to 'gift\_card', and another descriptive text.

**Step 4.** Change the product status to "Active" and choose a collection. Once satisfied with the product details, it's time to push it live.

You can open the gift card editor by clicking on the corresponding gift card.

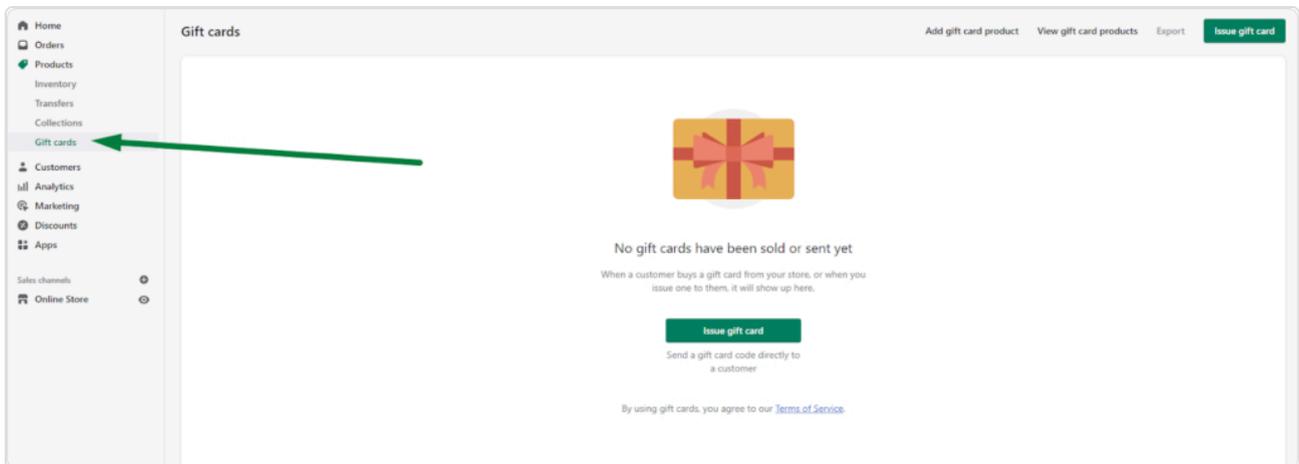

That's it. Now customers can purchase gift cards from your store.

## How to issue single-use Shopify gift cards

This type of gift card is great if you want to thank loyal customers for purchasing from you multiple times. Your customers will appreciate a gift card more than a discount code.

**Step 1.** Navigate to the gift cards page.

**Step 2.** Click on the “Issue gift card” button. This will open up a page that will allow you to configure the gift card.

**Step 3.** Configure the gift card. Now you can edit the Initial amount of the gift card, select which customer it applies to, set an expiration date, and even add a note so you remember why you created it.

:::important note: Make sure you copy this code right now, as you will not be able to see it again after you create the gift card. :::

**Step 4.** Select or create a customer and click "Activate." Once satisfied with your gift card options, you just need to select the customer you want to send it to and click on the "Activate" button.

Right after that, you will see this page featuring all relevant information regarding your newly issued gift card.

This is the last time you can copy that code, so make sure you do so in case you skipped it earlier.

## Here's your gift card!

Use this code at checkout to redeem your gift card, or [print](#) this page.

[START SHOPPING >](#)

Another essential thing to mention is that you do not need to add a customer when issuing a gift card. If you want to share the code via WhatsApp or Facebook Messenger, you can simply create the gift card, copy it, and share it. That simple.

Notice the QR code beneath the gift card code? You can create a QR code for your gift cards to easily share with your loyal customers when they make a return purchase or want to gift their friends.

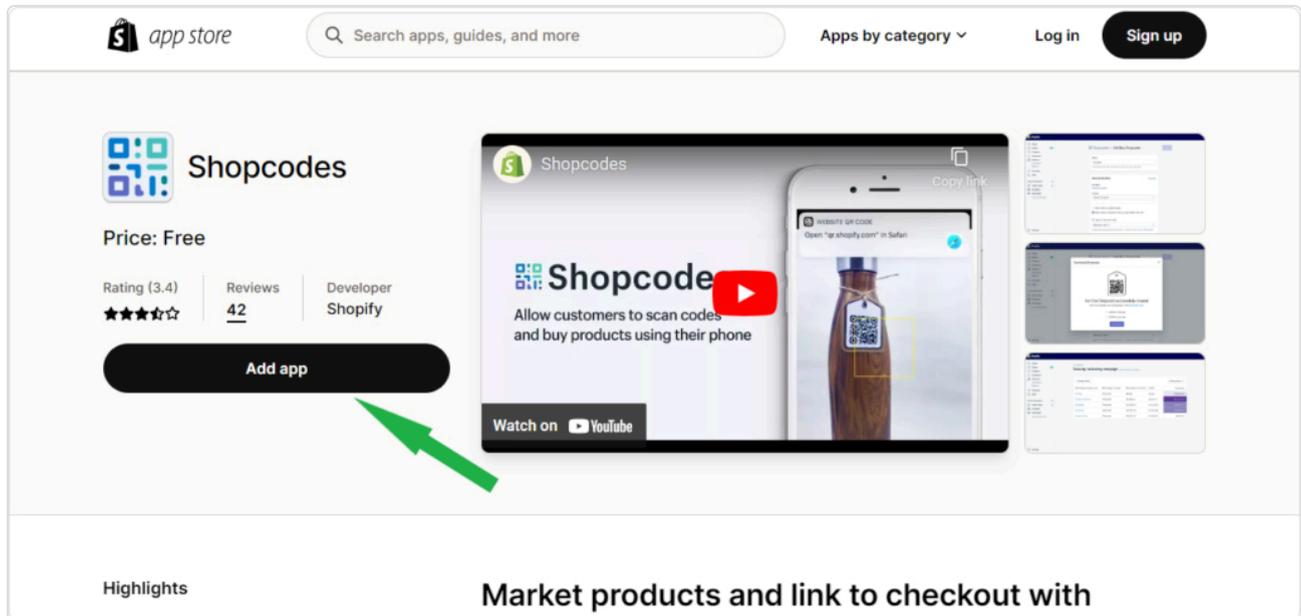

Here's how.

