# Create Required Pages

## 1. How to create a new page?

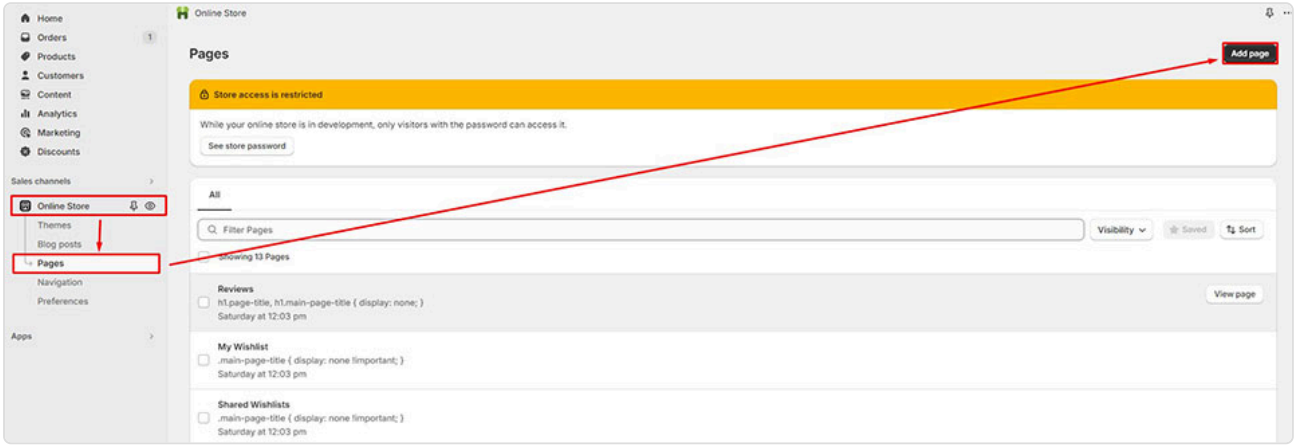
Before using Ranel theme, you need to import some default pages by the following steps:

:::tip[Step] **Step 1:** Login to your Shopify store, go to **Online Store**

**Step 2:** Go to **Pages**

**Step 3:** Click to **Add page** and create cms pages as below:

- Contact us
- Size Guide
- FAQs
- About us :::



# 2. Create a new page with demo content

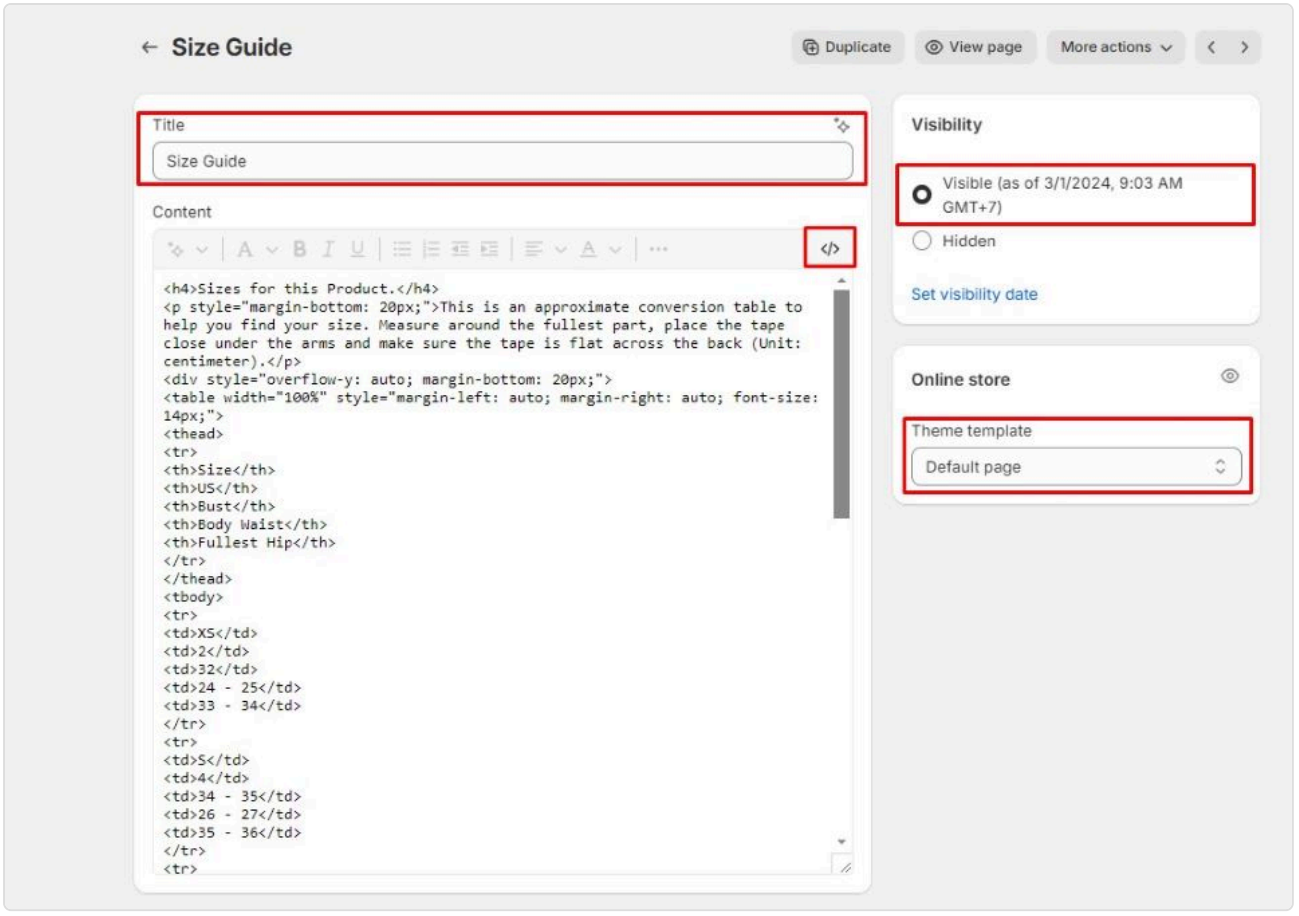
There are 3 pages that have sample content. To see demo content, please follow these guidelines below.

## 1. Size guide

:::tip[Step] **Step 1:** Create new page - **Title**: Size Guide - **Visibility**: Visible - **Theme template**: Default page.

**Step 2:** Click to block code icon to change to Show HTML
- You need to change to Show HTML before copy template so that the content will be shown like our demo store.