# How to Create QR codes for Shopify gift cards

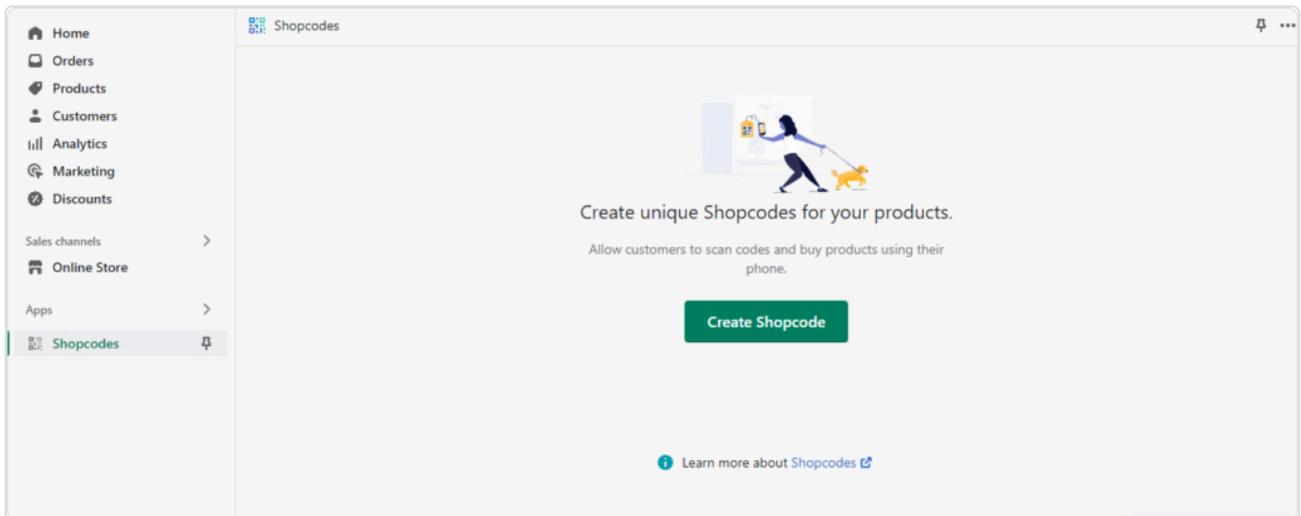

The easiest way to create a gift card on Shopify is through the Shopcode App. And that's our first order of business.

## Step 1. Install the Shopcode app

- Head to the [Shopcode app page](#) in the Shopify app store
- Select Add App. Note that you'll have to log in to your Shopify account before you can do this. If you're not already logged in, Shopify will prompt you to do so.

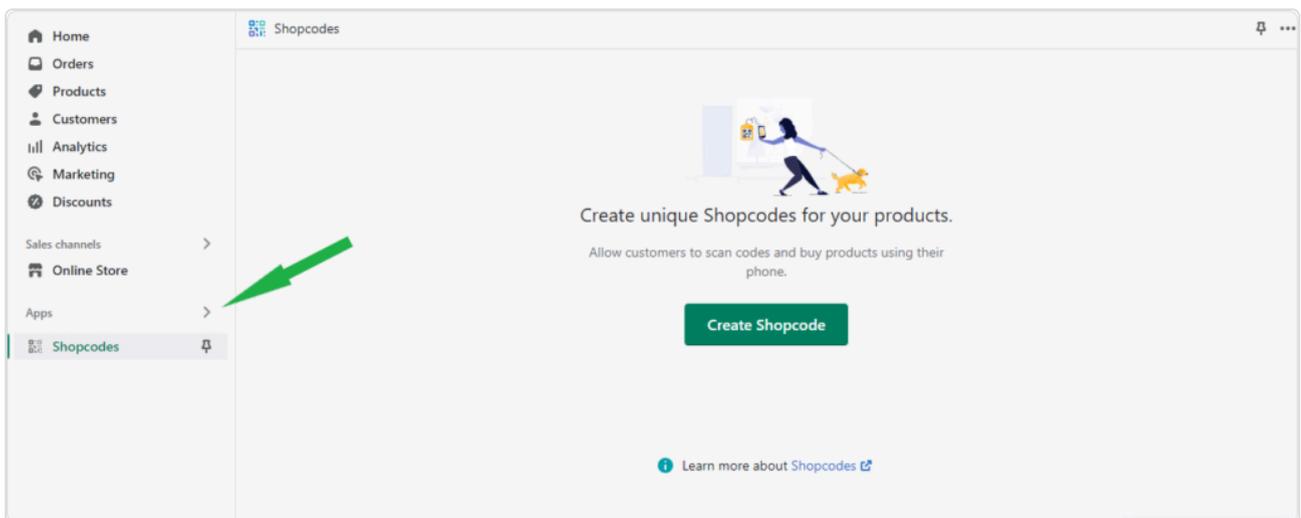

- Click on Install to complete the process Once you complete the installation, you should be redirected to this page:

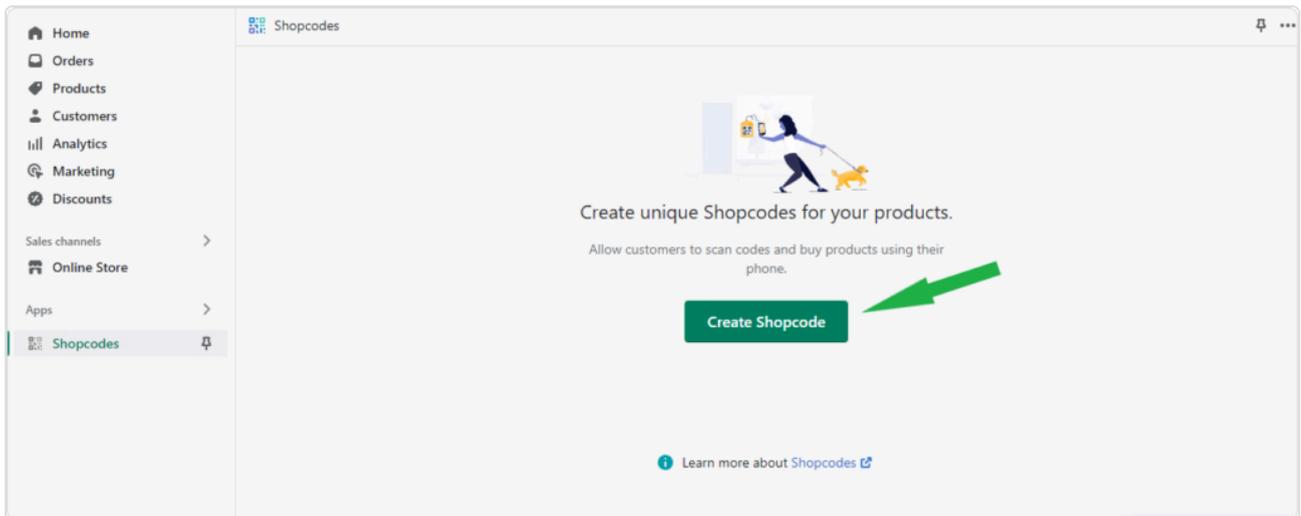

Now, you can begin creating your QR codes.

**Step 2.** Find the Apps column on the left-hand side of your Shopify window and select Shopcodes. You should be there already if you just installed the Shopcode app.

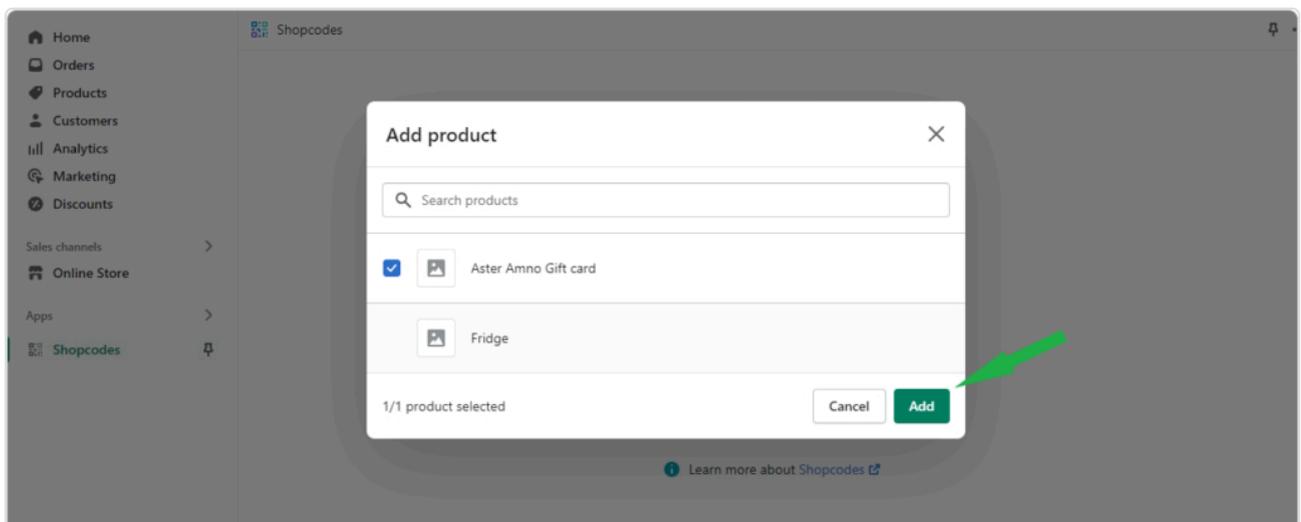

**Step 3.** Click on Create Shopcode.

You'll then be prompted to select the product you want to create the QR code for.

**Step 4.** Select the gift card in the list of products and click Add.

On the next page, you can work out the remaining kinks for your QR code.

**Step 5.** Enter the title of the QR code. The default name is usually the name of the product you choose, but if you want, you can change the name.

## New Shopcode

Title

Only you and other staff can see this title.

**Step 6.** Choose the QR code scan destination. Where do you want to direct users when they scan your gift card QR code? You can direct them to the gift card product page or to your checkout page with the gift card in the cart.

## New Shopcode

**SCAN DESTINATION** [Preview](#)

Link to product page

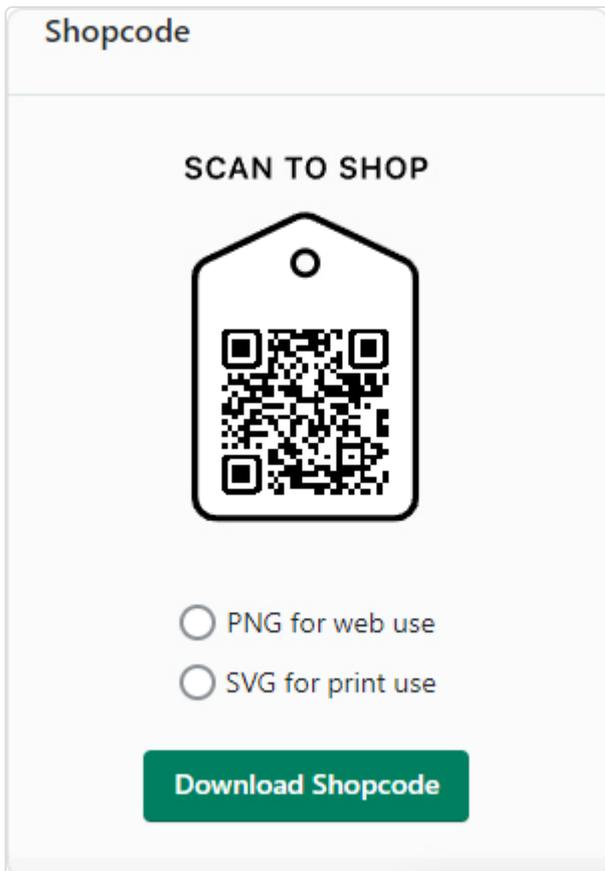

Link to checkout page with product in the cart

To apply a discount code, create one in [Discounts](#).