**Step 3:** Copy sample template below and paste to Content
:::



```
<h4>Sizes for this Product.</h4>
<p style="margin-bottom: 20px;">This is an approximate conversion table t
<div style="overflow-y: auto; margin-bottom: 20px;">

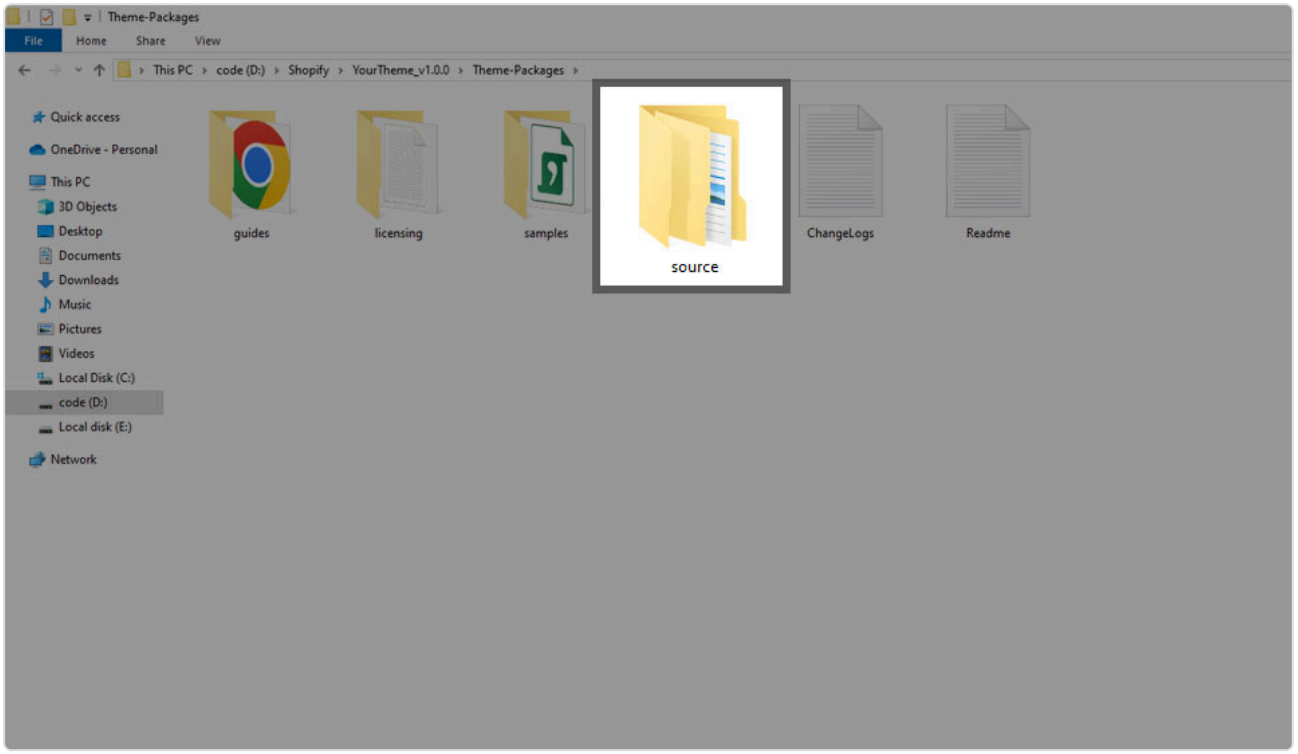
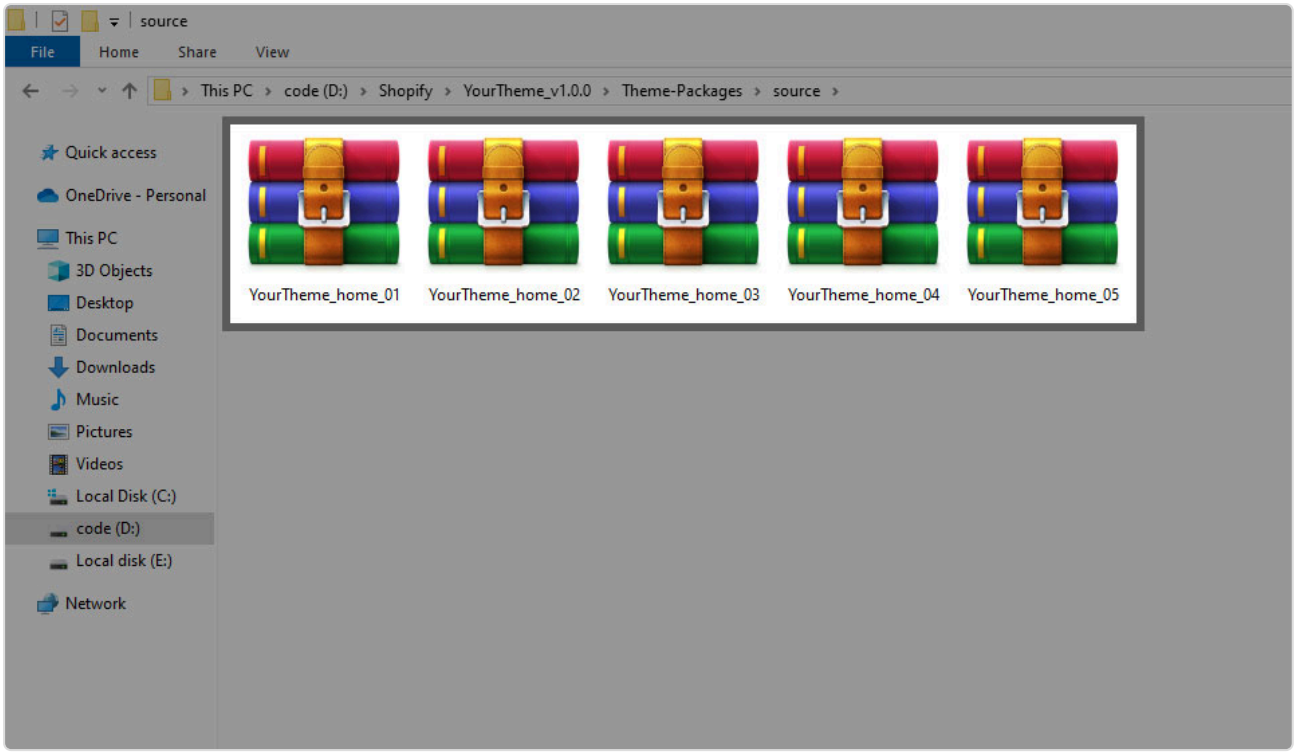
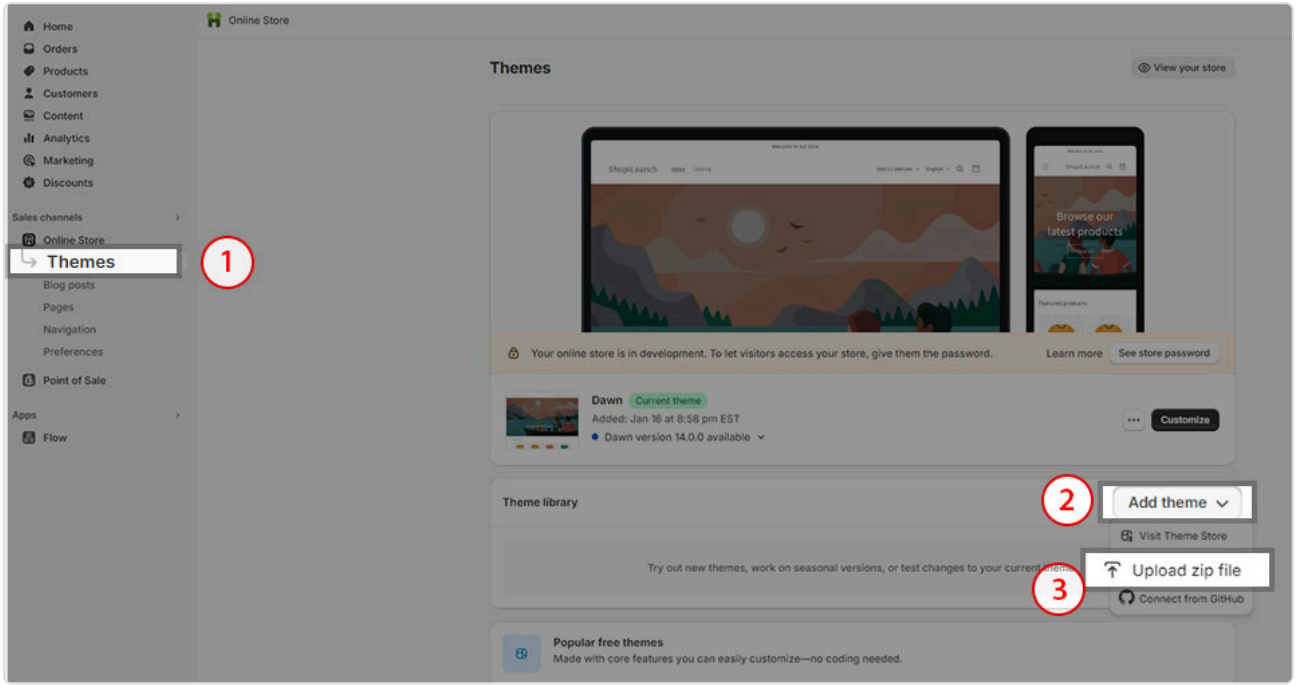
:::tip[step 3:] All the themes file need to be uploaded to Shopify store are stored on themes folder. :::



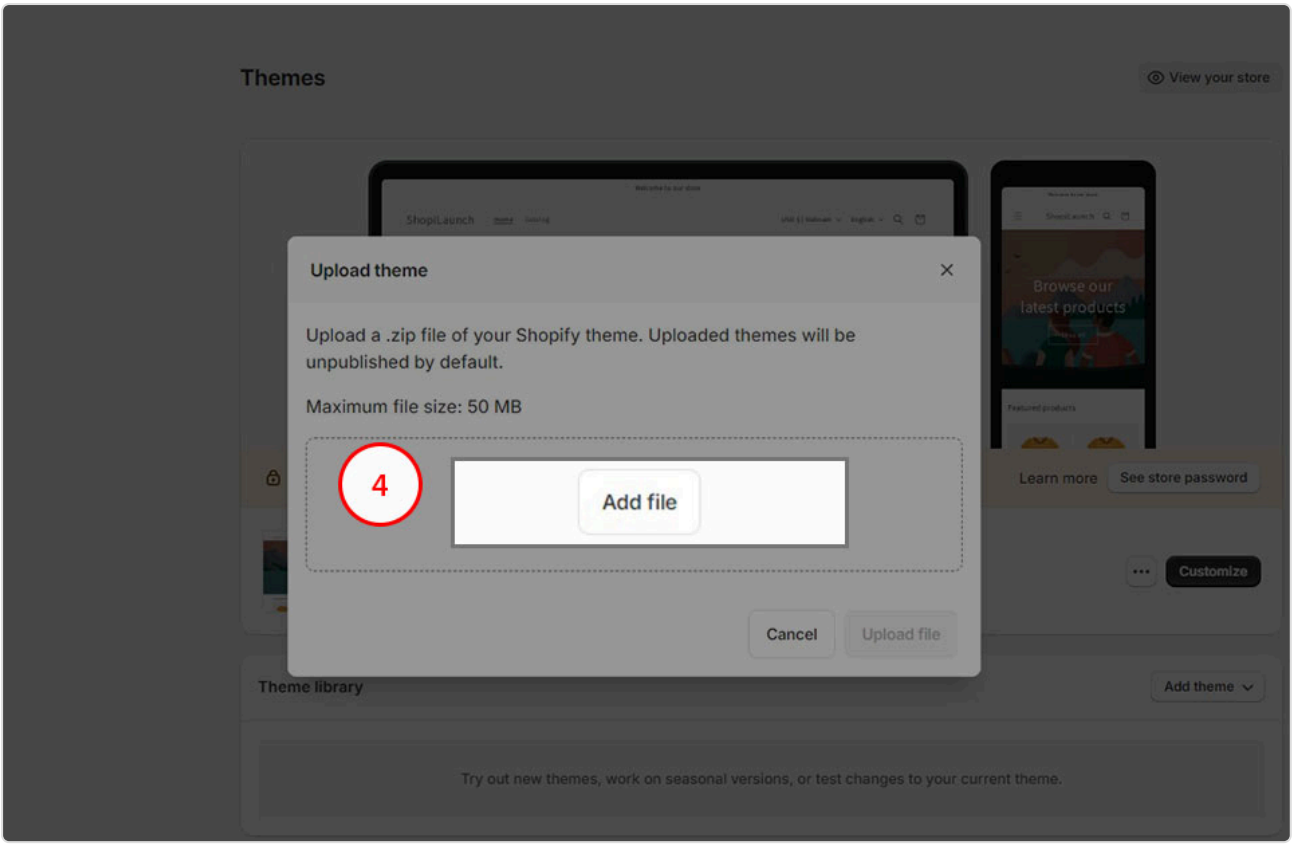


## 2. Install Theme to your store

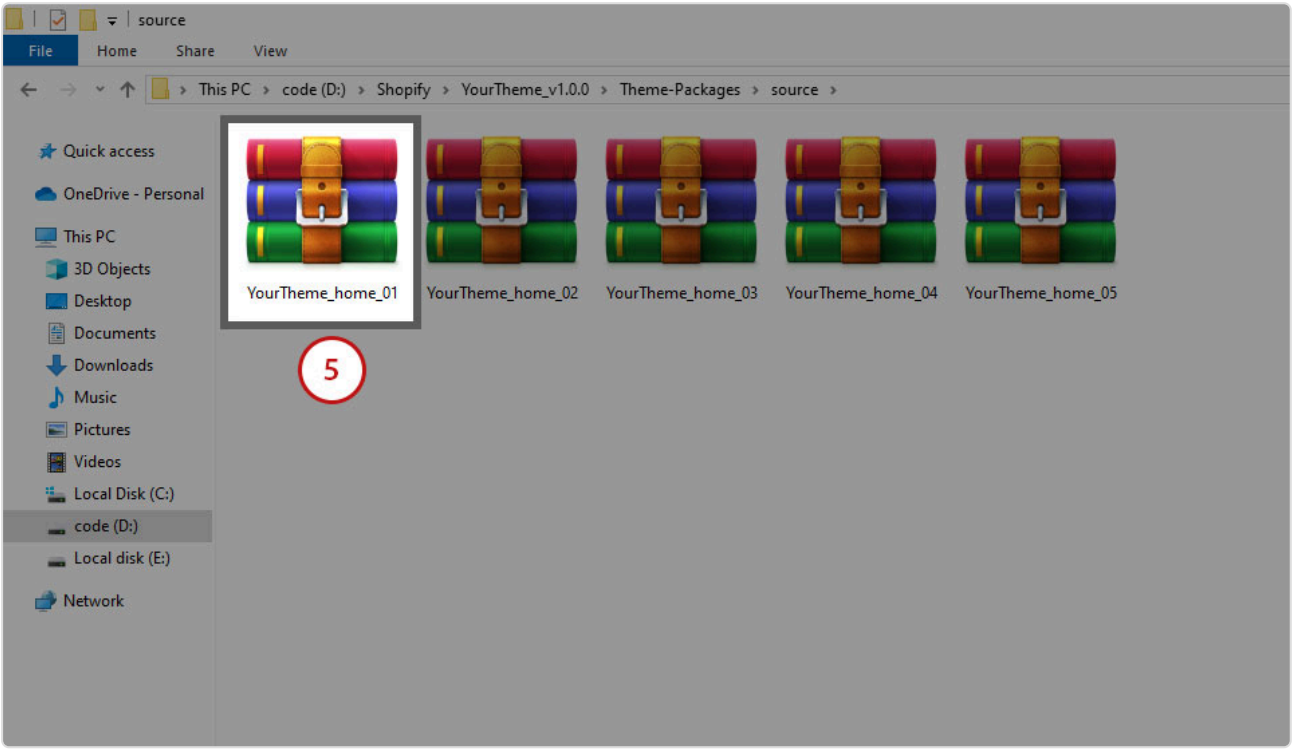
:::tip[step 1:] From your admin, click to **Online store ==> Themes ==> Add theme ==> Upload zip file** :::



:::tip[step 2:] Click to **Add file** :::



:::tip[step 3:] Select theme zip file and click to **Upload file** :::



> ℹ️ **Info**
>
> According to Shopify, after installing Ranel, you will get a theme with placeholder images. You can upload your own images to decorate your store base on Ranel layout.

> 📝 **Note**
>
> Note: There are some default pages and metafields that need to be imported. Please follow Import Pages and Import Metafields directions before using your theme.

# Recommended Apps

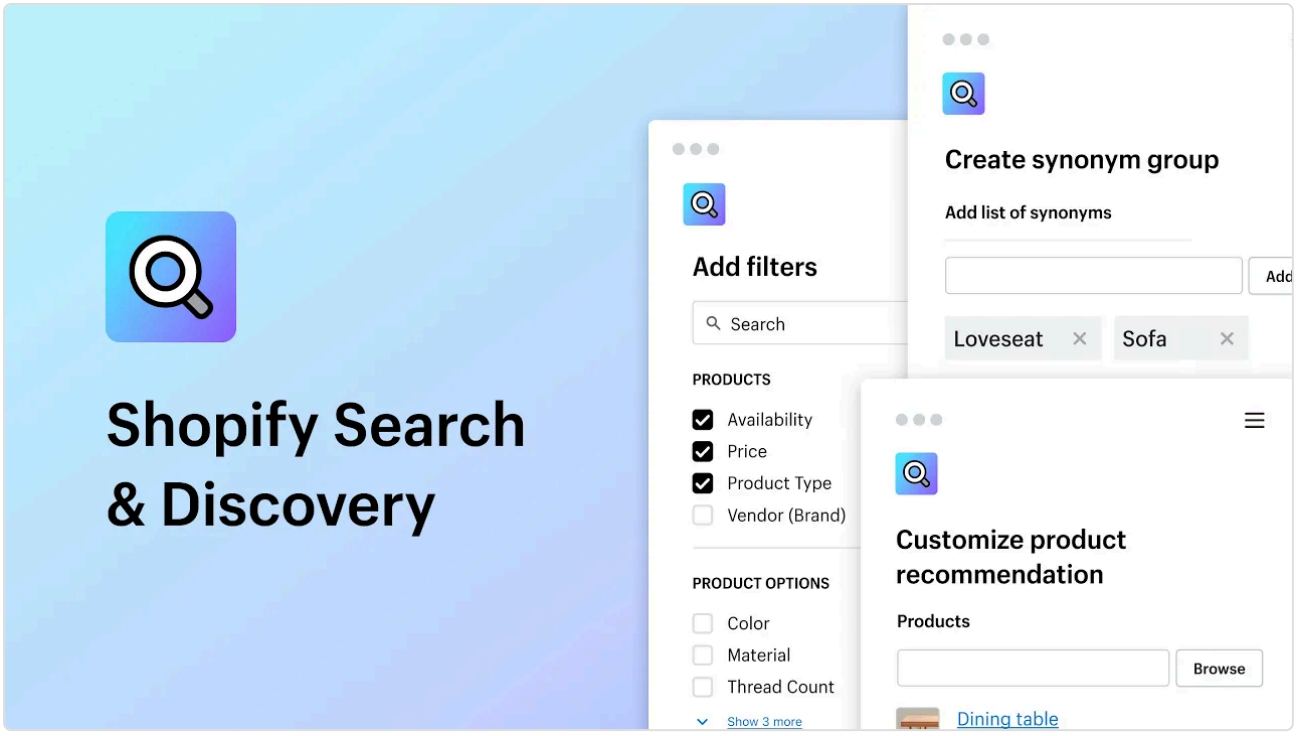
Ranel needs those below apps for some special functions. These apps are not available in the theme package, you need to download them on **Shopify App**.

## 1. Shopify Translate & Adapt

Shopify Translate & Adapt lets you auto-translate up to two languages for free, and manually add as many translations as you wish. The side-by-side editor makes it easy to compare and review your translations, and can also be used to adjust content between markets that speak the same language to ensure cultural, seasonal, and regional relevance. Manually add, edit, and review translations with the side-by-side editor.

- Auto-translate 2 languages with Google Translate (cloud.google.com/translate).
- Adapt content to reflect spelling and messaging variations between markets.
- Localize directly from the theme editor, or any resource page in your admin.
- Manage localized store content seamlessly from your Shopify admin.

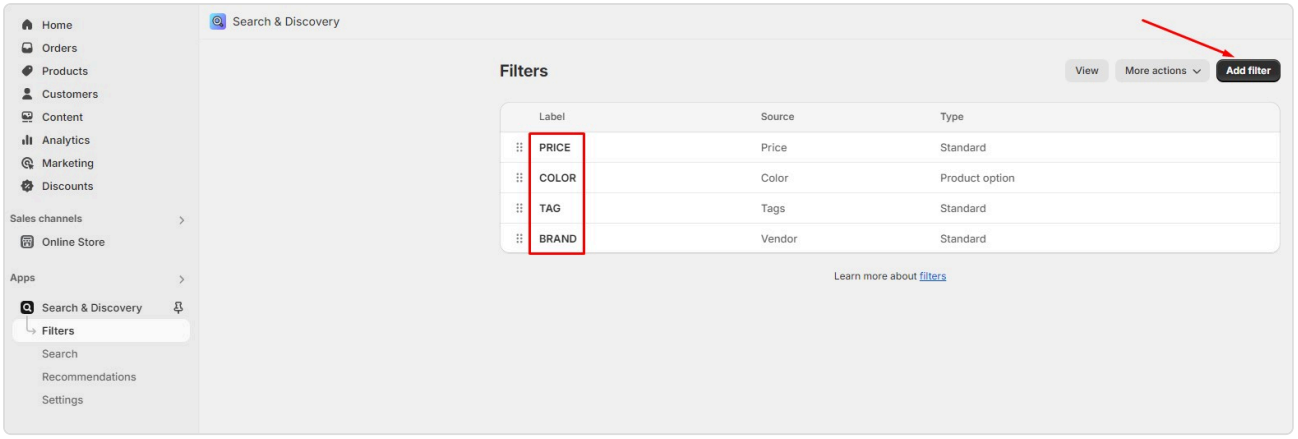
## 2. Shopify Search & Discovery



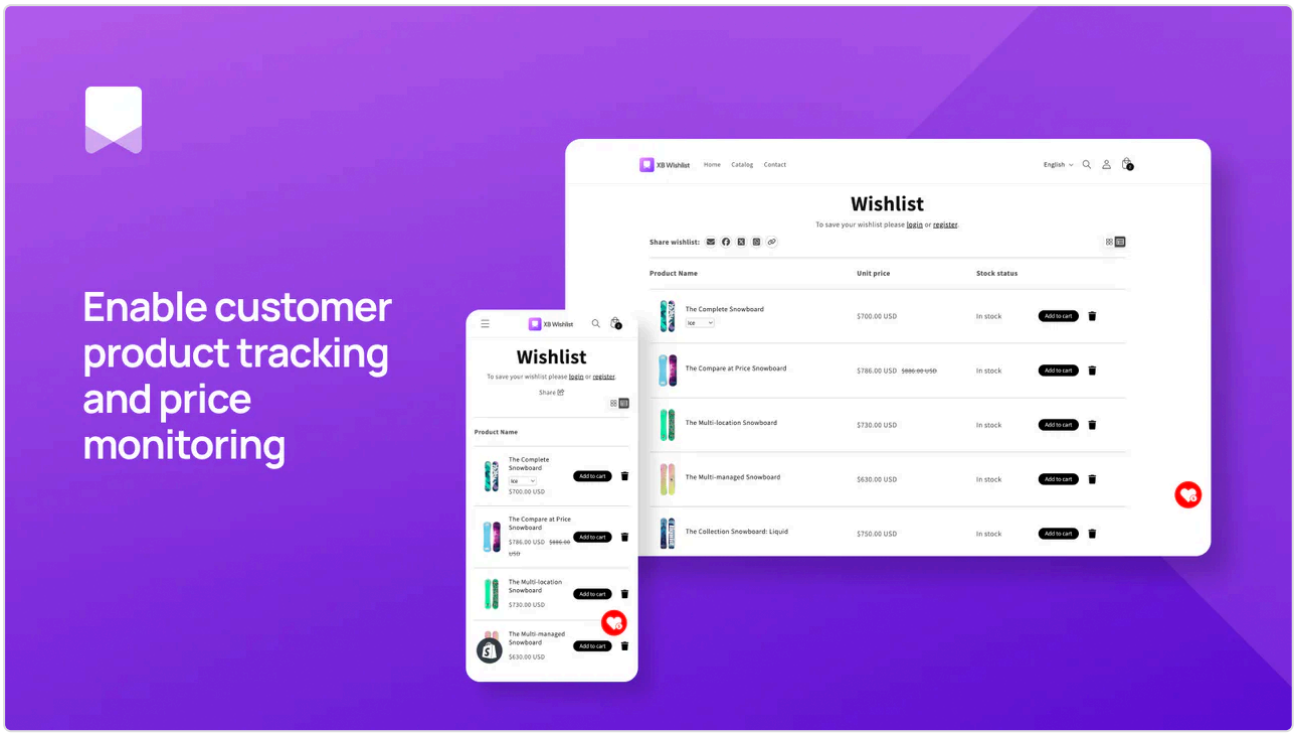
The Shopify Search & Discovery app gives you more control over how customers discover your products online. You can use the app to customize product search in your online store in the following ways:

- Create custom filters to let customers refine their search by multiple categories, which can surface more relevant results.
- Make and edit synonym groups, so your product descriptions match the terms customers use to search.
- Feature particular products in search results.
- Recommend related products on product detail pages to add to the recommendations that are automatically generated.

**Settings Shopify Search & Discovery**: Create filters: Click on *Add filter* and create filters.



## 3. XB Wishlist



Integrate wishlist easily, enhance conversions with wishlists.

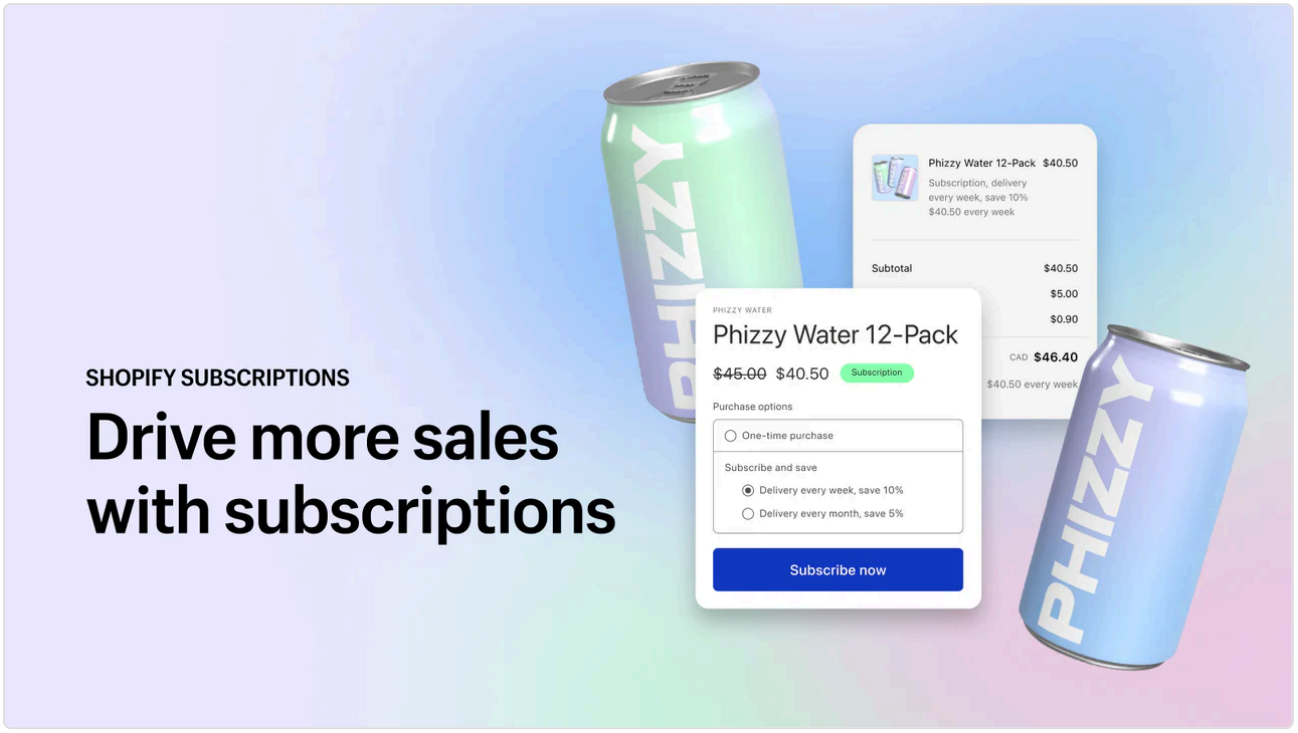
XB Wishlist empowers your store by allowing customers to easily save and organize their favorite items, enhancing their shopping experience and driving repeat visits. With a user-friendly interface, this app integrates seamlessly with your store, offering a personalized shopping journey that encourages customer engagement and loyalty.

Stand out by providing a feature that helps customers track what they love, making it simple for them to revisit and purchase their saved products.

- Simple setup and integration with your store.
- Customers can access their wishlist from their account.
- Tailor the wishlist button to your store's design.
- Customers can save items and share their wishlists.

**Guide you through the settings**: Wishlist

## 4. Shopify Subscriptions



Increase customer lifetime value and establish predictable revenue with Shopify Subscriptions

Give your customers the option to receive the products they love on a regular basis by offering subscriptions on your store. Whether you sell all your products as a subscription or just a few, Shopify Subscriptions makes it easy to set up and launch subscriptions, directly from Shopify admin. Your customers can conveniently pause or skip orders and update payment and shipping details right from their account.

- Offer auto-billed subscriptions (renew weekly, monthly or yearly) with discounts
- Allow your customers to cancel, skip, or pause subscriptions
- Use customizable email templates for order confirmations or payment reminders
- Access reporting to analyze your store's subscription performance
- Easily transfer existing subscription contracts to Shopify Subscriptions

**Settings Shopify Subscriptions**:

Create Plan: Click on *Plans* and create plan.

# 🔥 Theme settings

# Color

Change the color scheme to match the website’s look and feel

You can define different color schemes in your theme settings and apply the color schemes to different sections throughout your online store with a color scheme picker. A color scheme is a set of colors. Your theme has a set of default color schemes applied that you can change at any time in the theme editor. You can add your brand colors to ensure a cohesive application of your color palette across your online store. Please follow this link for more clearly about Color Scheme: Link

To customize color in our theme please follow the steps:

:::tip[Steps]

1. In the theme editor (**Customize**), click **Theme settings**
2. Locate **Colors**
3. Make necessary changes
4. **Save** :::

# Color scheme

**Please follow the document to change the colors on your store.**

**Accent:** You can change the color when hover to Blog tilte, Add to cart button, Filter, Sortby,...

**Site background:** Your site background color

**Text:** You can change the text color of your store.

**Shadow:** Shadow color in your store.

**Border:** Border color in your store.

![footer demo](https://docs.engotheme.com/img/theme-settings/color1.jpg)

# Button color

Change background and text color for all call-to-action buttons and button hover.

- Button primary: used for the most important or prominent action on your webpage (ex: “Submit” button on a form, “Buy Now” button on an e-commerce site, ...)
- Primary button: used for actions that are less important or serve as alternatives to the primary action (ex: a “Cancel” or “Reset” button in a form, ...)

![footer demo](https://docs.engotheme.com/img/theme-settings/color2.jpg)

# Typography

Ranel has a dedicated options panel of its own, which lets you customize the styling of each part of your site to the finest detail. You can set the font style and size for the text.

> **Note**
>
> Theme supports Google Font , Shopify Font and Custom Font

:::tip[Steps]

1. In the theme editor (**Customize**), click **Theme settings**
2. Locate **Typography**
3. Make necessary changes
4. **Save** :::

Typography is considered one of the essential components that impact the website's look and feel. It contains the following elements.

# 1. Headings and body text

You can either choose the existing fonts from the library or custom fonts. For the custom font, kindly follow the steps below:

Elements related to the font such as spacing, height, weight, etc. are adjustable.

![font demo](https://docs.engotheme.com/img/theme-settings/font.jpg)
![font demo](https://docs.engotheme.com/img/theme-settings/font1.jpg)

**You can also add other fonts form Google Font to the font heading selection by doing the following**

- In the customer choose edit code

![font demo](https://docs.engotheme.com/img/theme-settings/typography-1.jpg)

- In the **Config** choose `settings_schema.json`

![font demo](https://docs.engotheme.com/img/theme-settings/typography-2.jpg)

- Go to the `font_heading_selection`

- Add font in here and save.

- In the Customer select Font heading selection

**Info**

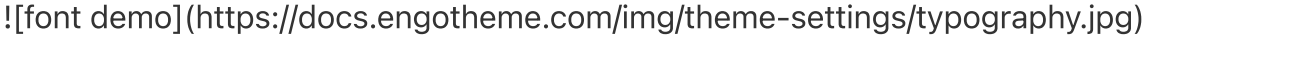
You can also add other fonts form Google Font to the Font body selection just like adding Google Fonts for font heading selection.

**Note**

```
In the edit code, file settings_schema.json you need go to item
```

# 2. Custom

In addition to the body text and heading, the custom can also be flexibly configured.



**Info**

You can also add other fonts form Google Font to the Font custom selection just like adding Google Fonts for font heading selection.

> **Note**
>
> In the edit code, file settings_schema.json you need go to item

# Layout

## Change the website's container width

:::tip[Steps]

1. In the theme editor (**Customize**), click **Theme settings**
2. Locate **Layout**
3. Make necessary changes
4. **Save** :::

This section consists of 5 elements:

- Sellect Header and Footer style. There are 5 style in here.
- Horizontal space and vertical space: Affects areas with multiple columns or rows.

![layout demo](https://docs.engotheme.com/img/theme-settings/layout.jpg)

# Animation

## Setting animation

:::tip[Steps]

1. In the theme editor (**Customize**), click **Theme settings**
2. Locate **Animation**
3. Make necessary changes
4. **Save** :::

- Animate duration
- Animate effect: select page animate effect. Default: Fade up.
- Animate strength

![animation demo](https://docs.engotheme.com/img/theme-settings/animation.jpg)

# Buttons

:::tip[Steps]

1. In the theme editor (**Customize**), click **Theme settings**
2. Locate **Buttons**
3. Make necessary changes
4. **Save** :::

# Button border

- **Thicknes**, **opacity**, **corner radius**

![animation demo](https://docs.engotheme.com/img/theme-settings/buttons1.jpg)

## Button shadow

- **Opacity**, **Horizontal offset**, **Vertical offset**, **Bur**

![animation demo](https://docs.engotheme.com/img/theme-settings/buttons3.jpg)

# Variant pills

:::tip[Steps]

1. In the theme editor (**Customize**), click **Theme settings**
2. Locate **Variant pills**
3. Make necessary changes
4. **Save** :::

Variant pills are one way of displaying your product variants.

## Variant color swatches

- Fill variant color swatches.

![variant demo](https://docs.engotheme.com/img/theme-settings/variant.jpg)
![variant demo](https://docs.engotheme.com/img/theme-settings/variant2.jpg)

# Product card

Change layout, content and display variant options

:::tip[Steps]

1. In the theme editor (**Customize**), click **Theme settings**
2. Locate **Product card**
3. Make necessary changes

# Layout image

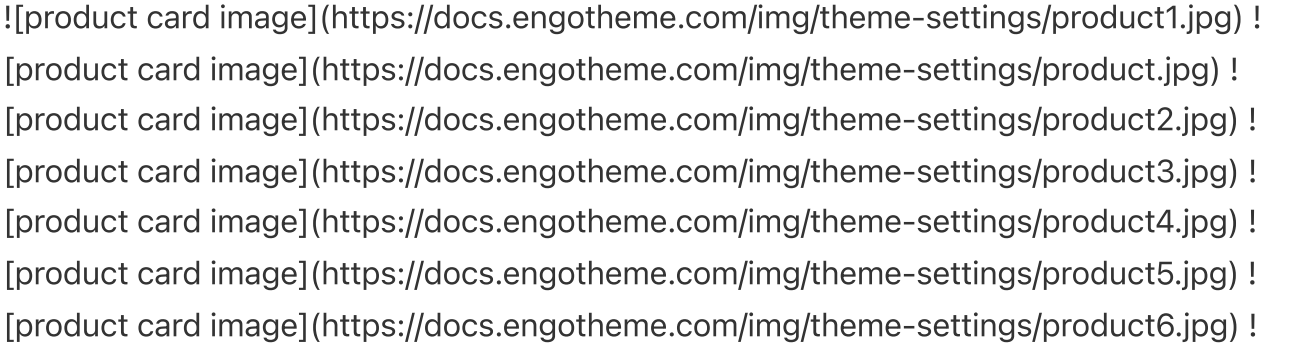
## Product card style

- **Show vendor:** display vendor/brand names under the product title.
- **Show quick view:** let customers preview product information without needing to go to the product page.
- **Show price:** display price of product
- **Show badge:** hide or show the sale badge in % discount or text.
- Image: Set the suitable **Aspect ratio** for your image card.

![product demo](https://docs.engotheme.com/img/theme-settings/product9.jpg)

- There are 9 styles to select from:

import Tabs from ‘@theme/Tabs’; import TabItem from ‘@theme/TabItem’;



[product card image](https://docs.engotheme.com/img/theme-settings/product7.jpg) ! [product card image](https://docs.engotheme.com/img/theme-settings/product8.jpg) ![product demo](https://docs.engotheme.com/img/theme-settings/product11.jpg)

- Setting the **product card color scheme** in the theme settings only works when the **‘Enable distinct color scheme’** option is not turned on for any product card section

![product demo](https://docs.engotheme.com/img/theme-settings/product-card.jpg) ![product demo](https://docs.engotheme.com/img/theme-settings/product-card2.jpg)

- The product card’s content can be set as left, center or right.
- **Image padding** : Determine the space between image and content

![product demo](https://docs.engotheme.com/img/theme-settings/product-card3.jpg)

- Style border and Shadow

# Cart

Display the added product and cart information

The cart drawer is a slide where the cart information will show. A side pops up whenever customers add an item to the cart, offering customers to continue shopping while they can see the cart information. Customers can also edit the quantity or add a specific note.

![cart demo](https://docs.engotheme.com/img/theme-settings/cart3.jpg)

:::tip[Steps]

1. In the theme editor (**Customize**), click **Theme settings**
2. Locate **Cart**
3. Make necessary changes
4. **Save** :::

# 1. Choose cart type

There are 2 options for cart type: **drawer**, **page**

![cart type](https://docs.engotheme.com/img/theme-settings/cart11.jpg)

If it is a cart drawer, select the cart drawer position as left or right

![cart type](https://docs.engotheme.com/img/theme-settings/cart12.jpg)

# 2. Cart drawer collection

This section will appear below the products in customers' carts and automatically display recommended products.

![cart ship demo](https://docs.engotheme.com/img/theme-settings/cart9.jpg)
![cart ship demo](https://docs.engotheme.com/img/theme-settings/cart10.jpg)

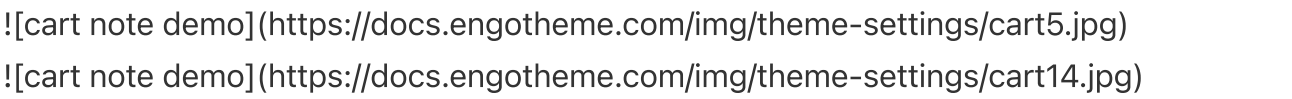
# 3. Free shipping rates:

This option allows you to set the minimum shipping amount for Customers, which means, when Customers reach to that minimum amount, they will have free shipping offer.

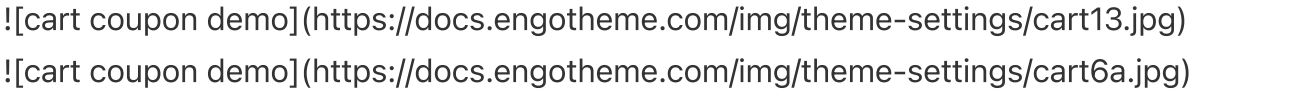
![cart ship demo](https://docs.engotheme.com/img/theme-settings/cart4.jpg)
![cart ship demo](https://docs.engotheme.com/img/theme-settings/cart2.jpg)

# 4. Order note:

Activating the Cart note feature enables customers to add notes to their shopping cart, enhancing communication and providing additional information during checkout.

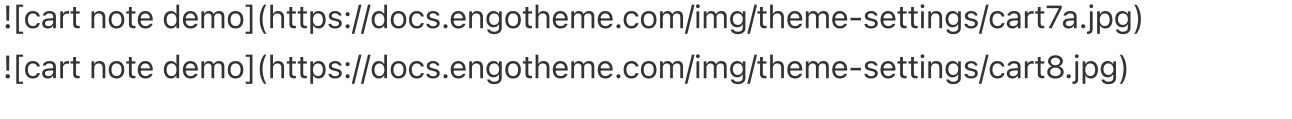


## 5. Coupon



## 6. Shipping Rates Calculator:

Customers can begin the calculation process by entering their information.

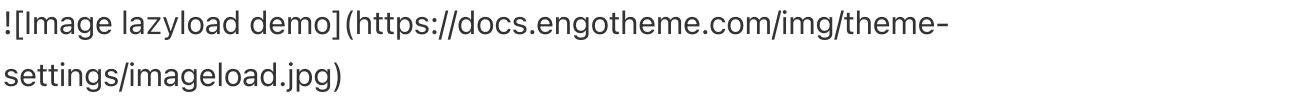


# Image lazyload

:::tip[Steps]

1. In the theme editor (**Customize**), click **Theme settings**
2. Locate **Image lazyload**
3. Make necessary changes
4. **Save** :::

### Setting image lazyload



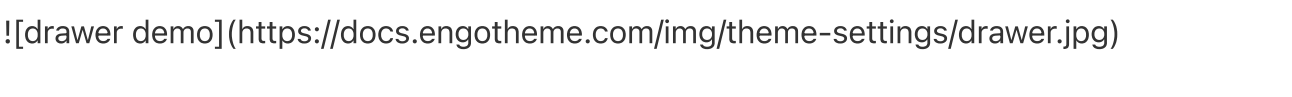
# Drawer

If you select drawer as the shopping cart type, this drawer setting will be active

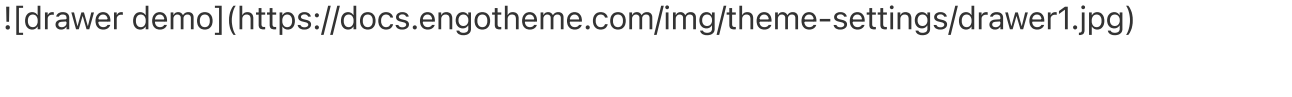
:::tip[Steps]

1. In the theme editor (**Customize**), click **Theme settings**
2. Locate **Drawer**
3. Make necessary changes
4. **Save** :::

## 1. Border, Shadow



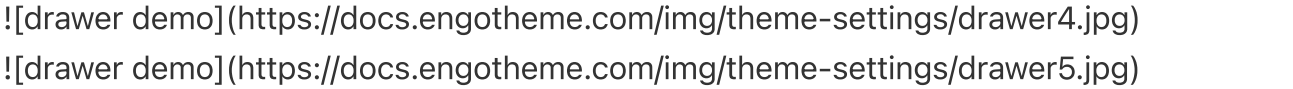
## 2. Effect



## 3. Cart note

## 4. Cart discount

## 5. Cart shipping



# Currency format

This setting lets you show currency codes in the cart and checkout prices.

:::tip[Steps]

# Product settings

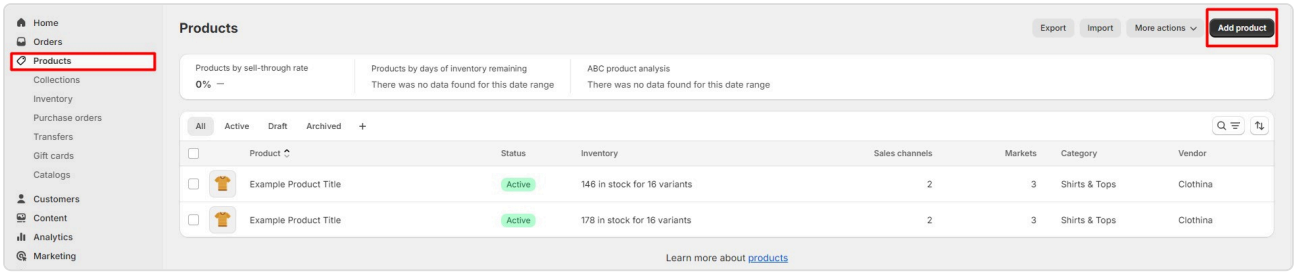
# Create new product

## How to create a new product

:rocket: Go to the product section in the store’s settings and select add product to add a new product



import Tabs from ‘@theme/Tabs’; import TabItem from ‘@theme/TabItem’;

- **Title:** Title is where to enter the product name
- **Description:** Where detailed information about the product is stored
- **Media:** Accepts images, videos, or 3D models
- **Pricing:** Current price
- **Compare-at price:** Price before decrease or increase

![title media](https://docs.engotheme.com/img/product-settings/add-product-new2.jpg)
Product inventory status triggers a sense of scarcity, increases the perceived value of your products, and pushes your customers to make faster buying decisions

All contributing to the FOMO effect. To display the **Product inventory** status, make sure you select **Track quantity** for your products.

**Shipping:** The system will calculate shipping costs based on factors such as: - Package size and weight - where the product was manufactured - Related fees and taxes

Display the product variants in different form on both Quickview modal and product page

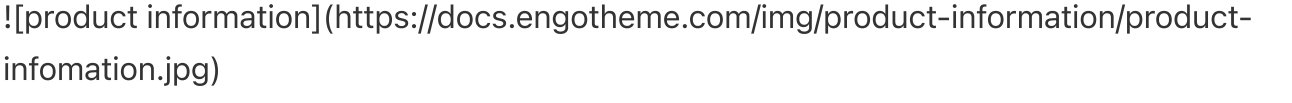
- When creating a variant, use metafields to fill in the values and price

**Search engine listing:** in the store's products is used to optimize the display of your products on search engines such as Google, Bing, Yahoo,...

- Increase product visibility
- Provide detailed information about the product
- Increase conversion rate

# Product information settings

Accurate, reliable, and in-depth product details help customers find the information they need to make buying decisions. This section provides crucial data that belongs to an individual product such as price, title, buy buttons, etc. You can change the product information by re-ordering, removing, and adding blocks.



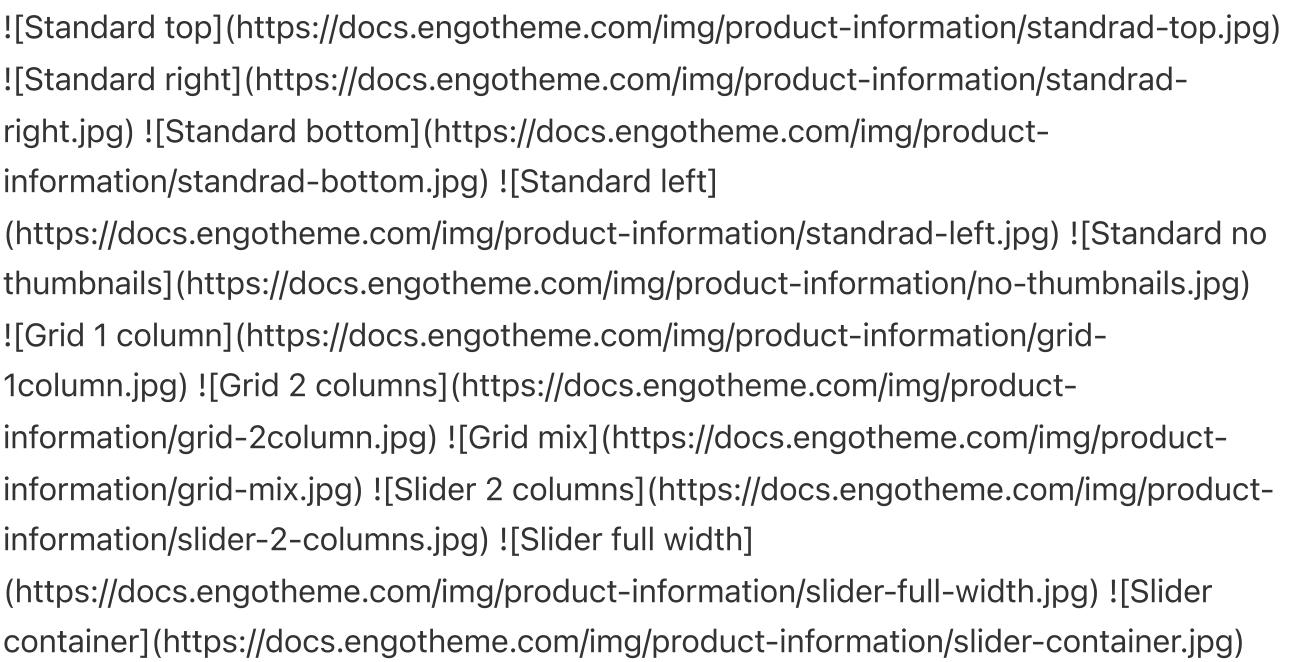
:::tip[steps]

1. In the theme editor (Customize), open the template selector
2. Select **Products**, then **Default product.**
3. On the left-sidebar, add **Product information.**
4. Make necessary changes > **Save**. :::

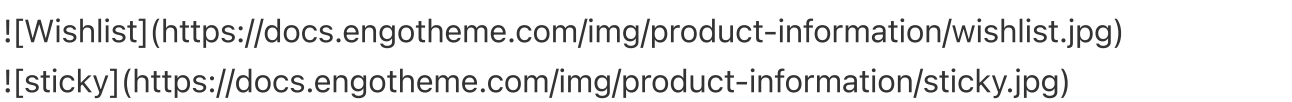
## Layout settings

1. Control the container type: box, wide.
2. Control the product information layout:

import Tabs from ‘@theme/Tabs’; import TabItem from ‘@theme/TabItem’;



3. Display the **“Show add to Wishlist”**, **“Enable sticky”** icon button.



## Product media

Display thumbnails and pagination on the mobile version.

![Product media](https://docs.engotheme.com/img/product-information/product-media.jpg)

## Sticky add to cart

You can enable/ disable the feature on both mobile and desktop.
You can also add other buttons such as compare (for product comparison), wishlist, and dynamic checkout.

![sticky add to cart](https://docs.engotheme.com/img/product-information/sticky-add-cart.jpg)

## General settings

![general](https://docs.engotheme.com/img/product-information/general.jpg)

# Vendor

# Add Vendor in Product

- Choose the specific product for which you want to add the vendor.

![vendor](https://docs.engotheme.com/img/product-information/vendor.jpg)

:::tip[step 1] Add Brand Image

- From Themes ==> **Customize**, go to the Product Page of your specified product.

- In the Product Information section, select “**Add Block**”.
- Choose “**Vendor**”.
- Data that you previously added will now be displayed automatically on the product page.
  :::

Section padding allows you to specify the space between the slideshow and the preceding or following sections, or both.

![vendor](https://docs.engotheme.com/img/product-information/vendor1.jpg)

# Product recommendations

Display related products of the current product page

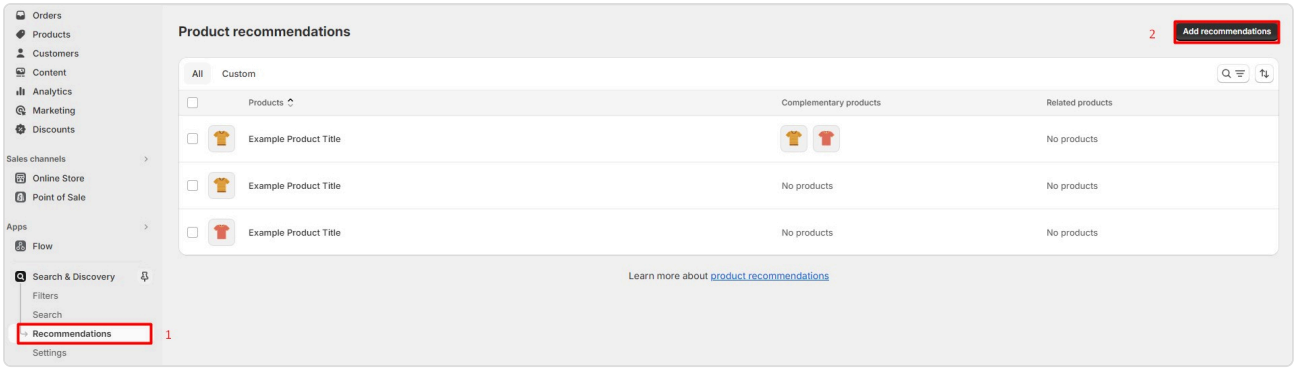
A Product recommendations section displays an automatically-generated list of product recommendations. Displaying recommended products to customers makes it easier for them to discover new products, and can help to increase online store sales.

:::tip[steps:]

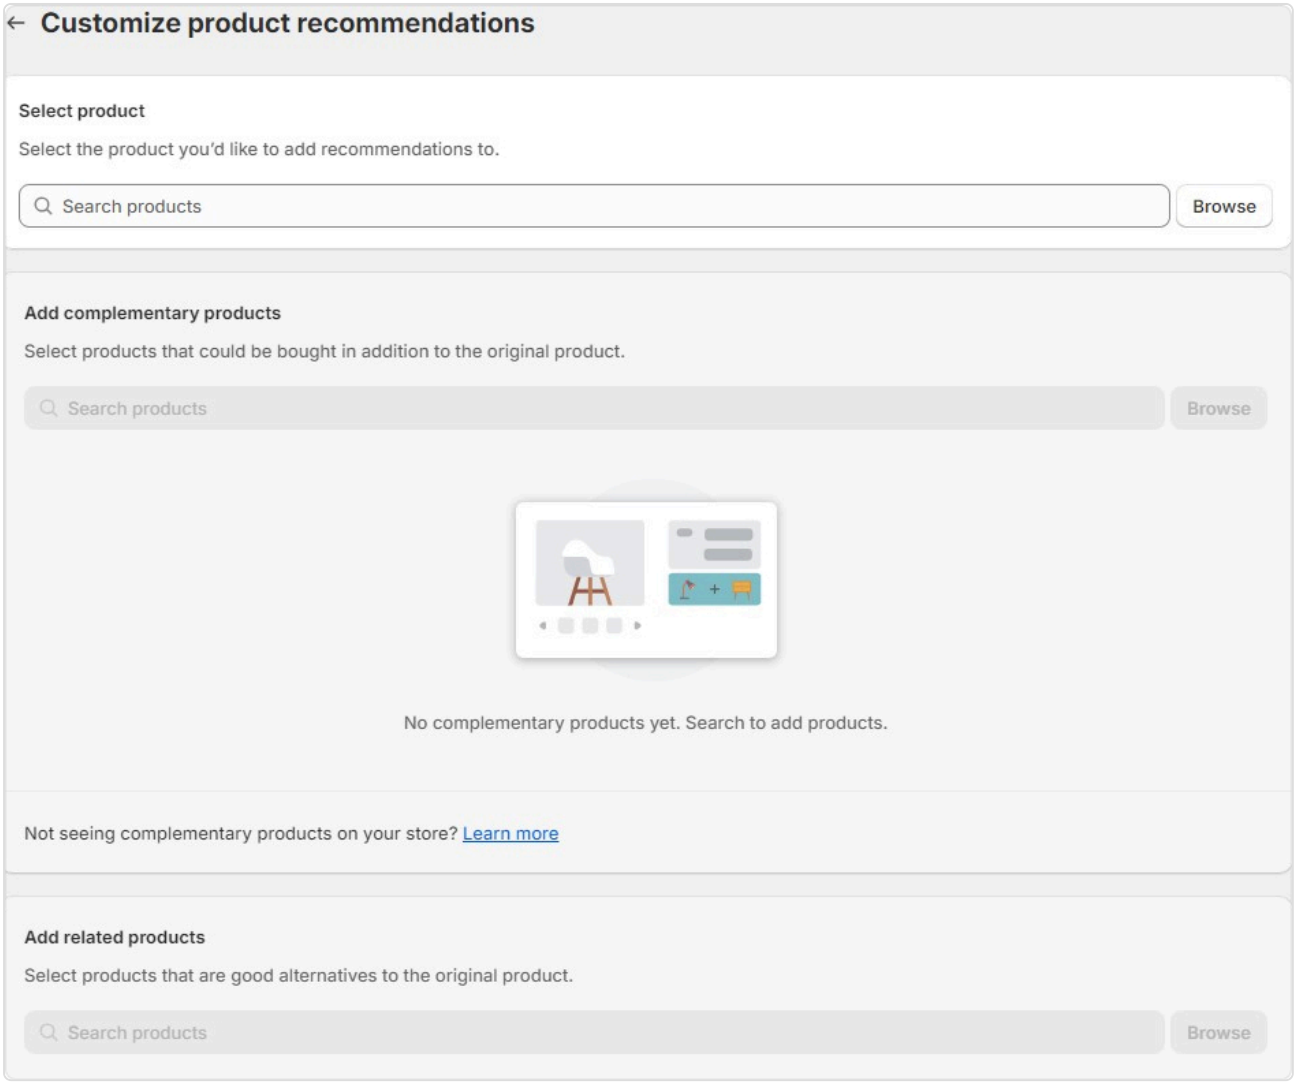
1. Install Search & Discovery app by Shopify
2. From your Shopify admin, open **Search & Discovery** app then click **Recommendations**
3. Select the product that needs additional product recommendation
4. Click **Add recommendations**
5. Select the products you want to display complementary products
6. Product recommendations will be displayed in the **PRODUCT RECOMMENDATIONS** section :::

📝 **Note**

> Products that want to display complementary products need to have quantity available



## Select a product that you want to customize product recommendations for.



## Select up to 10 Related products to recommend.

Set the product to display only the custom recommendations or to display both custom recommendations and automatically generated recommendations.

# Google map

Used in block pickup availability. Each location can be assigned a google map link

## Step 1

Go to **Custom data** in the store's settings and select **Locations**

![google map](https://docs.engotheme.com/img/product-settings/ggmap.jpg)

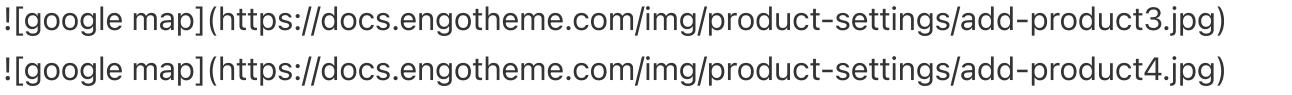
## Step 2

Add defination

![google map](https://docs.engotheme.com/img/product-settings/ggmap1.jpg)

## Step 3

- Fill in the information here, you can choose text type or url (you should choose url)



## Step 4

Go back to the store settings, select **Locations**, select each store you want to edit

- Scroll down to the bottom and enter the google map link

# Product title

**Product title:** product name

## Step

:::tip[] Add Brand Image

- From Themes ==> **Customize**, go to the Product Page of your specified product.
- In the Product Information section, select "**Add Block**".
- Choose "**Product title**".
- Title that you previously added will now be displayed automatically on the product page.
  :::

- Font size is adjustable
- Section padding allows you to specify the space between the slideshow and the preceding or following sections, or both.

# Policies

Used in blocks such as shipping & returns, terms of service, contact information

## Settings store

At the store's settings, select **Policies**

- Enter the content you want to display

# Price

:::tip[steps] From Themes ==> Customize, go to the Product Page of your specified product.

1. In the Product Information section, select "Add Block".
2. Choose "Price".

3. Price that you previously added will now be displayed automatically on the product page. :::

## Settings price

![vendor](https://docs.engotheme.com/img/product-information/price.jpg)

- To enable **showing saving amount** along with the price, you can do so in the section settings under the "**Price**" subsection.
- Section padding allows you to specify the space between the slideshow and the preceding or following sections, or both.

# Countdown timer

A countdown clock for promotion/new collection release can bring excitement to customers that have been waiting for the event.

:::tip[steps] From Themes ==> Customize, go to the Product Page of your specified product.

1. In the Product Information section, select "Add Block".
2. Choose "Countdown time". :::

## Settings countdown timer

- Add **Title** and the end **Time** of the event.
- Section padding allows you to specify the space between the slideshow and the preceding or following sections, or both.

![vendor](https://docs.engotheme.com/img/product-information/countdown-timer.jpg)

# Variants

Display the product variants in different form on both Quickview modal and product page

:::tip[steps] From Themes ==> Customize, go to the Product Page of your specified product.

1. In the Product Information section, select “Add Block”.
2. Choose “**Variants**”.
3. Size and color that you previously added will now be displayed automatically on the product page. :::

## Colors palette

Choose the suitable **HEX color** codes and add them to the provided box.

![vendor](https://docs.engotheme.com/img/product-information/variants.jpg)

# Short description

:::tip[steps] From Themes ==> Customize, go to the Product Page of your specified product.

1. In the Product Information section, select “Add Block”.
2. Choose “**Short description**”. :::

## Settings

- Section padding allows you to specify the space between the slideshow and the preceding or following sections, or both.

![vendor](https://docs.engotheme.com/img/product-information/shortdes.jpg)

# Visitor counter

:::note[note] This is a **fake feature** that helps store owners boost sales! :::

:::tip[steps] From Themes ==> Customize, go to the Product Page of your specified product.

1. In the Product Information section, select “Add Block”.

## Settings visitor counter

![visitor counter](https://docs.engotheme.com/img/product-information/visitors-counter.jpg)

- **Visitor count text:** You can add the content that you wanna show on the Live view message here.
- **Visitor count range max/min:** Configure the number of the minimum/ maximum visitor in the real-time of the Live view option here.
- **Change count number every:** You can configure the time (seconds) that the number of visitors will change here.
- Section padding allows you to specify the space between the slideshow and the preceding or following sections, or both.

# Special offer

- **Special offer** may include perks such as discounts, complimentary gifts, free shipping, or other incentives aimed at enticing buyers. Special offers can also serve to create excitement and generate curiosity about the product or service, especially in the face of strong competition from rivals.

:::tip[steps] From Themes ==> Customize, go to the Product Page of your specified product.

1. In the Product Information section, select “Add Block”.
2. Choose “**Special offer**”. :::

## Settings special offer

![visitor counter](https://docs.engotheme.com/img/product-information/special.jpg)

- **Title:** You can add the content that you wanna show on the Special offer message here
- **Content 1/2/3:** You can add the content about special offer
- **Text color:** Change text colors to match the website
- Section padding allows you to specify the space between the slideshow and the preceding or following sections, or both.

# Countdown stock

**Stock countdown**: Display remaining stock on the product page by syncing the inventory.

:::tip[steps] From Themes ==> Customize, go to the Product Page of your specified product.

1. In the Product Information section, select “Add Block”.
2. Choose “**Countdown stock**”. :::

## Settings countdown stock

![Countdown stock](https://docs.engotheme.com/img/product-information/cowndownt-stock.jpg)

- Section padding allows you to specify the space between the slideshow and the preceding or following sections, or both.

# Size guide

:::tip[steps] From Themes ==> Customize, go to the Product Page of your specified product.

1. In the Product Information section, select “Add Block”.
2. Choose “**Size guide**”. :::

![size guide](https://docs.engotheme.com/img/product-information/size-guide.jpg)

## Size guide

Helps customers determine the appropriate size to order, reducing the likelihood of returns due to incorrect sizing. Providing a size guide enhances the shopping experience for customers by enabling them to make more informed purchasing decisions, leading to greater satisfaction and potentially fewer product returns.

![size guide](https://docs.engotheme.com/img/product-information/size-guide1.jpg)

- You can choose size guide type: Page, Image, Content

- Create a new **page** with demo content

1. Go to **Pages**
2. Click to **Add page** and create cms pages as below:

3. Create new page:

- **Title**: Size Guide
- **Visibility**: Visible
- **Theme template**: Default page
- Click to block code icon to change to Show HTML: You need to change to Show HTML before copy template so that the content will be shown like our demo store
- Copy sample template below and paste to Content