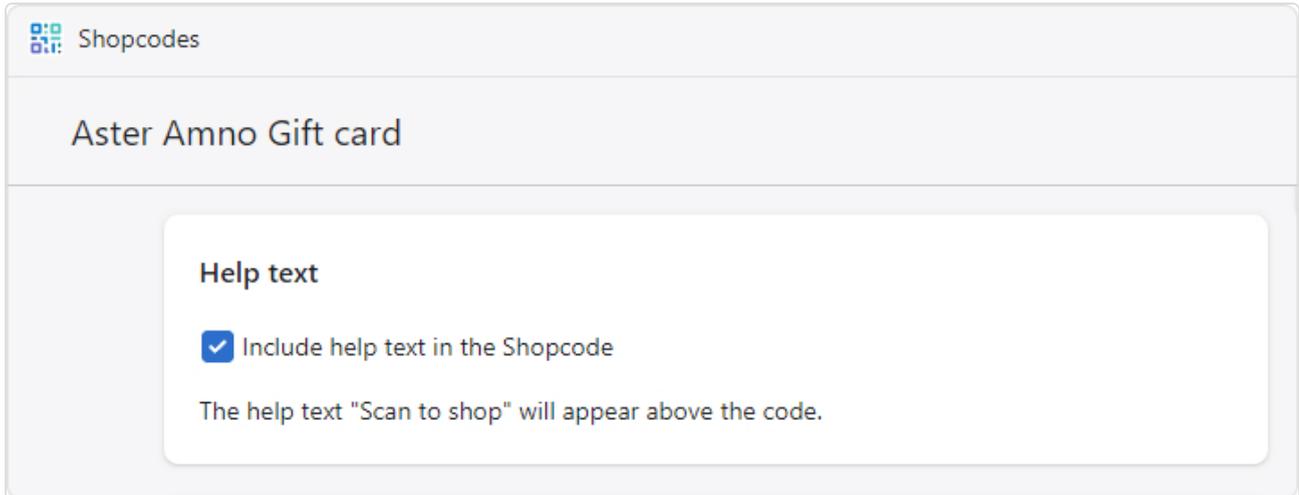

**Step 7.** Click on Create Shopcode to activate your QR code.

**Step 8.** Download the Shopcode in the format you want: PNG or SVG. We recommend the PNG format if you'll be sharing the QR code online, but if you'll be printing these codes, your best option is SVG.

**Pro tip:** If you want to add any explanatory notes to your gift card QR code, check the **Help Text** box under the scan destination. Also, test out your QR code before issuing them out to customers. Your goal is to get repeat customers and more prospects, not to push away customers with bad-functioning QR codes.

Shopcodes

Aster Amno Gift card

**Help text**

Include help text in the Shopcode

The help text "Scan to shop" will appear above the code.

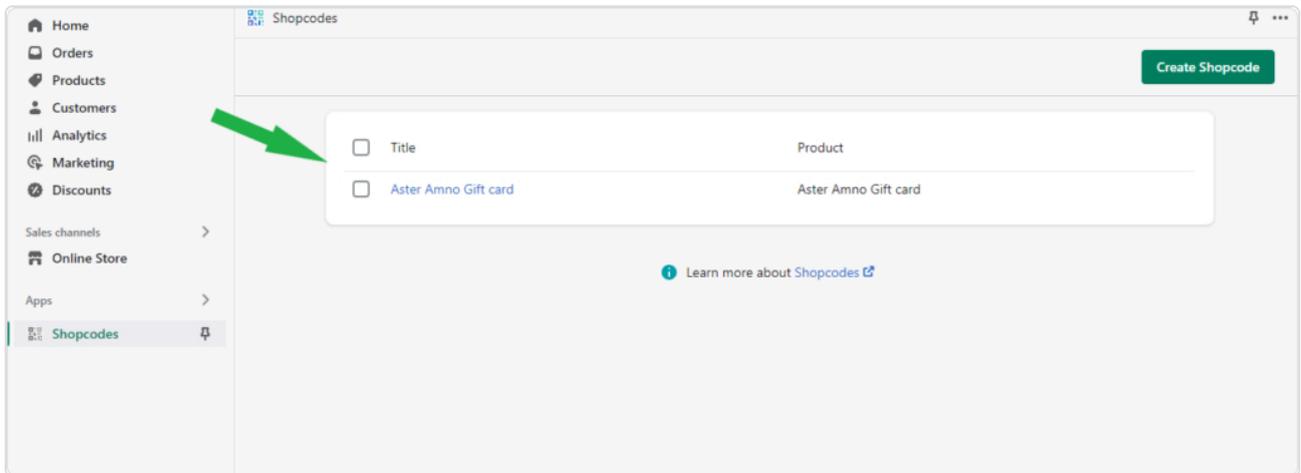

Now, that you have your QR codes out there, you'll want to know how many people are scanning them and how many of those scanners you're converting. Thankfully, you can do that right from the Shopcode app.