```

## Compare color

Allow customers to compare different colors of the product before they decide to make a purchase. This enhances the online shopping experience and increases the likelihood that they will choose the desired color of the product.

## Ask a question

Allows customers to send questions to the store. Enhance your online shopping experience

## Social share

Allow users to share information about that product on social media platforms such as Facebook, Twitter, Instagram, and others. This can create a positive word-of-mouth effect and help increase sales.

# Buy button

:::tip[steps] From Themes ==> Customize, go to the Product Page of your specified product.

1. In the Product Information section, select “Add Block”.
2. Choose “**Buy button**”. :::

## Settings buy button

- You can enable/ disable the “**Show dynamic checkout button/ Show gift card recipient form/ Show checkbox agree with term & conditions**”.

![buy button](https://docs.engotheme.com/img/product-information/buy-button.jpg)

> 📝 **Note**
>
> Show gift card recipient form only for gift card product

![buy button](https://docs.engotheme.com/img/product-information/buy-button1.jpg)

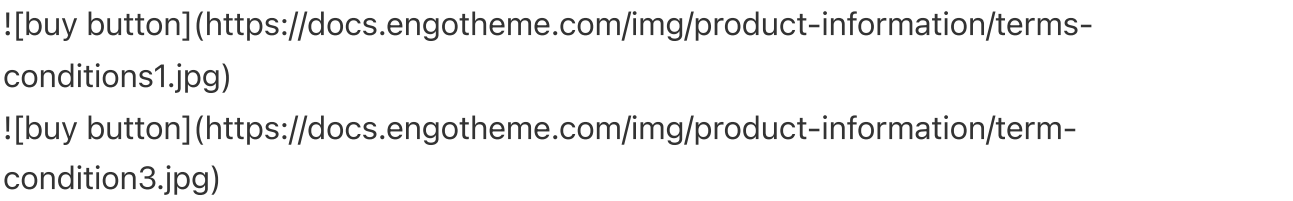
## Term & conditions

![buy button](https://docs.engotheme.com/img/product-information/terms-conditions.jpg)

**Create term and conditions**

1. Go to store settings
2. Choose **Policies** and add the content that you wanna show on the **Term & conditions**

3. Click to block code icon to change status into Show HTML
   You need to change to Show HTML before copy template so that the content will be shown like our demo store
4. Copy sample template below and paste to Content



```

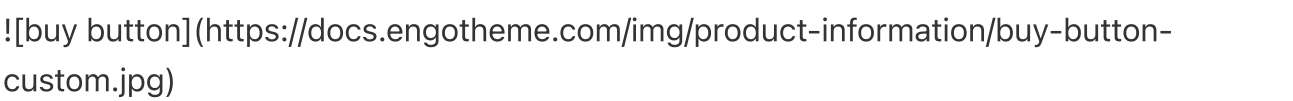
- Section padding allows you to specify the space between the slideshow and the preceding or following sections, or both.

# Buy button custom

:::tip[steps] From Themes ==> Customize, go to the Product Page of your specified product.

1. In the Product Information section, select “Add Block”.
2. Choose “**Buy button custom**”. :::



# Trust badge

**Trust badge:** Updating the Trust Badge helps create customer trust regarding products.

:::tip[steps] From Themes ==> Customize, go to the Product Page of your specified product.

1. In the Product Information section, select “Add Block”.
2. Choose “**Trust badge**”. :::

## Settings Trust badge

![Trust badge](https://docs.engotheme.com/img/product-information/trust-badge.jpg)

- **Heading:** This option allows you to enter text for Trust Badge.
- **Heading position:** We have 2 modes: Text above image and Text below image
- **Trust badges image:** You can upload a custom image for the Trust Badge here.
- **Image width:** Configure the size for the Trust Badge image here.
- Section padding allows you to specify the space between the slideshow and the preceding or following sections, or both.

# Pickup availability

**Pickup availability:** When customers are close to your business, you can offer unique, local methods for them to receive their products. This can speed up your fulfillment time and create a better experience for your customers. Set up pickup and local delivery

:::tip[steps] From Themes ==> Customize, go to the Product Page of your specified product.

1. In the Product Information section, select “Add Block”.
2. Choose “**Pickup availability**”. :::

# Set up local pickup option

Steps:

1. From your **Shopify Admin**, go to **Settings > Shipping and Delivery.**
2. In **Local pickup**, click **Manage** beside the location you want to enable local pickup. Click **Show more** if you have several locations. You must have a location set up already before you can select it, see Locations to set up multiple locations.
3. Under **Location status**, select **This location offers local pickup.**
4. Under **Information at checkout**, change the settings to meet your needs.
5. Under **Order ready for pickup notification**, enter pickup instructions for customers (Optional).
6. **Save** the settings.

# Show pickup availability to your customers

**Your theme** lets you show customers whether a product is available for local pickup. On each product page, a pickup availability section shows whether the product is available,

and the estimated time frame for pickup. This information appears only for products that are stocked at at least one pickup location and have **This is a physical product** selected in the **Shipping** section of a product variant's details.

Steps:

1. From your Shopify Admin, go to **Products**.
2. Select a product.
3. Under **Variants**, select a variant.
4. Under **Shipping**, check **This is a physical product**.
5. Under **Inventory**, select locations that stock the selected variants.
6. **Save** the settings. If you have local pickup enabled for only one location, then the location and pickup availability is displayed for that location. Customers can click **View store information** to learn more about the pickup location. If you have local pickup enabled for more than one location, then the pickup availability section displays the location and pickup availability for one of your stores. Customers can click **Check availability at other stores** to check the product's availability at all of your locations that have pickup enabled.

# Shipping Information

:::tip[steps] From Themes ==> Customize, go to the Product Page of your specified product.

1. In the Product Information section, select "Add Block".
2. Choose "**Shipping Information**". :::

## Settings shipping information

![Shipping information](https://docs.engotheme.com/img/product-information/shipping-inf.jpg)

- Enable/disable showing delivery estimation and Delivery text. Add info regarding the delivery, shipping text, and the number of days that the package will arrive.
- Enable/disable Show return estimation and Return text. Add info regarding the return.

# Complementary products

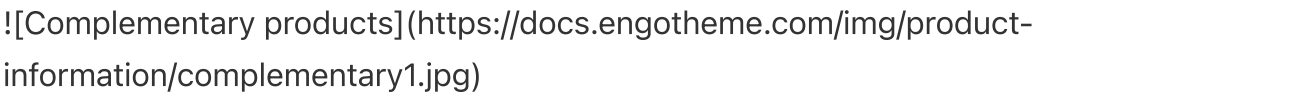
**Complementary products**: This is a way to increase additional sales opportunities and enhance the shopping experience for customers by providing information about related products or services they may want to purchase along with the main product.

:::tip[steps:]

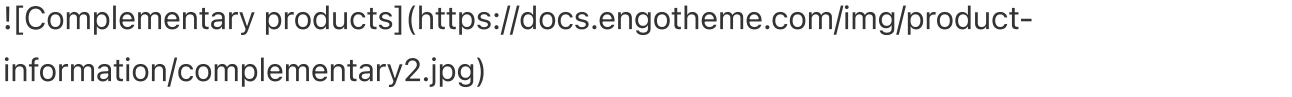
1. Install Search & Discovery app by Shopify
2. From your Shopify admin, open **Search & Discovery** app then click **Recommendations**
3. Select the product that needs additional product recommendation
4. Click **Add recommendations**
5. Select the products you want to display complementary products
6. Product complementary will be displayed in the **COMPLEMENTARY PRODUCTS** section :::

> **Note**
>
> Products that want to display complementary products need to have quantity available

## 1. Select the product you'd like to add recommendations to.



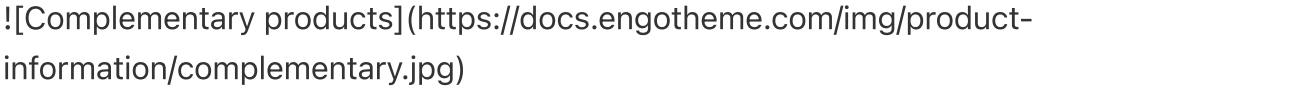
## 2. Select products that could be bought in addition to the original product.



- Select up to 10 Related products to recommend. Set the product to display only the custom complementary or to display both custom complementary and automatically generated complementary.

:::tip[steps] From Themes ==> Customize, go to the Product Page of your specified product.

1. In the Product Information section, select "Add Block".
2. Choose "**Complementary products**". :::



# Text block

:::tip[steps] From Themes ==> Customize, go to the Product Page of your specified product.

1. In the Product Information section, select "Add Block".
2. Choose "**Text block**". :::

## Add product description information field

# Richtext

:::tip[steps] From Themes ==> Customize, go to the Product Page of your specified product.

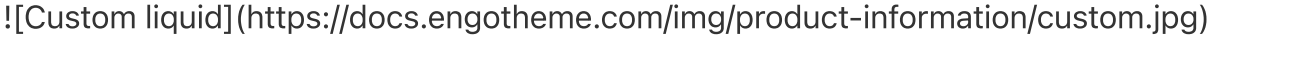
1. In the Product Information section, select “Add Block”.
2. Choose “**Richtext**”. :::

## Add product description information field

# Custom liquid

:::tip[steps] From Themes ==> Customize, go to the Product Page of your specified product.

1. In the Product Information section, select “Add Block”.
2. Choose “**Custom liquid**”. :::



## Add product description information field

# Description

:::tip[steps] From Themes ==> Customize, go to the Product Page of your specified product.

1. In the Product Information section, select “Add Block”.
2. Choose “**Description**”. :::

### Add product description information field

# Shipping & return

:::tip[steps] From Themes ==> Customize, go to the Product Page of your specified product.

1. In the Product Information section, select “Add Block”.
2. Choose “**Shipping & return**”. :::

### Add product description information field

# Image

## Flexible in adding an image and a suitable heading. Add an image link to lead customers to your desired pages when clicking the image.

:::tip[steps] From Themes ==> Customize, go to the Product Page of your specified product.

1. In the Product Information section, select “Add Block”.
2. Choose “**Image**”. :::

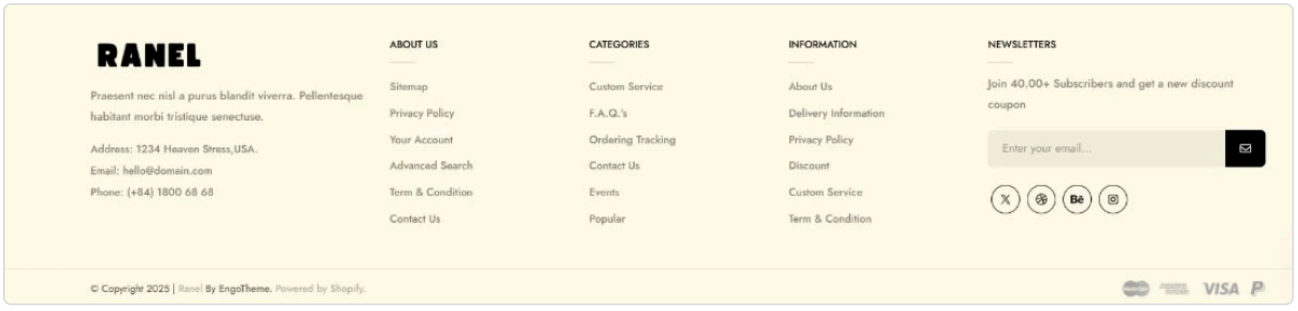
# Global settings

# Footer v1

Appears and features information at the bottom of the page

The footer is the section of content at the bottom of a web page. The footer menu typically contains quick links to your homepage, about us page, blogs page, contact page, policy page, etc.

A great website footer will help your visitors navigate your site and will lead to a greater ecommerce experience.



:::tip[steps]

1. In the theme editor (**Customize**), click **Theme settings**
2. Locate **Footer**
3. Make necessary changes
4. **Save** :::

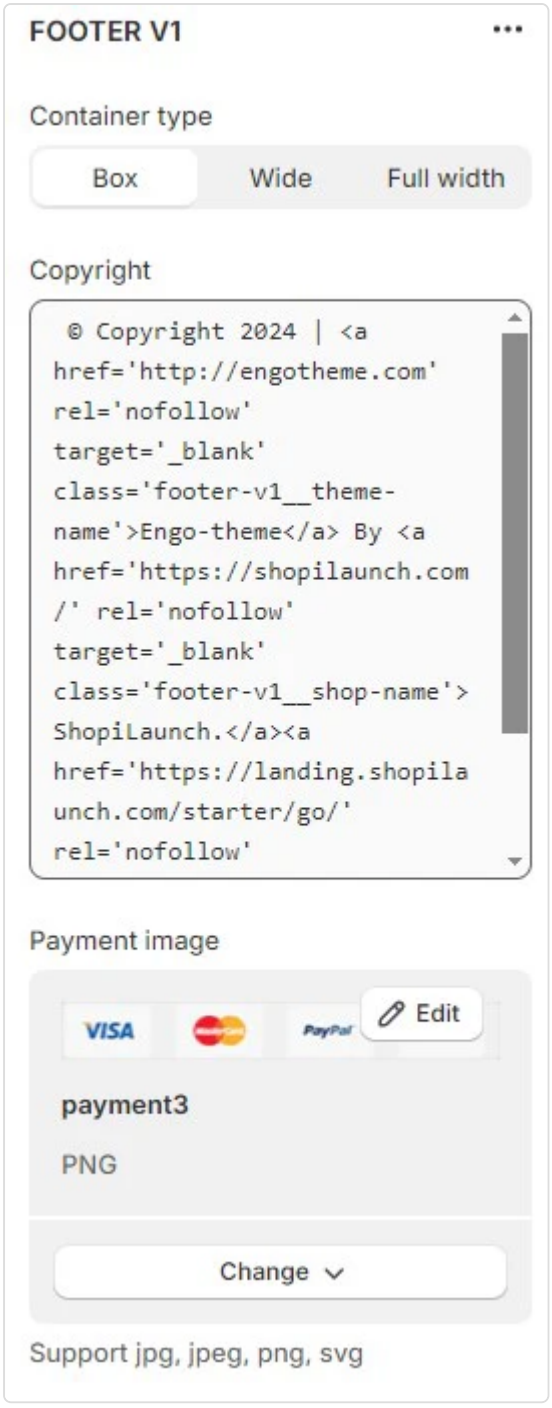
# Footer settings

Providing various purchasing methods makes checkout easier for your customers and enhances your brand perception.

:::important For **copyright**, you need to enter the correct code below. If there are any changes, only change the text Engo-theme, ShopiLaunch, Powered by Shopify. :::