## How to track QR code activity

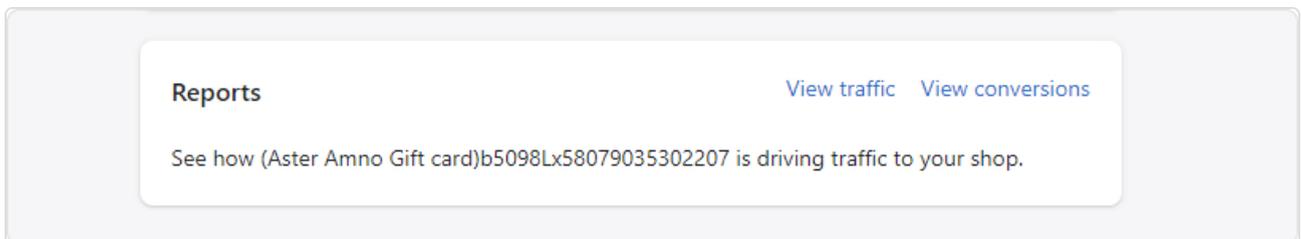

---

**Step 1.** Go to the Shopcode app as we saw above.

**Step 2.** Choose the code you want to track from your list of Shopcodes.

**Step 3.** Scroll to the Report section at the bottom of the page.

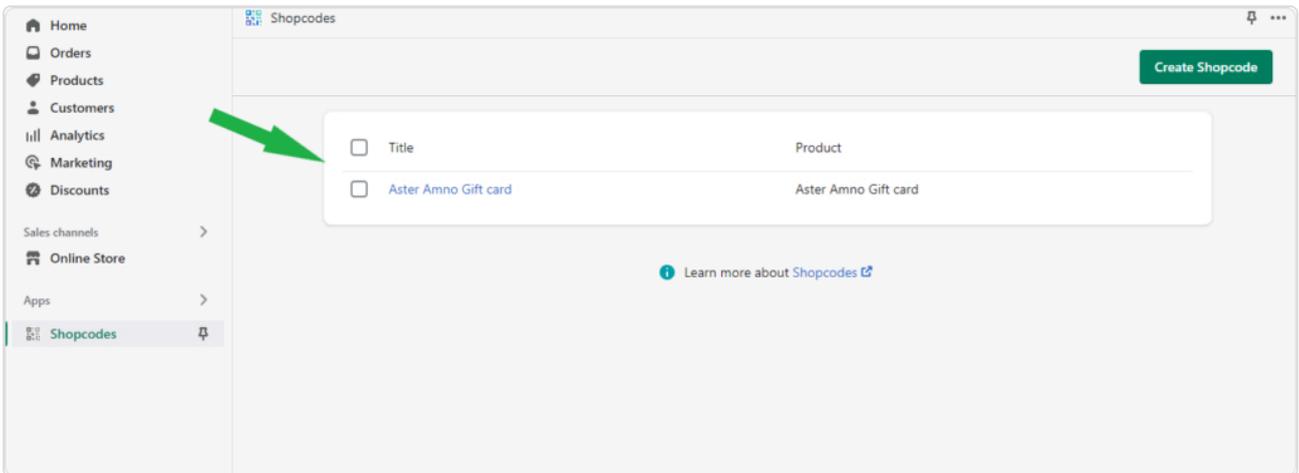

From here, you'll need to choose what exactly you're looking to track: traffic or conversion. You can then make informed decisions from there.

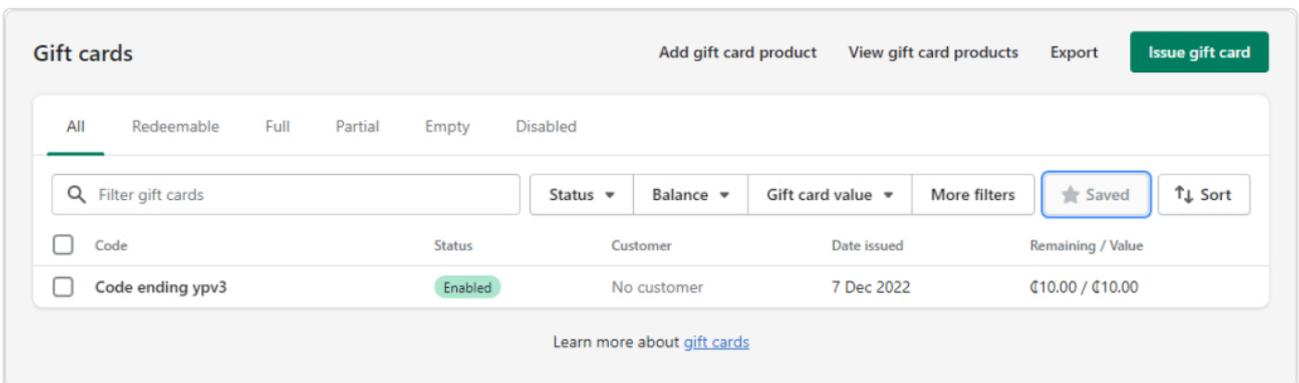

## How to check Shopify gift card balance

As of today, Shopify gift card recipients [can't check the balance](#) of gift cards on their own. All they can do is ask you, the vendor, for that information. Here's how to find Shopify gift card balance for your customers:

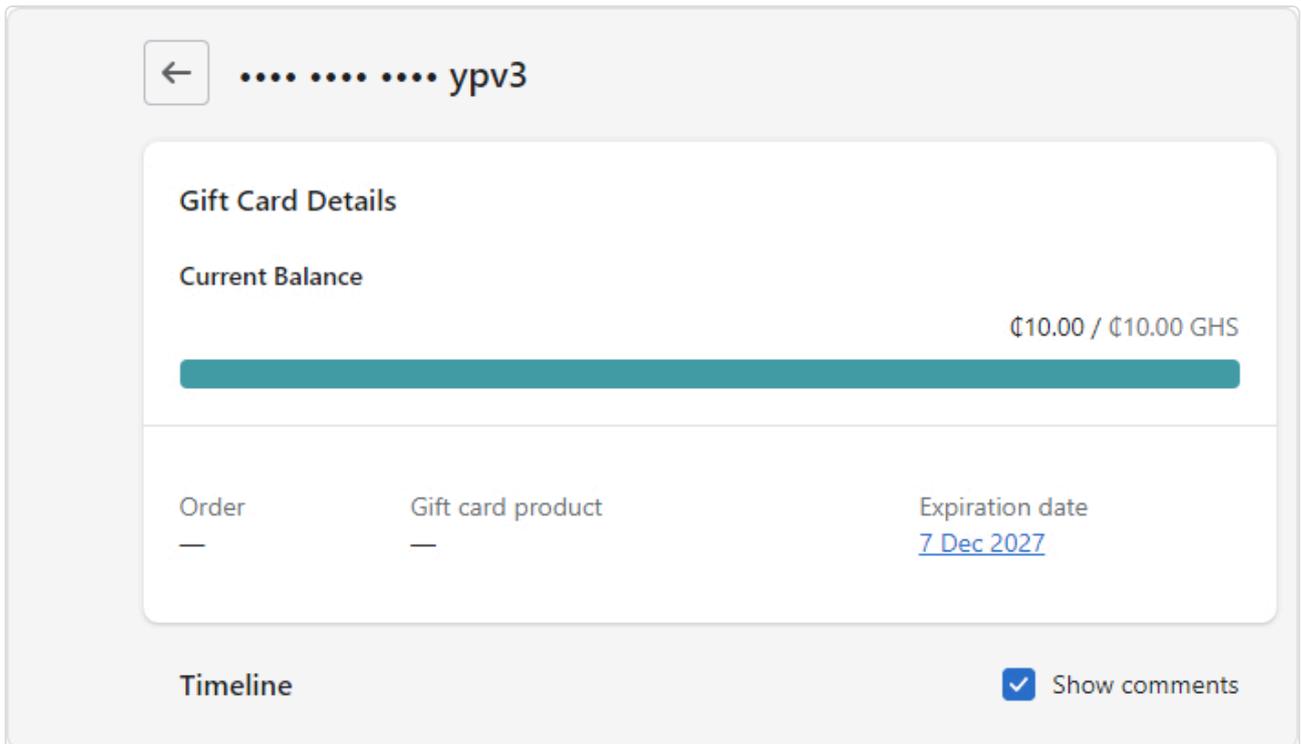

**Step 1.** Enter the **Products** section in your admin panel and select **Gift cards**.

**Step 2.** Select the gift card code from the list of gift cards (the customer should have this code).

**Step 3.** Once you find the gift card, click on the name. You can then find the gift card balance and other information, like the expiration date, in the next window.

Send this info back to your customer, and you're good to go.

Alternatively, you can issue an updated gift card to the customer, especially if they've lost the gift card information they have. To do this, select the gift card code in the gift card list and click **Resend gift card**.

The customer would receive the gift card with updated information if they had partially used it.

- **Access token**

#### Info

Instructions on how to get access token [link](#)

#### Warning

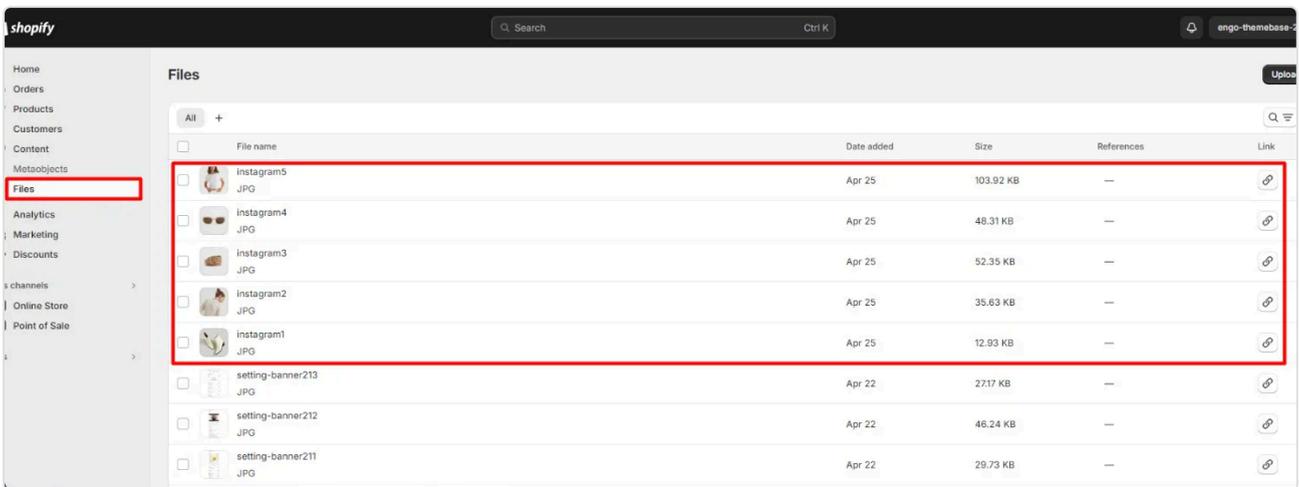

After 90 days the access token will expire. Please always update your Instagram token

([https://cdn.shopify.com/s/files/1/0821/2375/1728/files/access\\_token.jpg?v=1711092340](https://cdn.shopify.com/s/files/1/0821/2375/1728/files/access_token.jpg?v=1711092340))

When you don't have an access token but still want to display images on the Instagram section, follow these steps:

1. Save the images you want to display in .jpg format, and the images must be named as follows: instagram1.jpg, instagram2.jpg.
2. For the number of Instagram images you want to display, take that many images and save them sequentially from 1 to n: For example, if I want to display 3 Instagram images, save the images as instagram1.jpg, instagram2.jpg, instagram3.jpg. Note that Instagram images should be square. Then go to the settings of the store, select the content section, choose file -> upload the Instagram images you just saved here.

# Update theme

---

If you wish to update your theme to the latest version, you will need to manually apply the changes. Updating requires replacing or editing template files, while keeping your existing settings safe.

## Step 1: Download and Install the Latest Theme

---

Log in to your Envato Market account (where you purchased the theme).

Follow the same steps as installing the theme.

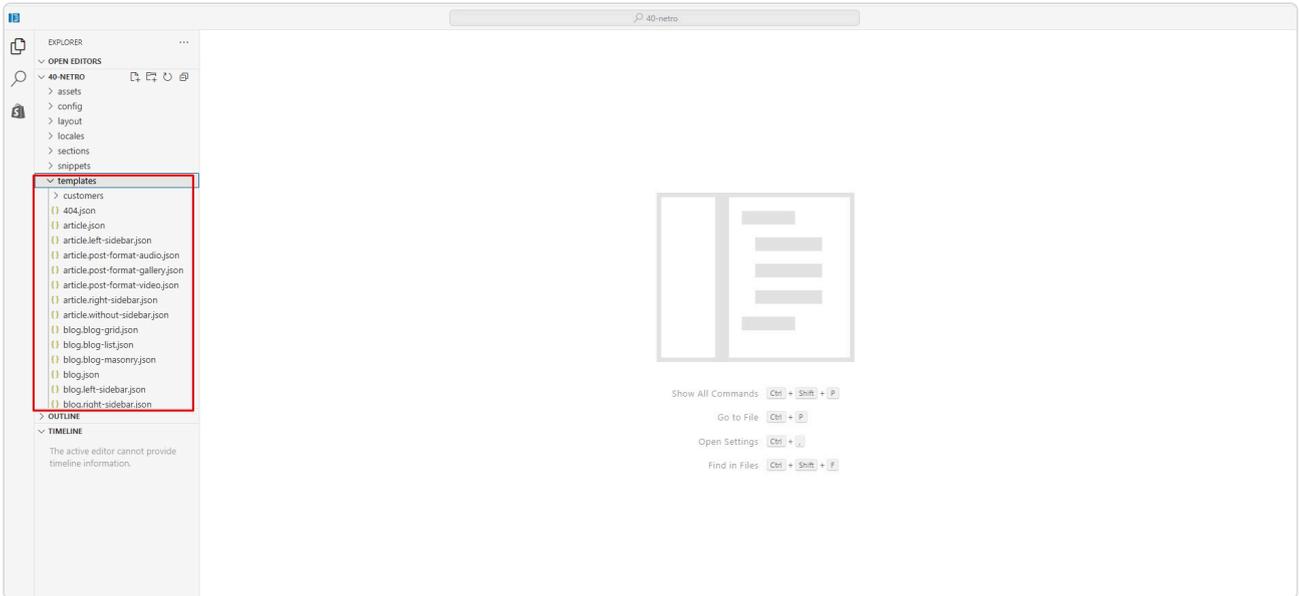

In Shopify Admin, go to Online Store > Themes > Upload theme and upload the new version.

## Step 2: Copy Settings from Old Theme

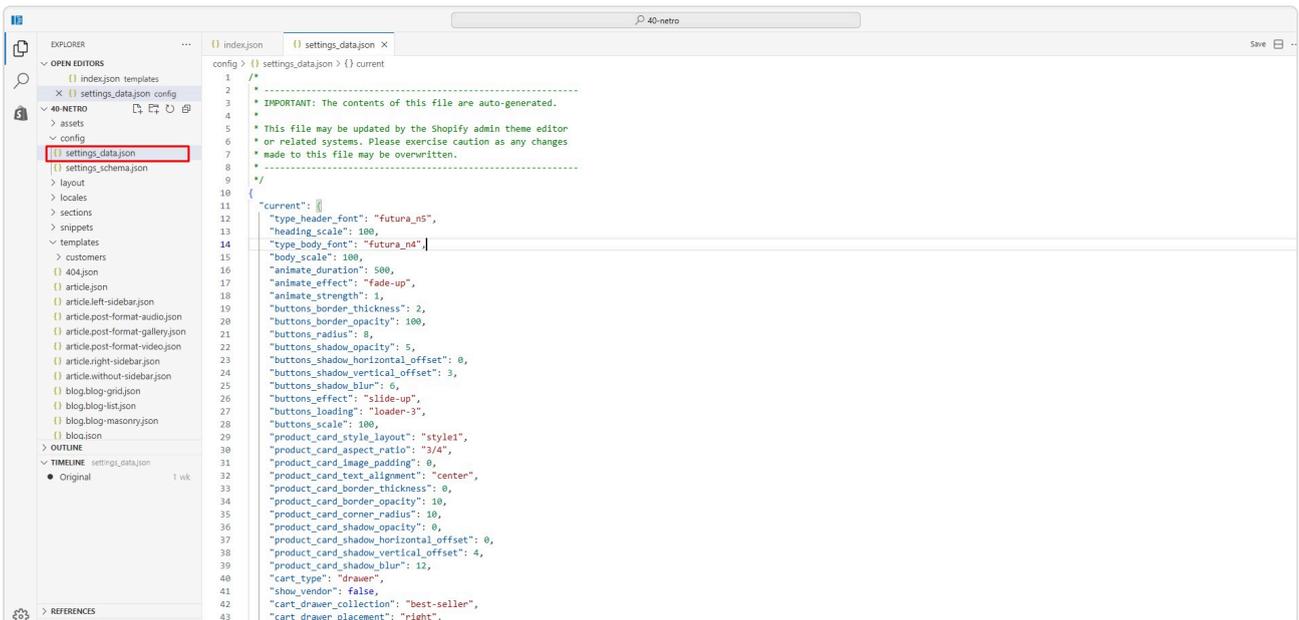

---

In Shopify Admin, go to Online Store > Themes > Edit code on your current (old) theme.