```
© Copyright {{ 'now' | date: '%Y' }} | <a href="http://engotheme.com" re
```

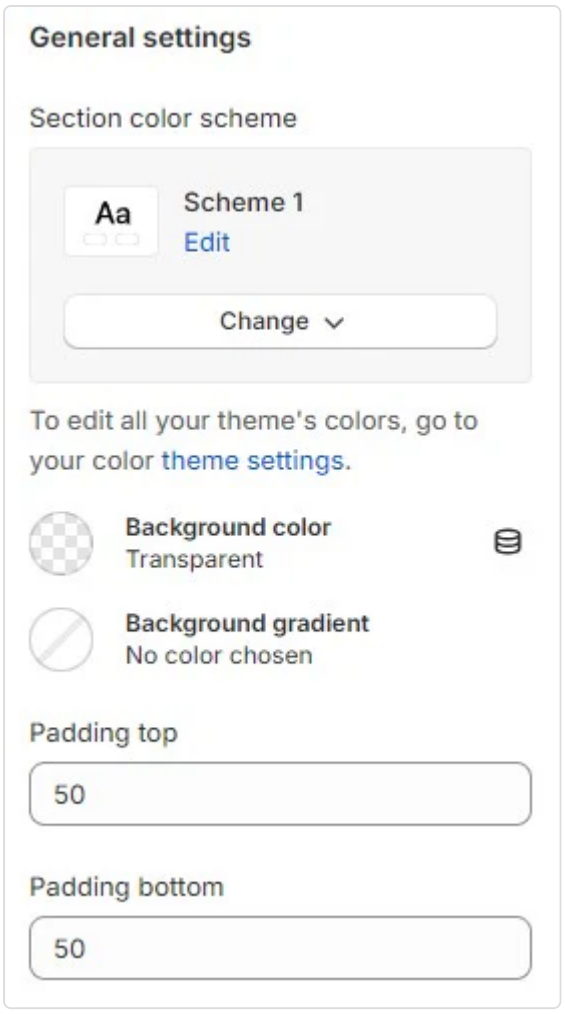
**Container type**: You can choose among Box, Wide, Fullwidth for the collection layout.



**General settings:**

**Color schema**: Set text color and background color with preset scheme

Section padding allows you to specify the space between the testimonials and the preceding or following sections, or both.

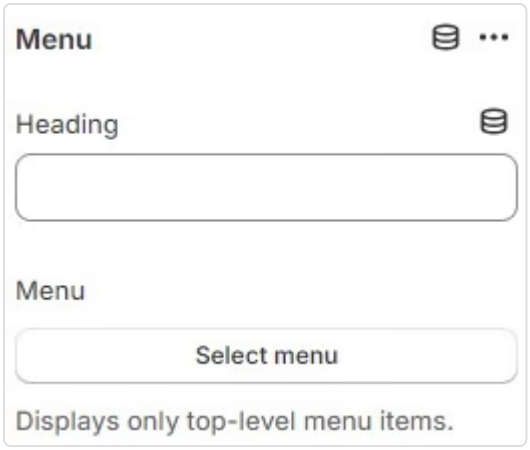


# Block settings

Add suitable blocks to your store footer as per your requirements.

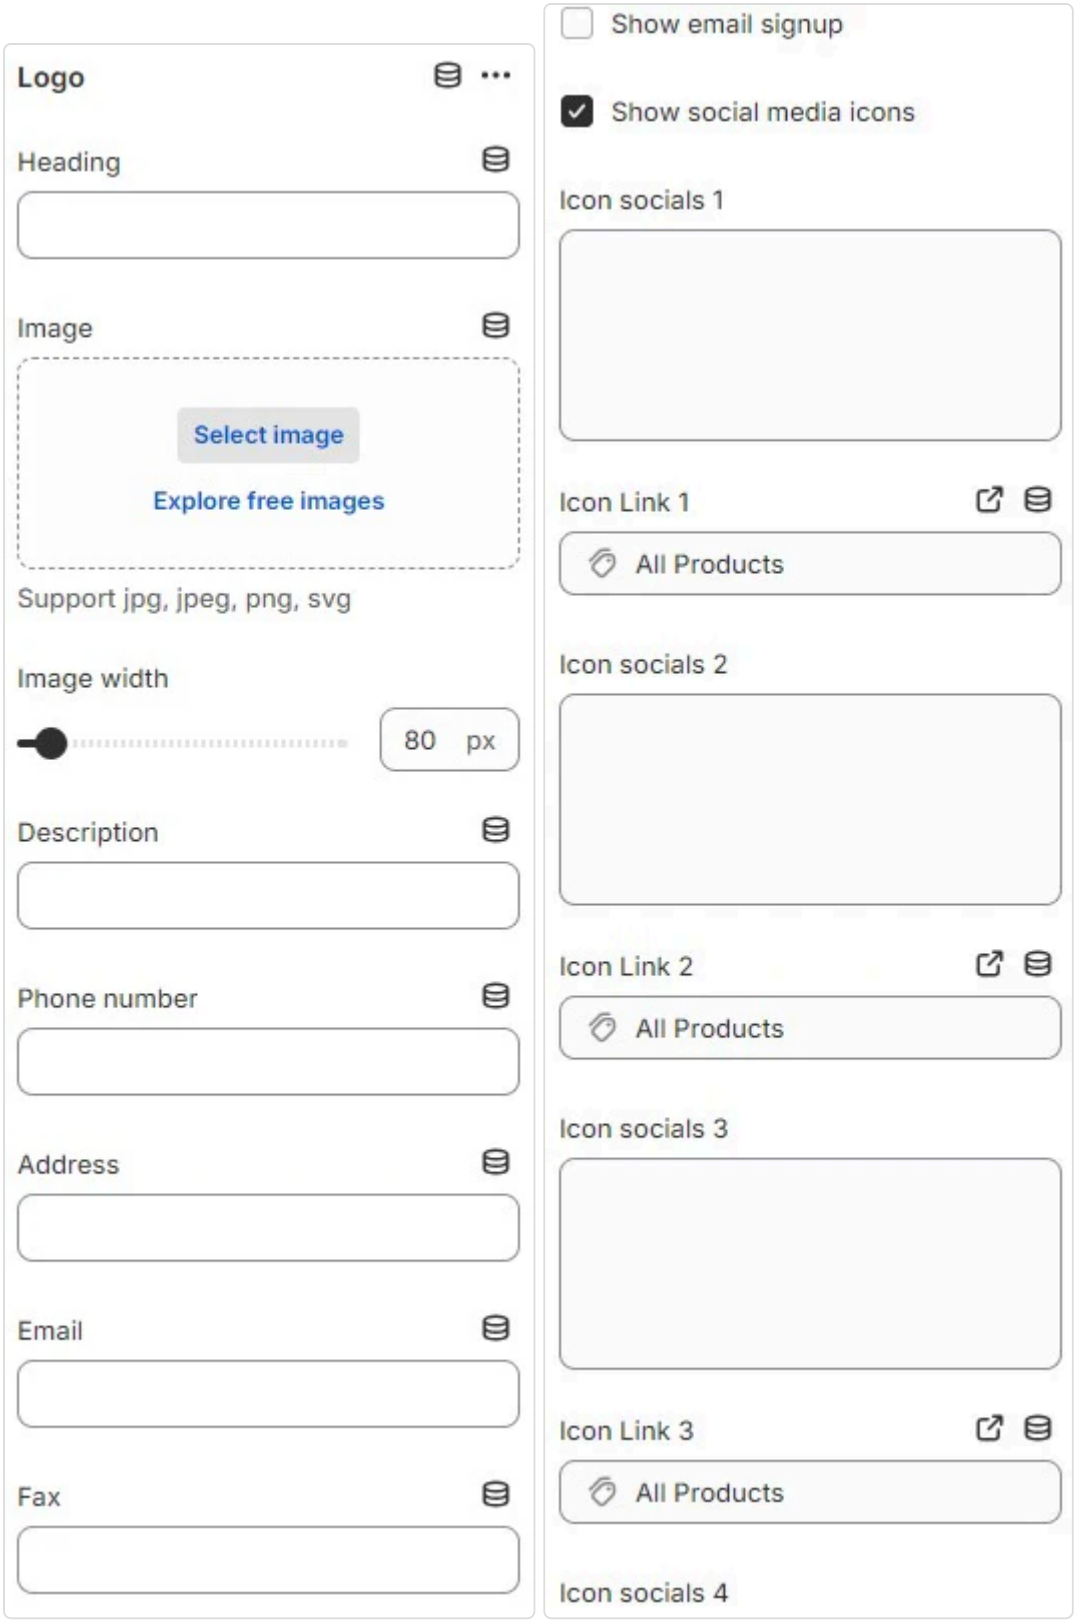
**1. Menu**

Display the existing menu you created in Shopify admin > Navigation. To create menu.



### 2. Logo

Use this block to display your store contact: store email address, phone number, and social icons.



### 3. Text

Use the newsletter signup form to collect your customers' email addresses for email marketing campaign purposes. Change the title, description, email placeholder, and form

style if you wish to.

# Header v1

Edit header for your store

The header is a content block at the upper part of your website that appears on every page. It usually contains the logo of a store, the main navigation menu, and other elements such as a search bar, shopping cart icon, etc.

The header plays a vital role in branding your site, helping visitors navigate, and displaying your most important pages.

You can freely customize your header to suit your business needs by adding your logo image, choosing the main menu, and other addons using your theme.

# Header settings

- You can control how the transparent background is displayed by checking/unchecking the checkboxes.
- Add a logo in the header to grab visitors' attention and set the tone for your brand. The recommended image size and format is 120x30px .png with a transparent background.

**Tip**

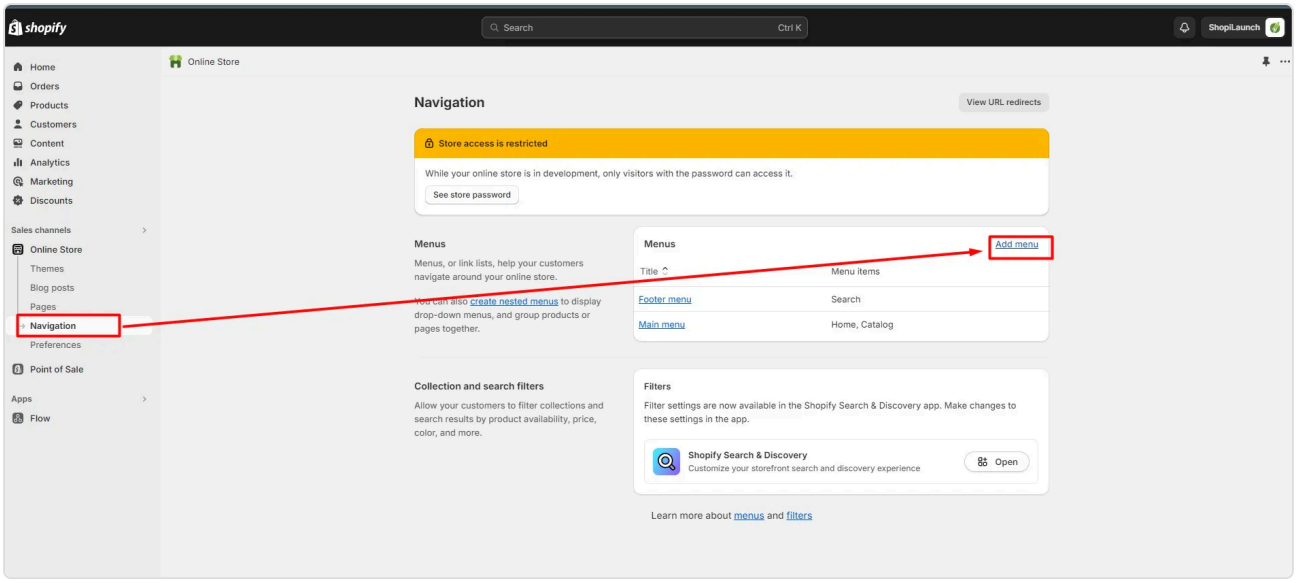
1. In the theme editor **(Customize)**, click **Header**
2. Select image under **Logo image**
3. **Save**

- Resize the logo image by increasing or decreasing the width on desktop/mobile.

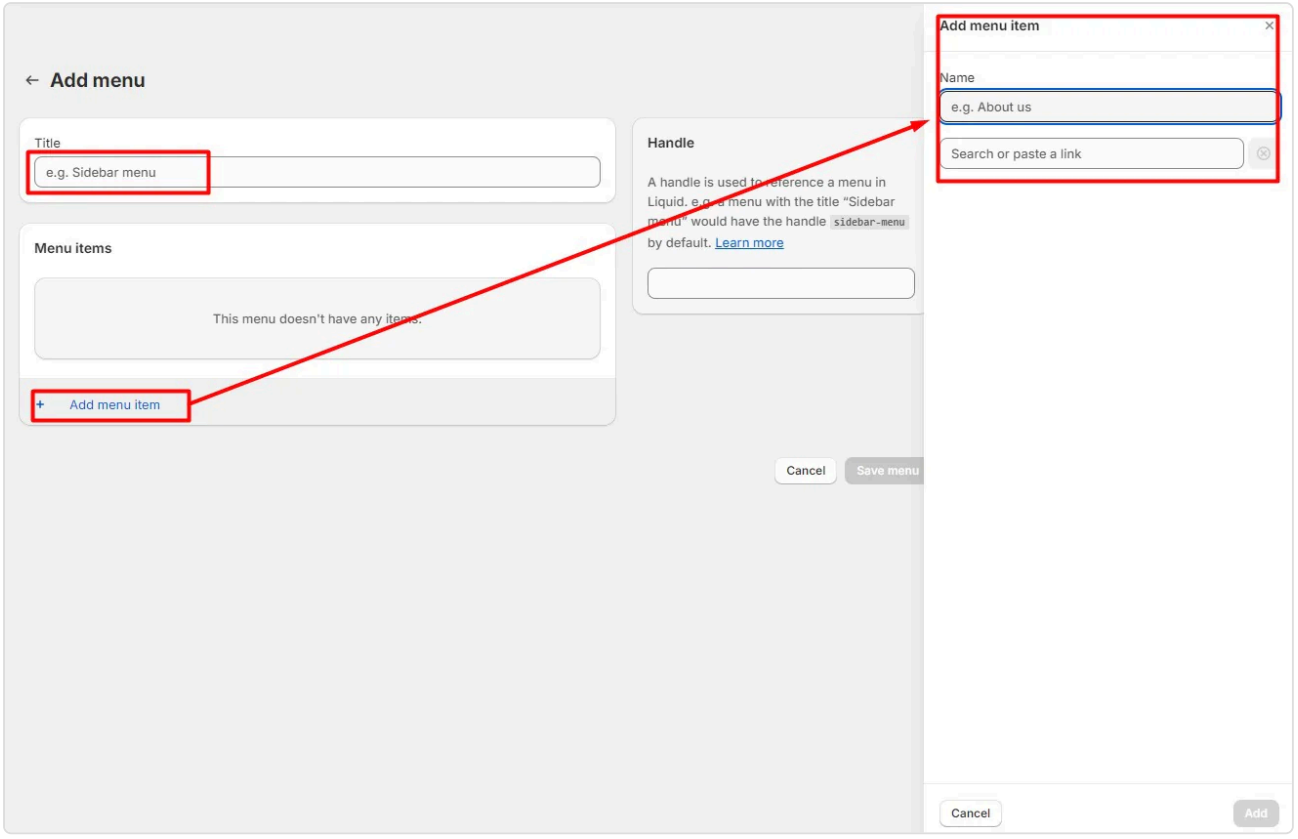
!\[header main\](https://cdn.shopify.com/s/files/1/0821/2375/1728/files/header-settings.jpg?v=1711610366)

**Create navigation:** In the **Online Store**, click **Navigation**

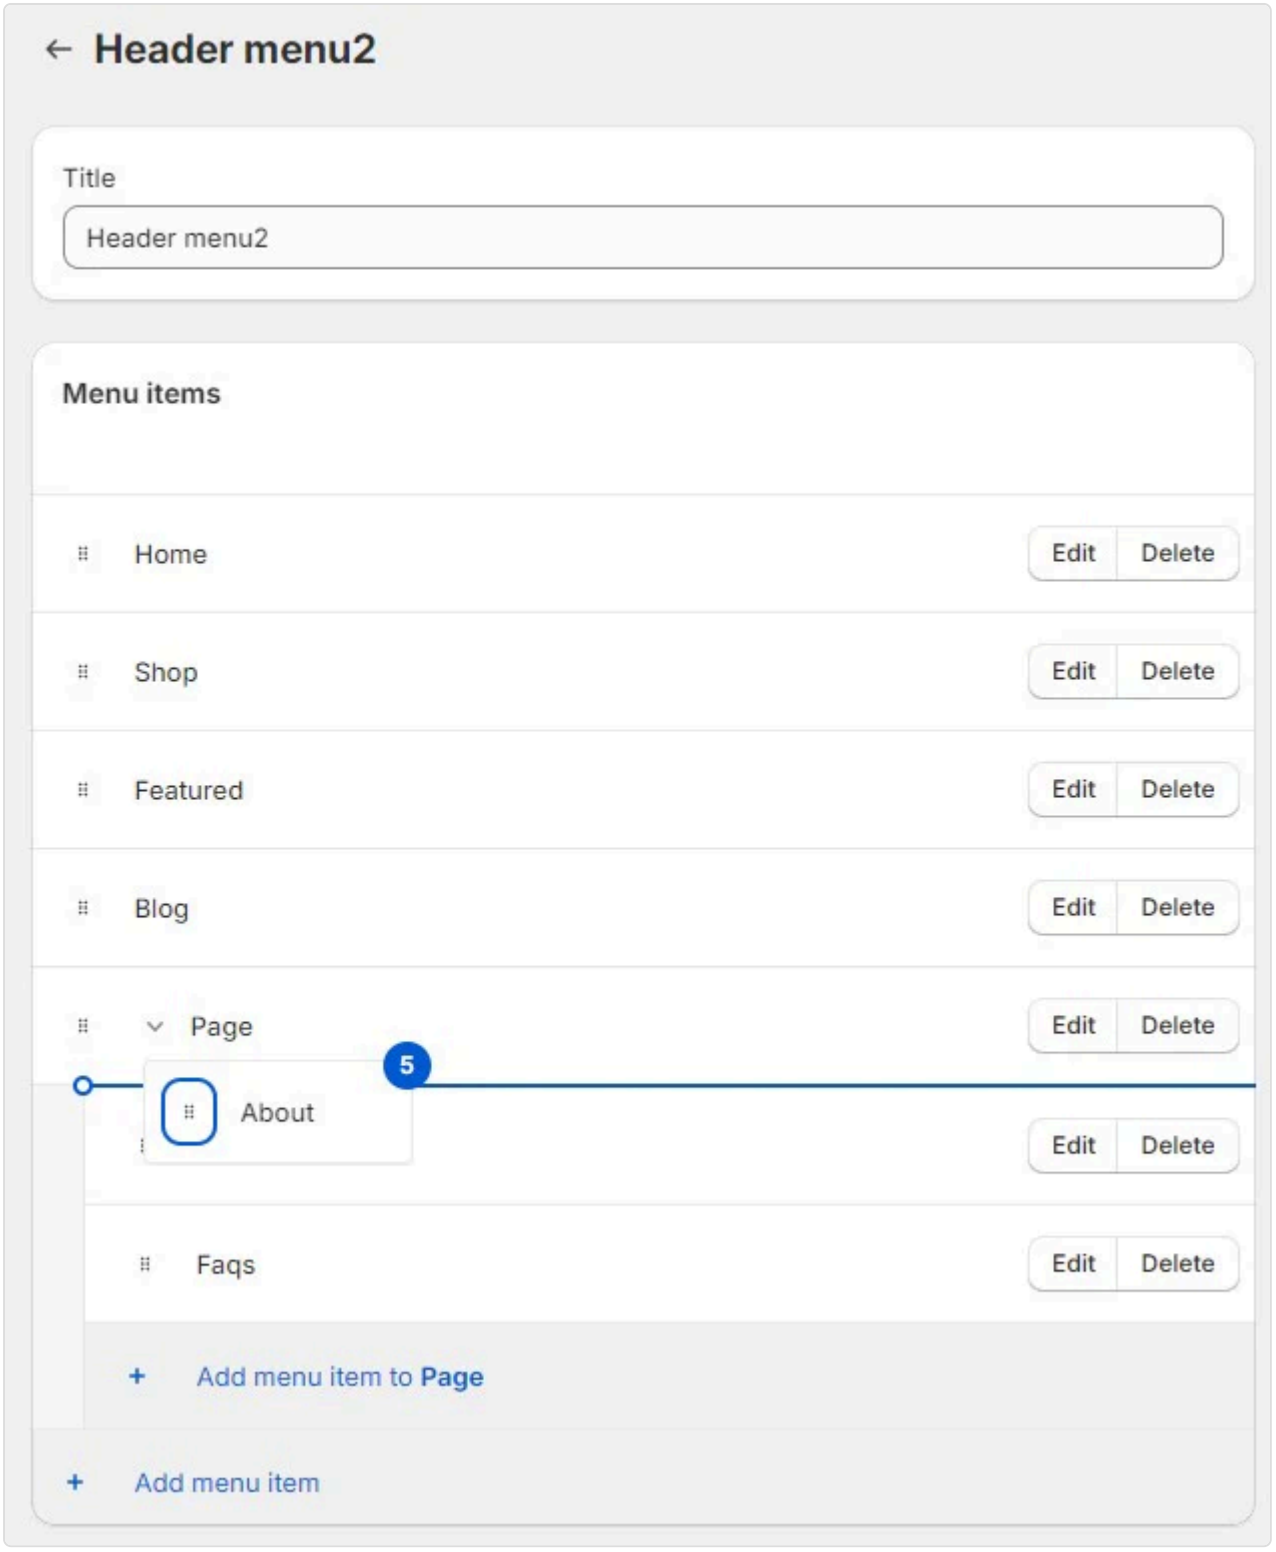
Go to Navigation to create a menu. Click Add menu to add new or choose any items below the menu to edit.



Write the menu's name, then choose Add menu item. Write the menu item's name and choose the item in the dropdown box > click Add.



To make an item to a child menu, drag it under the main item. Menu items can also be added to create the same level as a child menu. Save



In the theme editor **(Customize)**, click **Header**
Go to **Menu**, select menu created

- **Menu:** Select the created navigation menu.
- **Menu type:** You can choose the default landscape menu or the hamburger menu.

- **Hamburger menu:** If you select hamburger menu, you will have 3 options for displaying the hamburger menu.
- **Sticky header type:** Have 3 option: **Always, On scoll up and None**.
- **Event type:** When you hover over the menu, the mega menu will appear or you have to click.

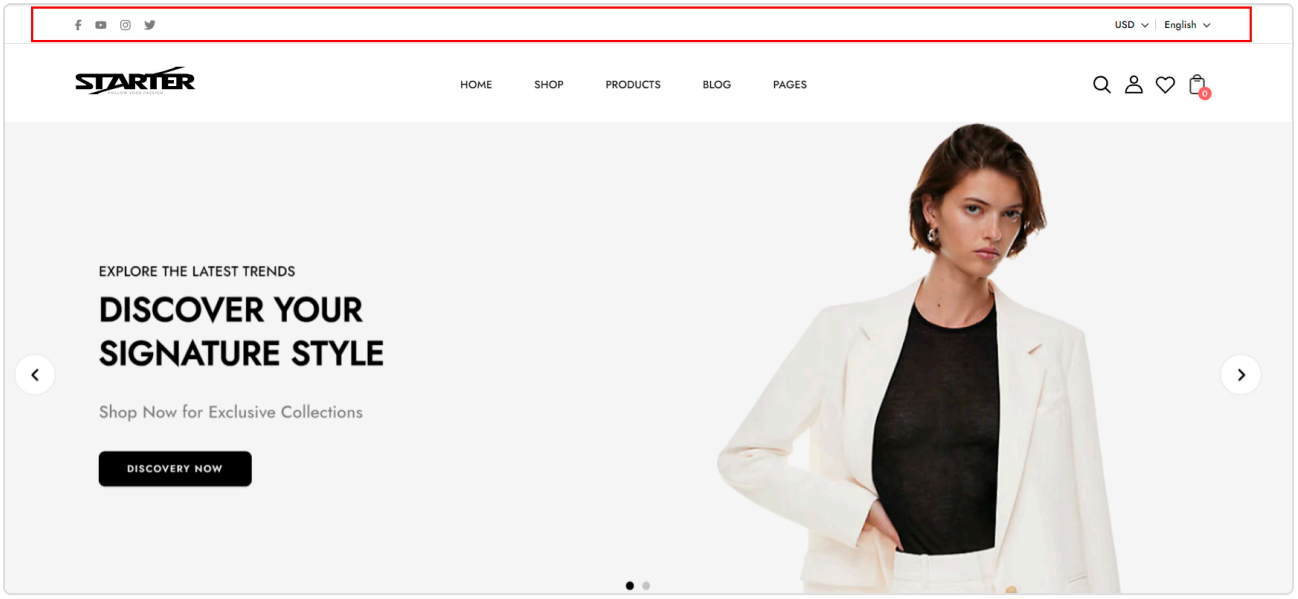
# General settings

**Color schema**: Set text color and background color with preset scheme
Section padding allows you to specify the space between the collection and the preceding or following sections, or both.

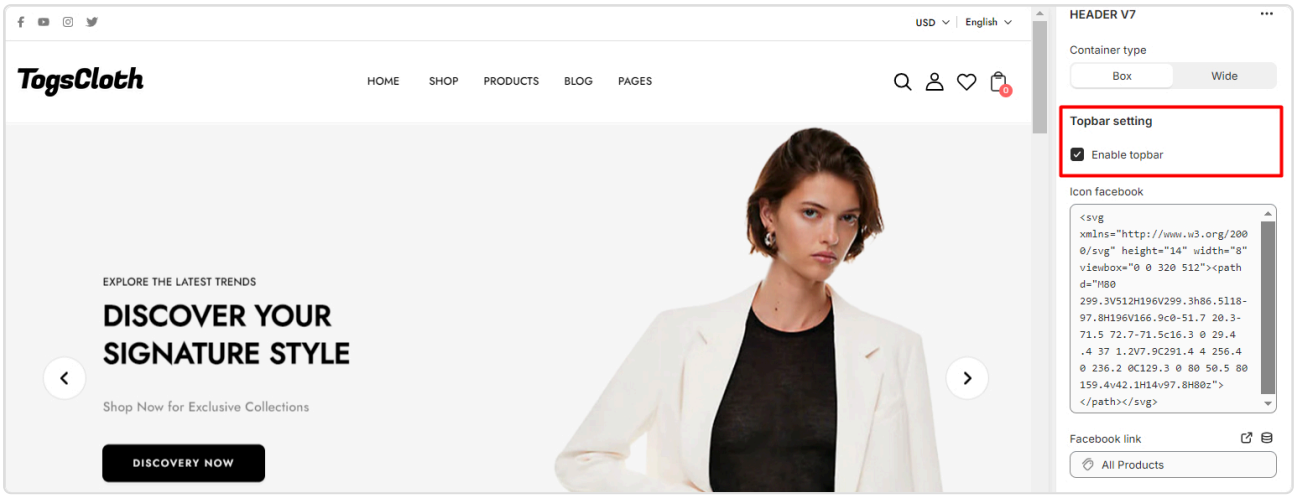
# Topbar

## Topbar settings

The top bar is a content block at the upper part of your website that appears on every page. It usually contains the language, country, and other elements such as a phone number, email, etc.



You can control how the bar displays by ticking/unticking the checkboxes.



Additionally, changing information about Phone number, Email address, ... can be done here.

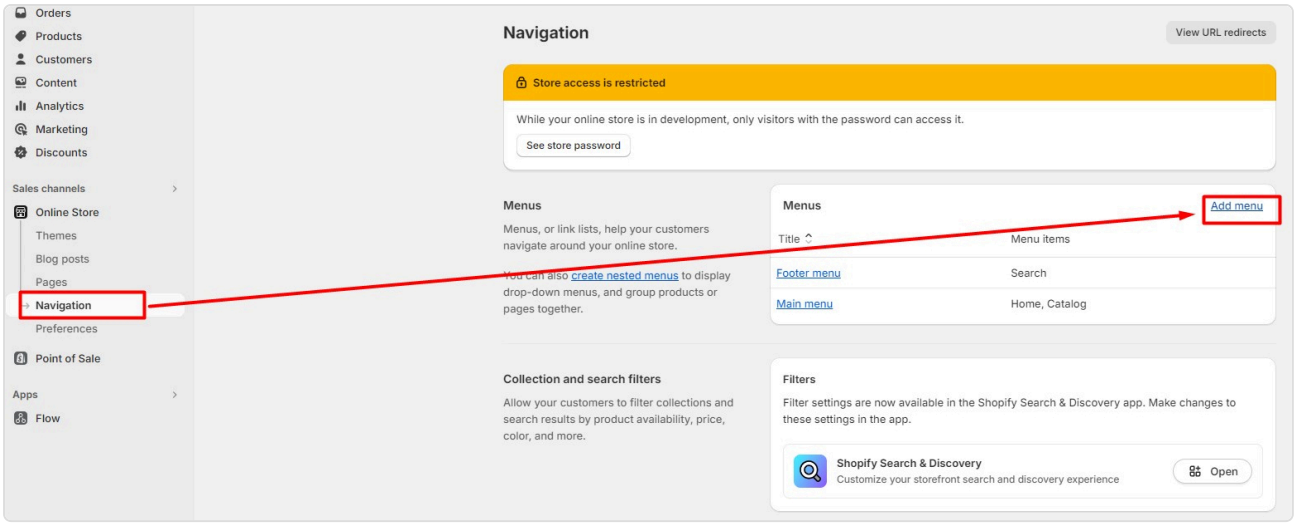
# Create header menu label

# Create Menu

Go to **Navigation** to create a menu. Click **Add menu** to add new or choose any items below the menu to edit.



Write the menu's name, then choose **Add menu item**. Write the menu item's name and choose the item in the dropdown box > click **Add**.

![header main](https://docs.engotheme.com/img/global-settings/header/header3.jpg)

:::important Where you want to put the label color, fill in `[text](color code)` :::

![header main](https://docs.engotheme.com/img/global-settings/header/header9.jpg)

To make an item to a child menu, drag it under the main item.
Menu items can also be added to create the same level as a child menu. **Save**

![header main](https://docs.engotheme.com/img/global-settings/header/header4.jpg)

# Header v4

Edit header for your store

The header is a content block at the upper part of your website that appears on every page. It usually contains the logo of a store, the main navigation menu, and other

elements such as a search bar, shopping cart icon, etc.

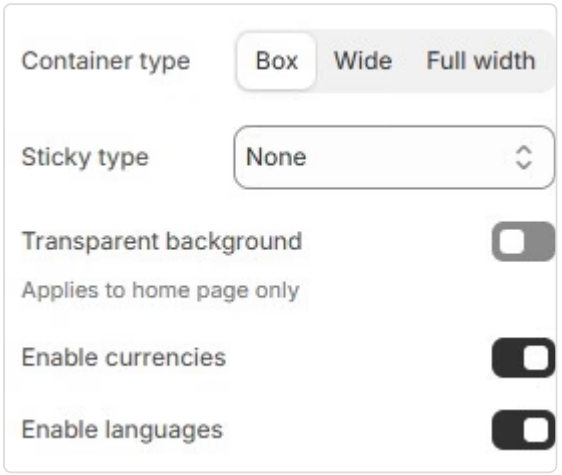
The header plays a vital role in branding your site, helping visitors navigate, and displaying your most important pages.

You can freely customize your header to suit your business needs by adding your logo image, choosing the main menu, and other addons using your theme.

# Header settings

## 1. Layout settings

- The header is a content block at the upper part of your website that appears on every page. It usually contains the language, country, etc.
- **Container type:** Specifies the width of the header content
- **Sticky header type:** Have 3 option: **Always, On scoll up and None**.