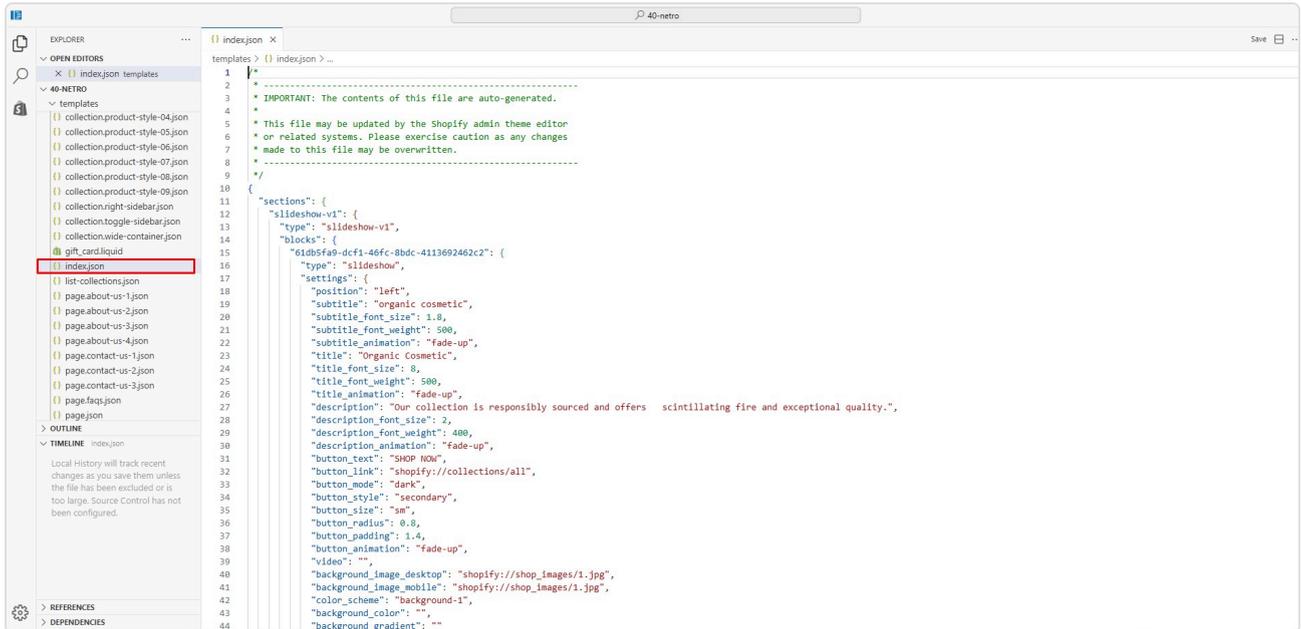

Open the template files where you have modified the content and need to preserve it when updating to the new theme.

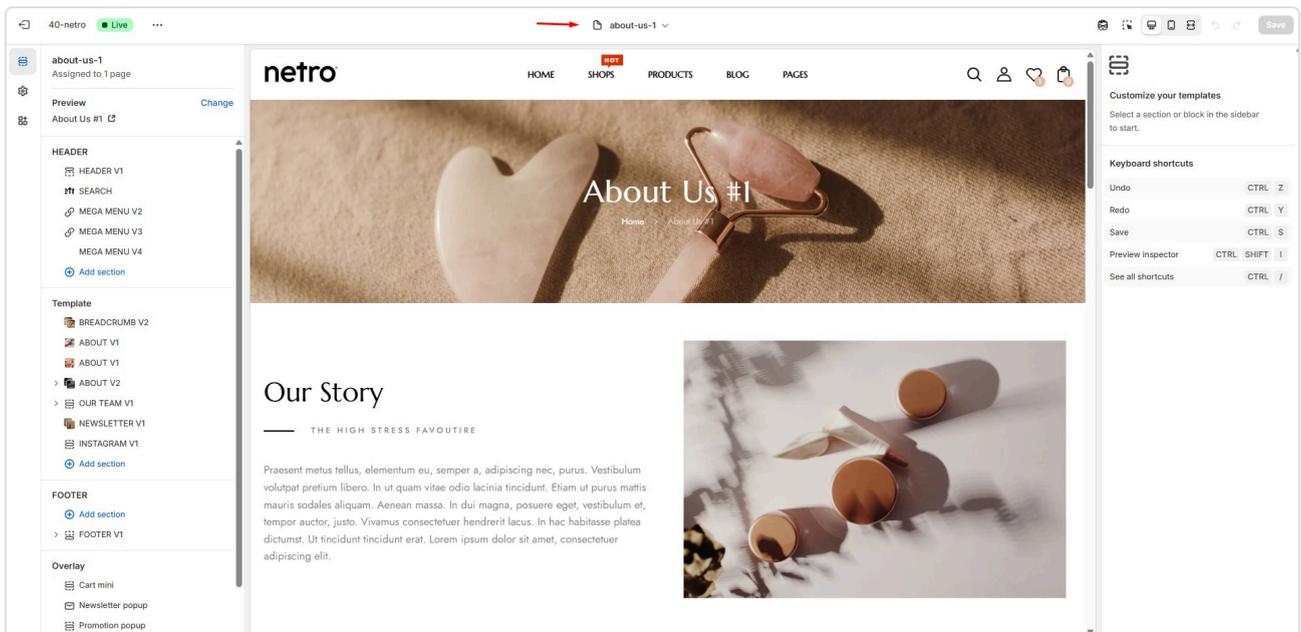

- The settings\_data.json file contains fonts, colors, and other theme settings, so you need to review it carefully and copy only the necessary parts.

- index.json

- You can identify the templates by going to Customize for each page you want to update. The template name is displayed at the top center of the page.

## Step 3. Paste Settings into New Theme

In the new theme, go to Edit code.

Replace the content of:

- config/settings\_data.json
- Each templates/\*.json file you copied
- Save the changes.

## Step 4. Reapply Custom Code (if any)

---

If you had customized Liquid files in sections/ or snippets/, you will need to reapply those edits manually in the new theme.

## Step 5. Publish the New Theme

---

Preview the new theme to make sure everything looks correct.

Once confirmed, click Publish.