- You can control how the transparent background is displayed by checking/unchecking the checkboxes.

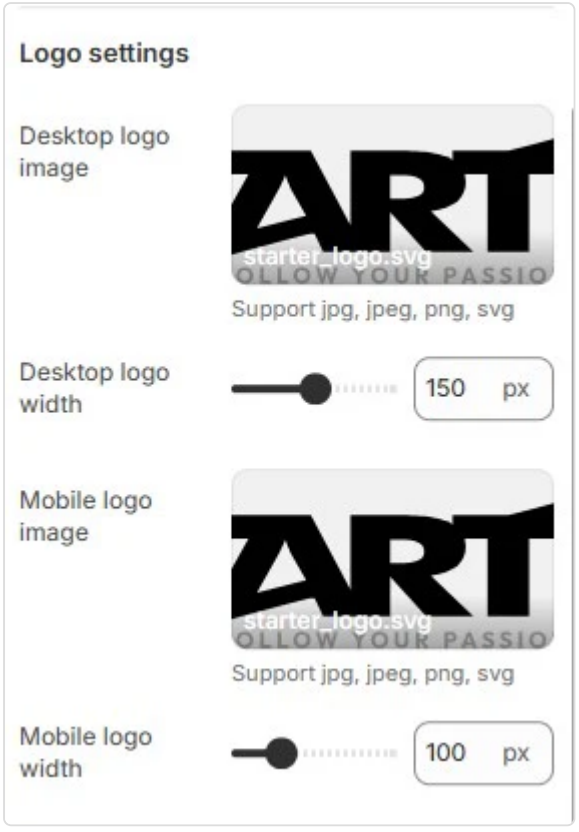


## 2. Logo settings

- Add a logo in the header to grab visitors' attention and set the tone for your brand. The recommended image size and format is 120x30px .png with a transparent background.

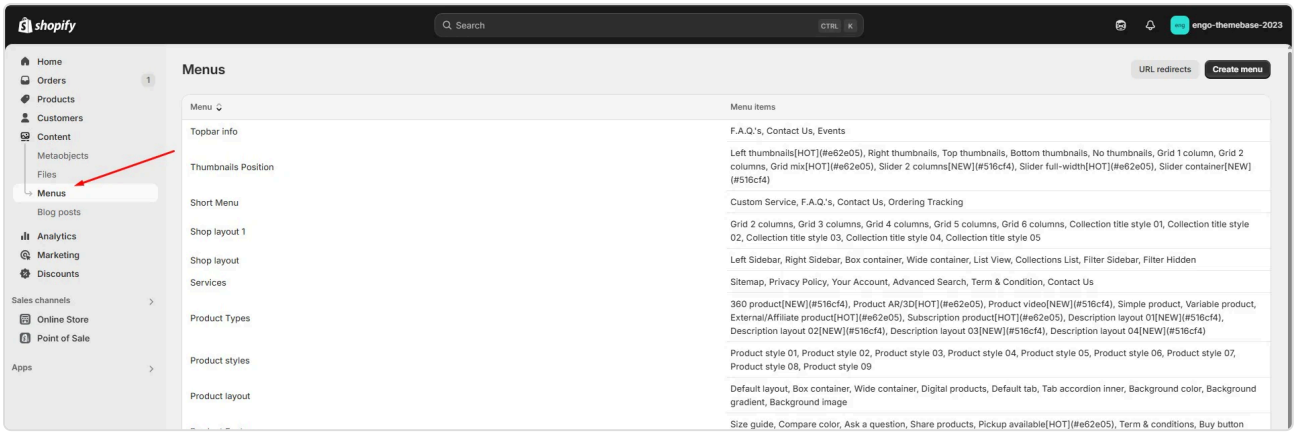
> **Tip**
>
> 1. In the theme editor **(Customize)**, click **Header**
> 2. Select image under **Logo image**
> 3. **Save**

- Resize the logo image by increasing or decreasing the width on desktop/mobile.

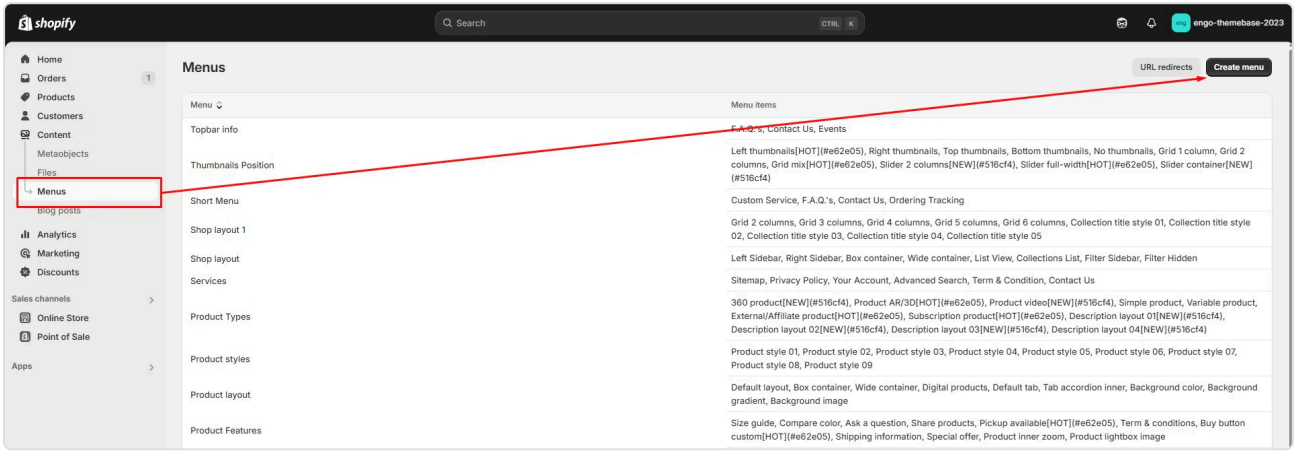


## 3. Menu Settings

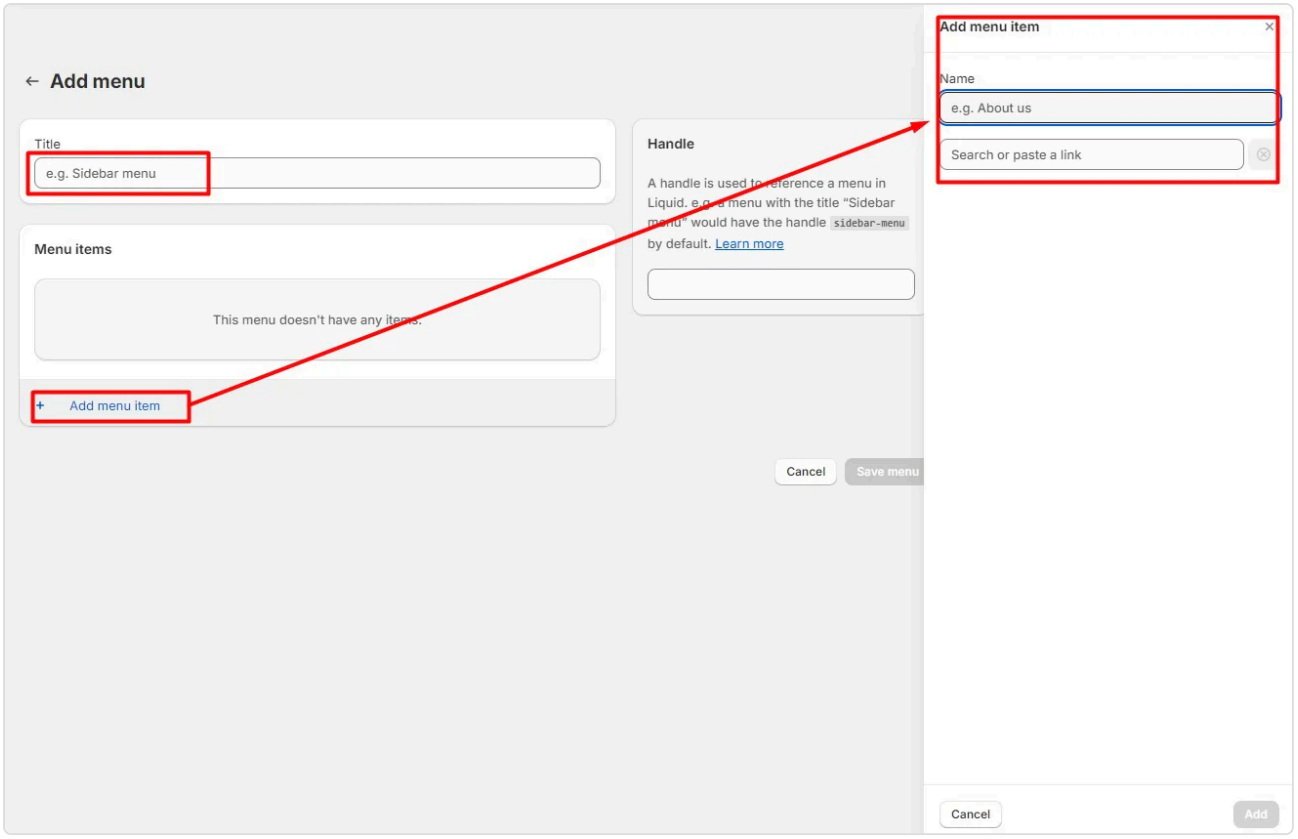
In the **Store**, click **Menu**



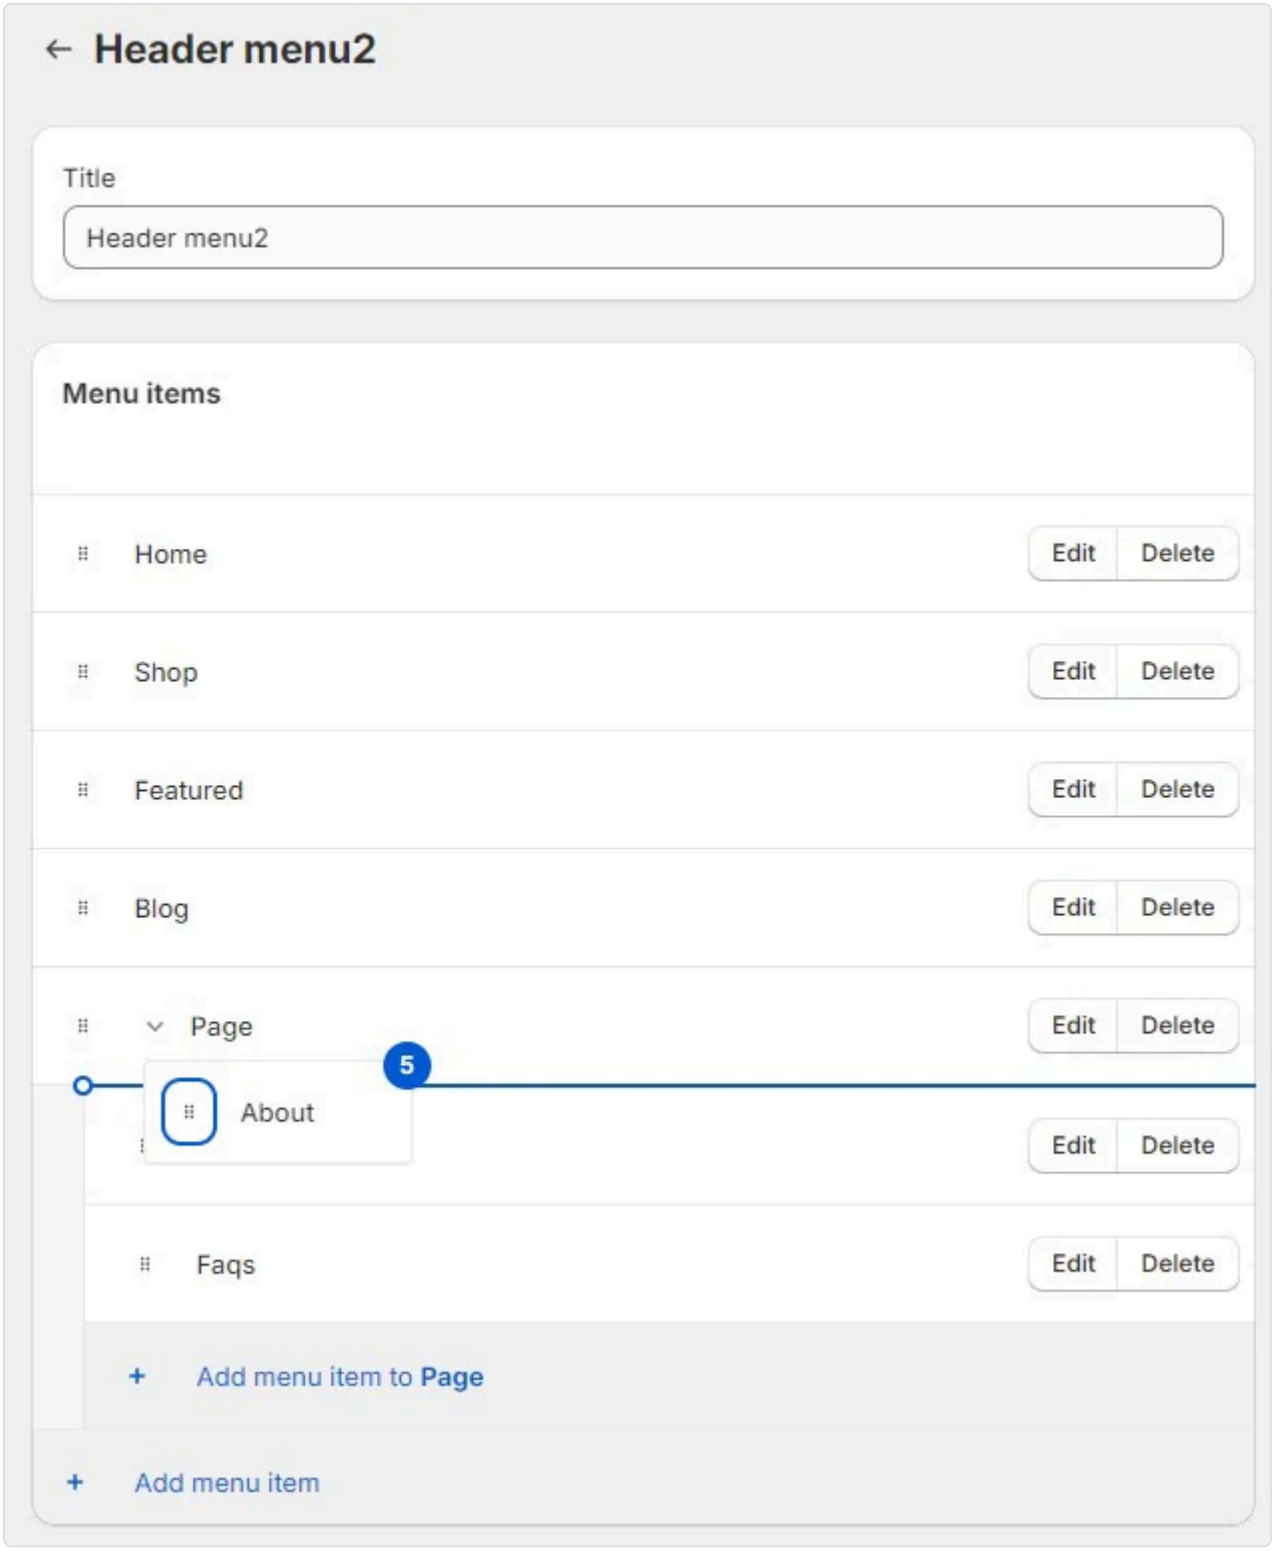
Click Add menu to add new or choose any items below the menu to edit.



Write the menu's name, then choose Add menu item. Write the menu item's name and choose the item in the dropdown box > click Add.



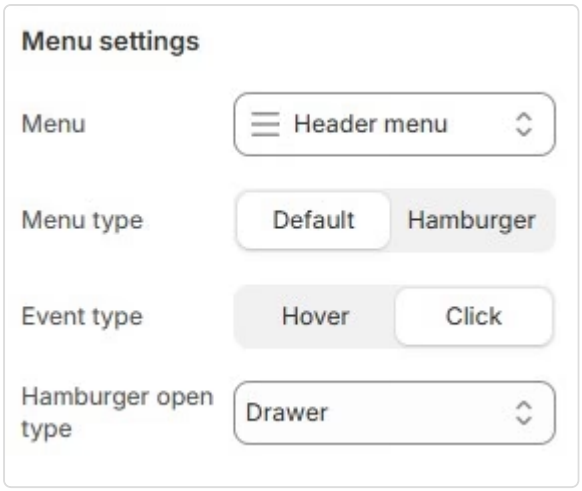
To make an item to a child menu, drag it under the main item. Menu items can also be added to create the same level as a child menu. Save



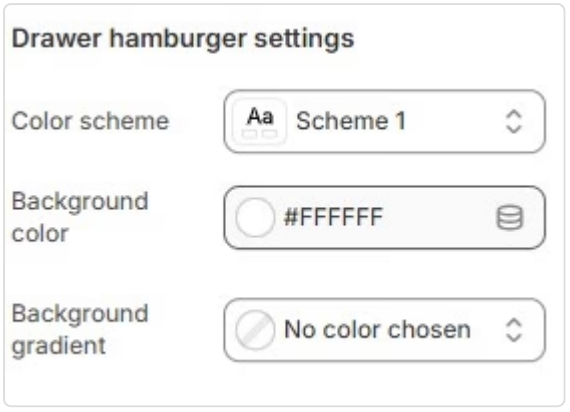
In the theme editor **(Customize)**, click **Header**
Go to **Menu**, select menu created

- **Menu:** Select the created navigation menu.
- **Menu type:** You can choose the default landscape menu or the hamburger menu.

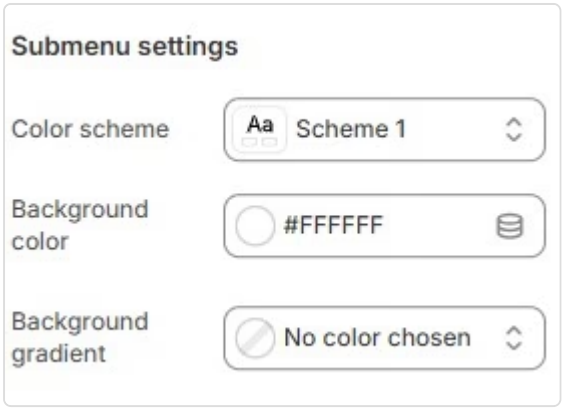
- **Event type:** When you hover over the menu, the mega menu will appear or you have to click.
- **Hamburger menu:** If you select hamburger menu, you will have 3 options for displaying the hamburger menu.



## 4. Drawer hamburger settings

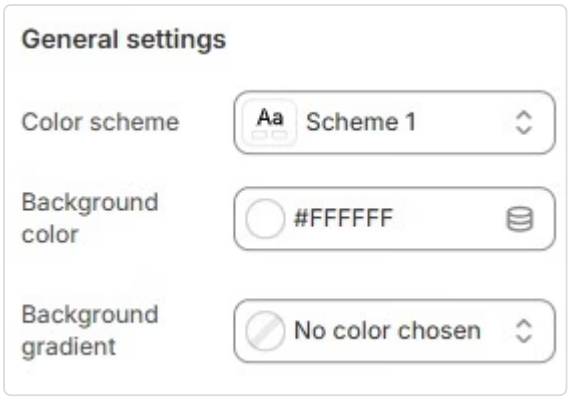


## 5. Submenu settings



## 6. General settings

**Color schema**: Set text color and background color with preset scheme

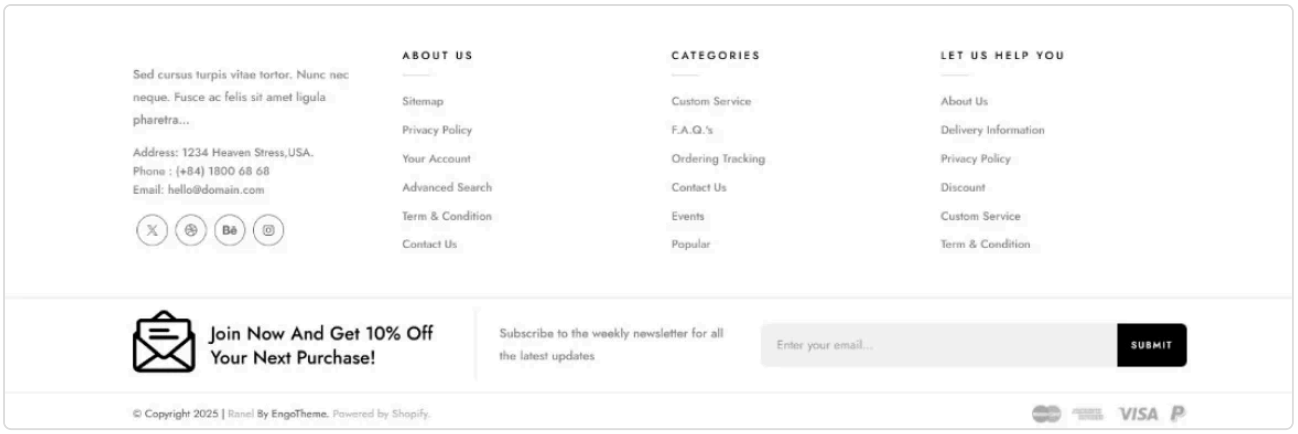


# Footer v5

Appears and features information at the bottom of the page

The footer is the section of content at the bottom of a web page. The footer menu typically contains quick links to your homepage, about us page, blogs page, contact page, policy page, etc.

A great website footer will help your visitors navigate your site and will lead to a greater ecommerce experience.



:::tip[steps]

1. In the theme editor (**Customize**), click **Theme settings**
2. Locate **Footer**
3. Make necessary changes
4. **Save** :::

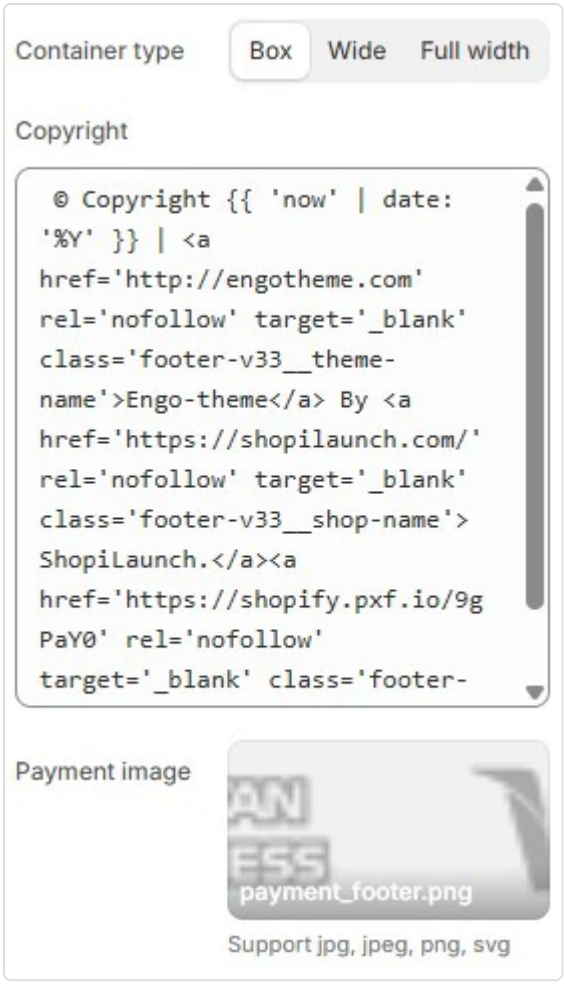
# Footer settings

## 1. Layout settings

- **Container type:** You can choose among Box, Wide, Fullwidth for the policy layout.
- **Payment image:** Select the image to display from store

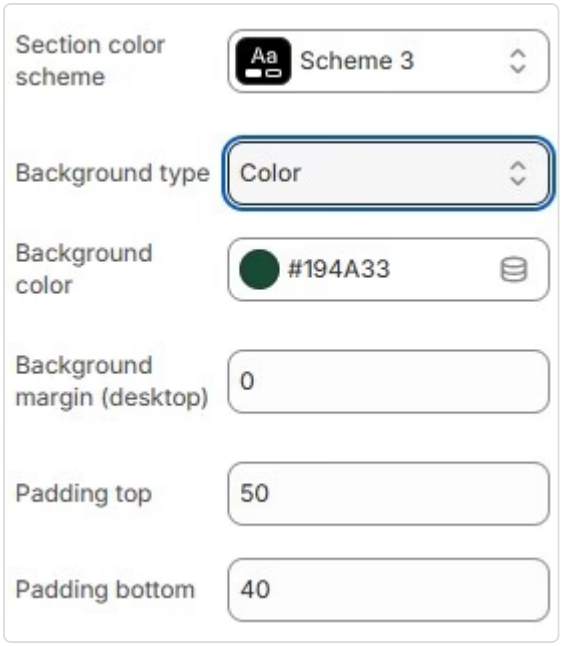
:::important For **Copyright**, you need to enter the correct code below. If there are any changes, only change the text Engo-theme, ShopiLaunch, Powered by Shopify. :::

```
© Copyright {{ 'now' | date: '%Y' }} | <a href="http://engotheme.com" re
```



## 2. General settings

- **Section color scheme:** lets you select a predefined color scheme for the section, which applies to the text and background.
- **Section Padding** allows you to specify spacing before or after sections or both



# Block settings

Add suitable blocks to your store footer as per your requirements.

## 1. Information

- You can also show the logo of the store by selecting/uploading an image. Adjust the logo's main width if needed.
- **Icon social:** Use the provided fields to add a icon svg for the section. Leave any of the fields blank if you do not want to display them.
- **Icon link:** Paste link for icon social

# Set up local pickup

How to set up local pickup for your online orders?

You can set up the option for customers to pick up their online orders at your retail store, curbside, or any location that you choose.

After you enable the local pickup option, your customers can choose between **Ship** and **Pick up** in the Delivery method section of your checkout. When they select Pick up, they can choose the location where they want to pick up their order.

## Prerequisites

You need to complete the following before you can offer local pickup:

- Verify that the fulfillment priority order for your online orders is set up to meet your business needs.
- Stock inventory at each pickup location.
- Disable any pickup apps.
- Ensure that each person who is preparing items for pickup or marking orders as picked up has access to your Shopify admin.
- Update any location names so that customers can understand where to go to pick up their order.

- Let each pickup location fulfill online orders.

By default, letting a location fulfill online orders also means that non-pickup online orders can take inventory from your pickup or retail locations. Make sure that you review your fulfillment priority and modify it if necessary. If the **Continue selling when out of stock** option is selected for a product, then local pickup orders can be placed for locations without inventory.

# Set up local pickup option

Steps:

1. From your **Shopify Admin**, go to **Settings** > **Shipping and Delivery.**
2. In **Local pickup**, click **Manage** beside the location you want to enable local pickup. Click **Show more** if you have several locations. You must have a location set up already before you can select it, see Locations to set up multiple locations.
3. Under **Location status**, select **This location offers local pickup.**
4. Under **Information at checkout**, change the settings to meet your needs.
5. Under **Order ready for pickup notification**, enter pickup instructions for customers (Optional).
6. **Save** the settings.

# Show pickup availability to your customers

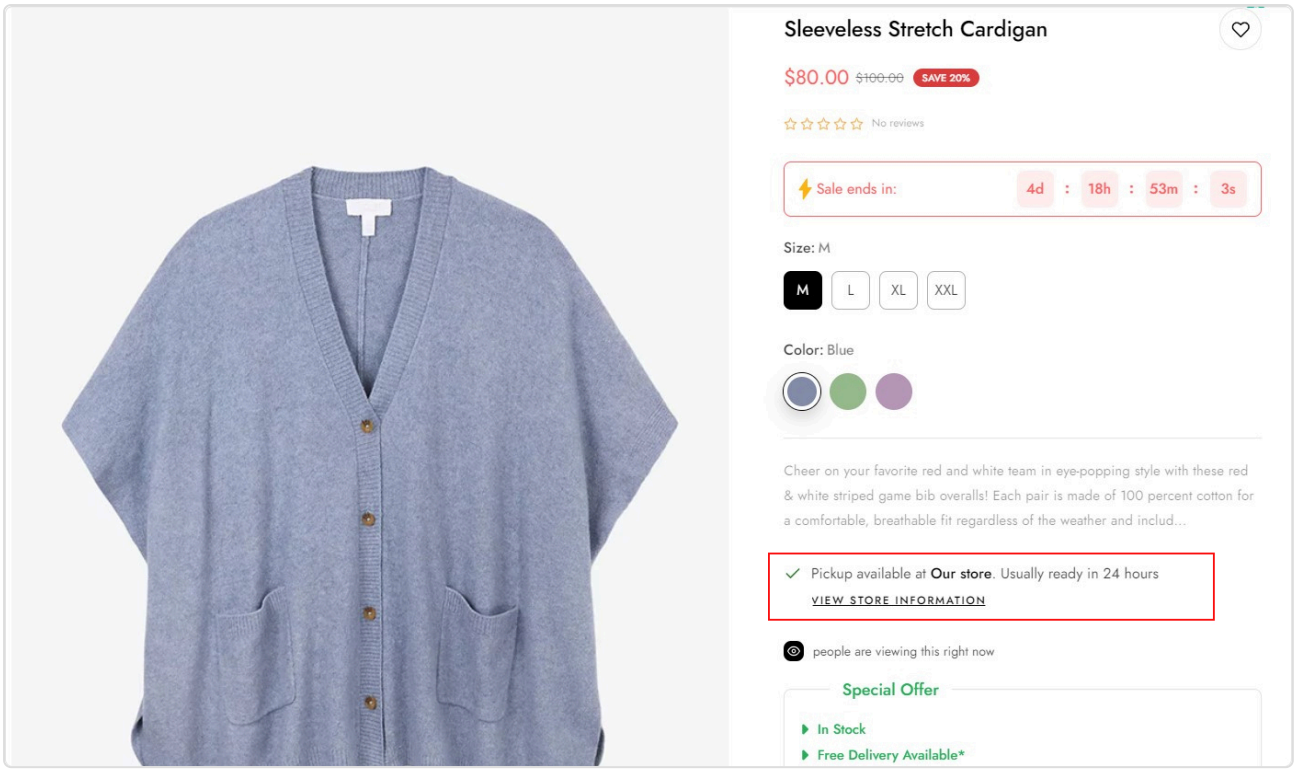
Your theme lets you show customers whether a product is available for local pickup. On each product page, a pickup availability section shows whether the product is available, and the estimated time frame for pickup.

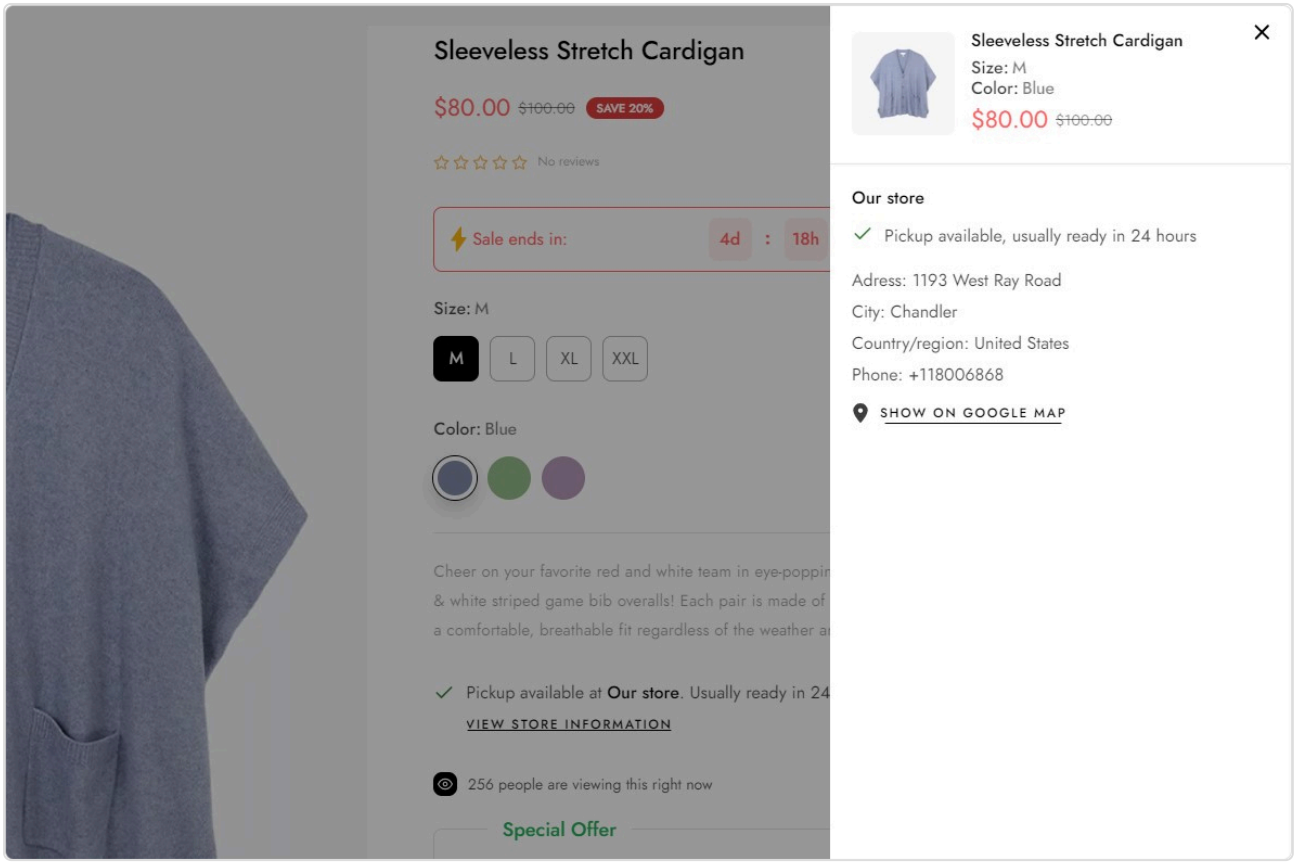
This information appears only for products that are stocked at at least one pickup location and have **This is a physical product** selected in the **Shipping** section of a product variant's details.

Steps:

1. From your Shopify Admin, go to **Products**.
2. Select a product.

3. Under **Variants**, select a variant.
4. Under **Shipping**, check **This is a physical product.**
5. Under **Inventory**, select locations that stock the selected variants.
6. **Save** the settings.





If you have local pickup enabled for only one location, then the location and pickup availability is displayed for that location. Customers can click **View store information** to learn more about the pickup location.

If you have local pickup enabled for more than one location, then the pickup availability section displays the location and pickup availability for one of your stores. Customers can click **Check availability at other stores** to check the product's availability at all of your locations that have pickup enabled.

# Add gift card product

You can think of these gift cards as you would for other products. Your customers can purchase them and then give them away to their friends.

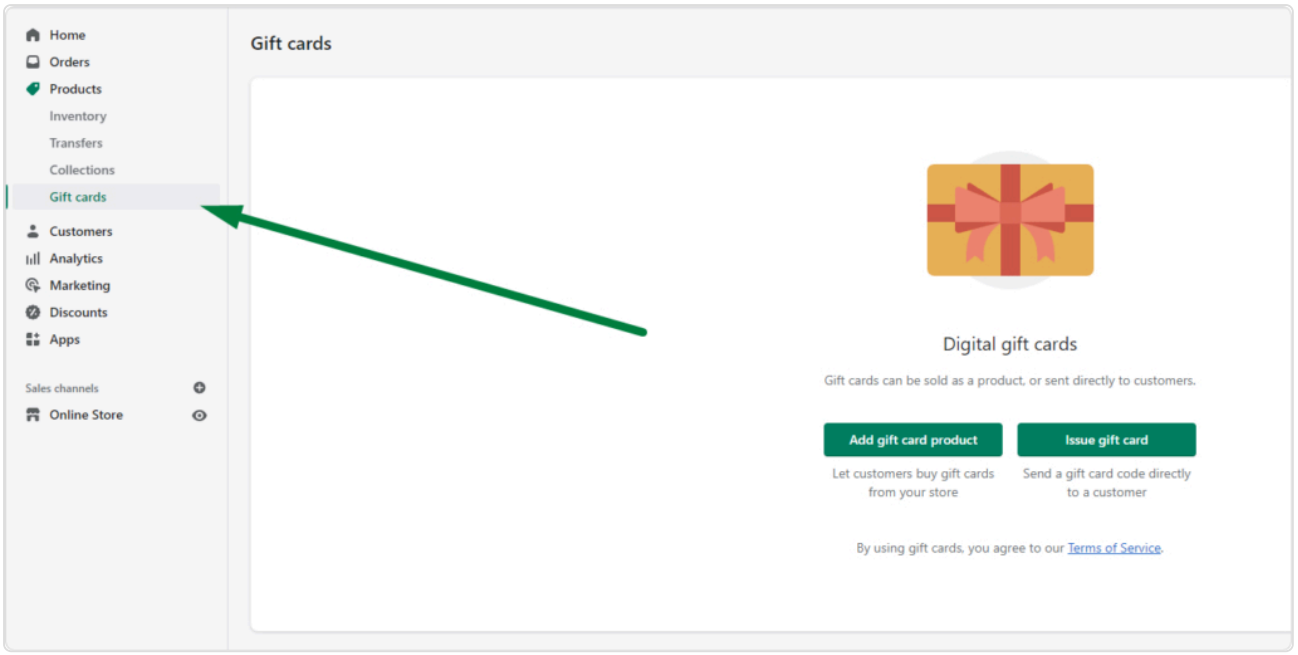
When someone adds a product to their cart and starts the checkout process, they will be able to use the gift card to pay for that specific product.

# How to create a Shopify gift card

There are two ways you can create gift cards: using Shopify's built-in functionality or an app.

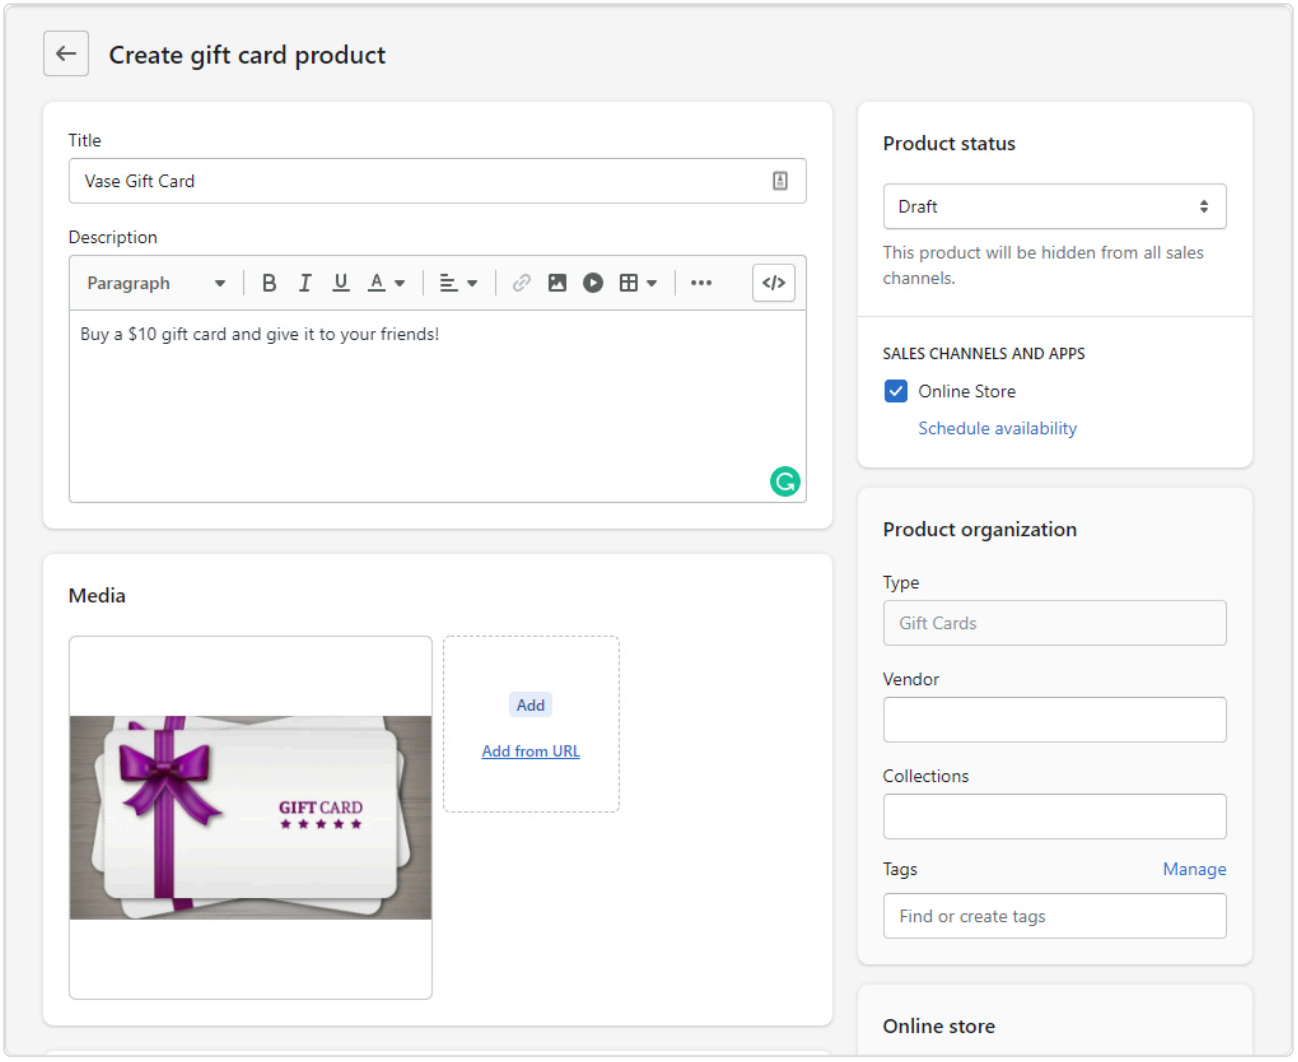
Let's start with the built-in functionality and then move to some of the best apps.

**step 1.** Log into your Shopify store and go to **Products -> Gift cards**. Here you'll see two options; for now, simply click on the "Add gift card product."



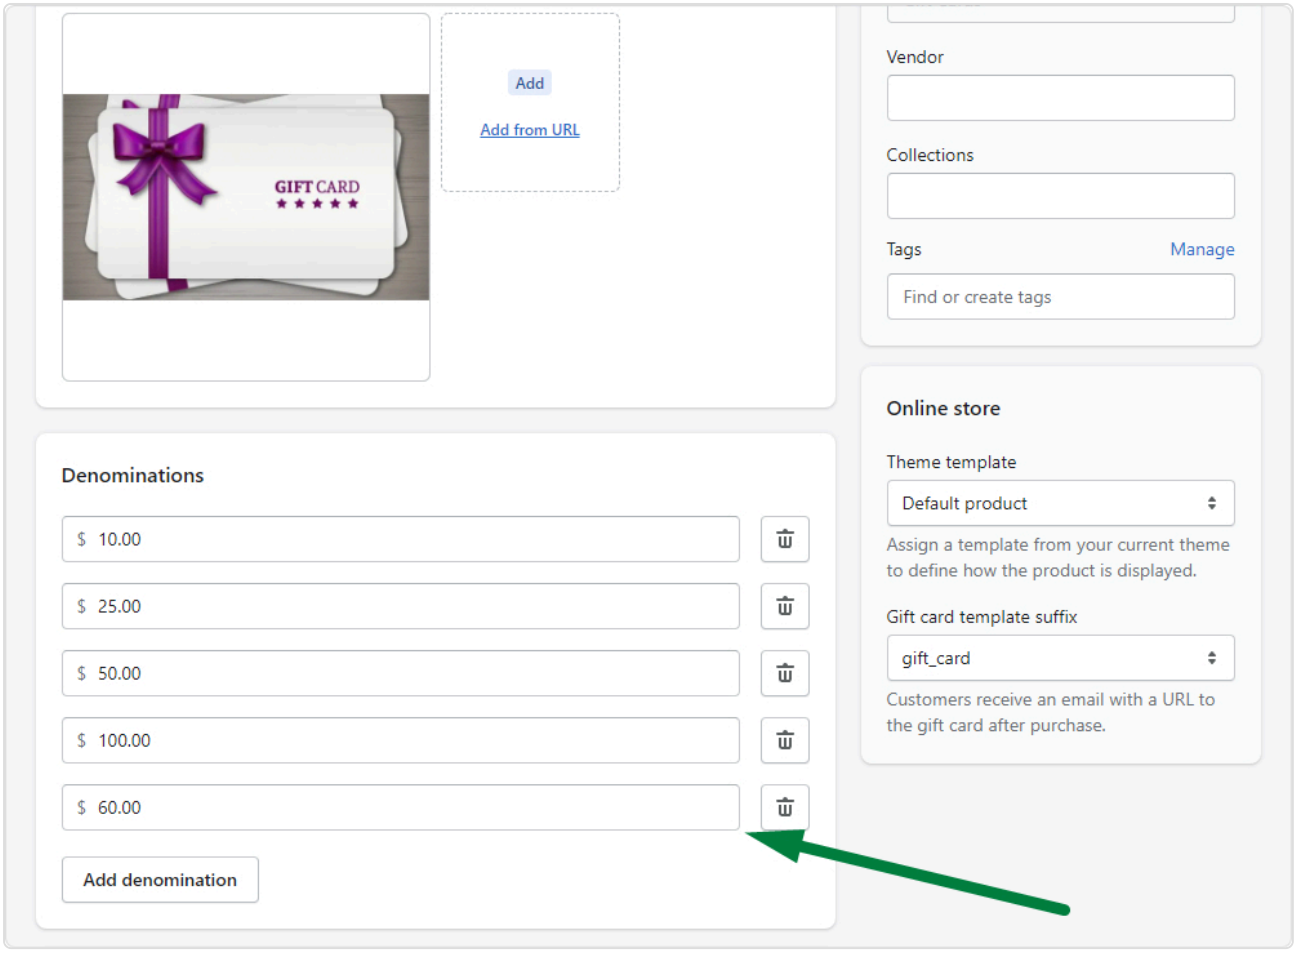
**Step 2.** Complete the necessary product information. Chances are you have already added some products to your store, so this process should be pretty straightforward.

Make sure to give your product a descriptive name and description. An image would also work wonders.

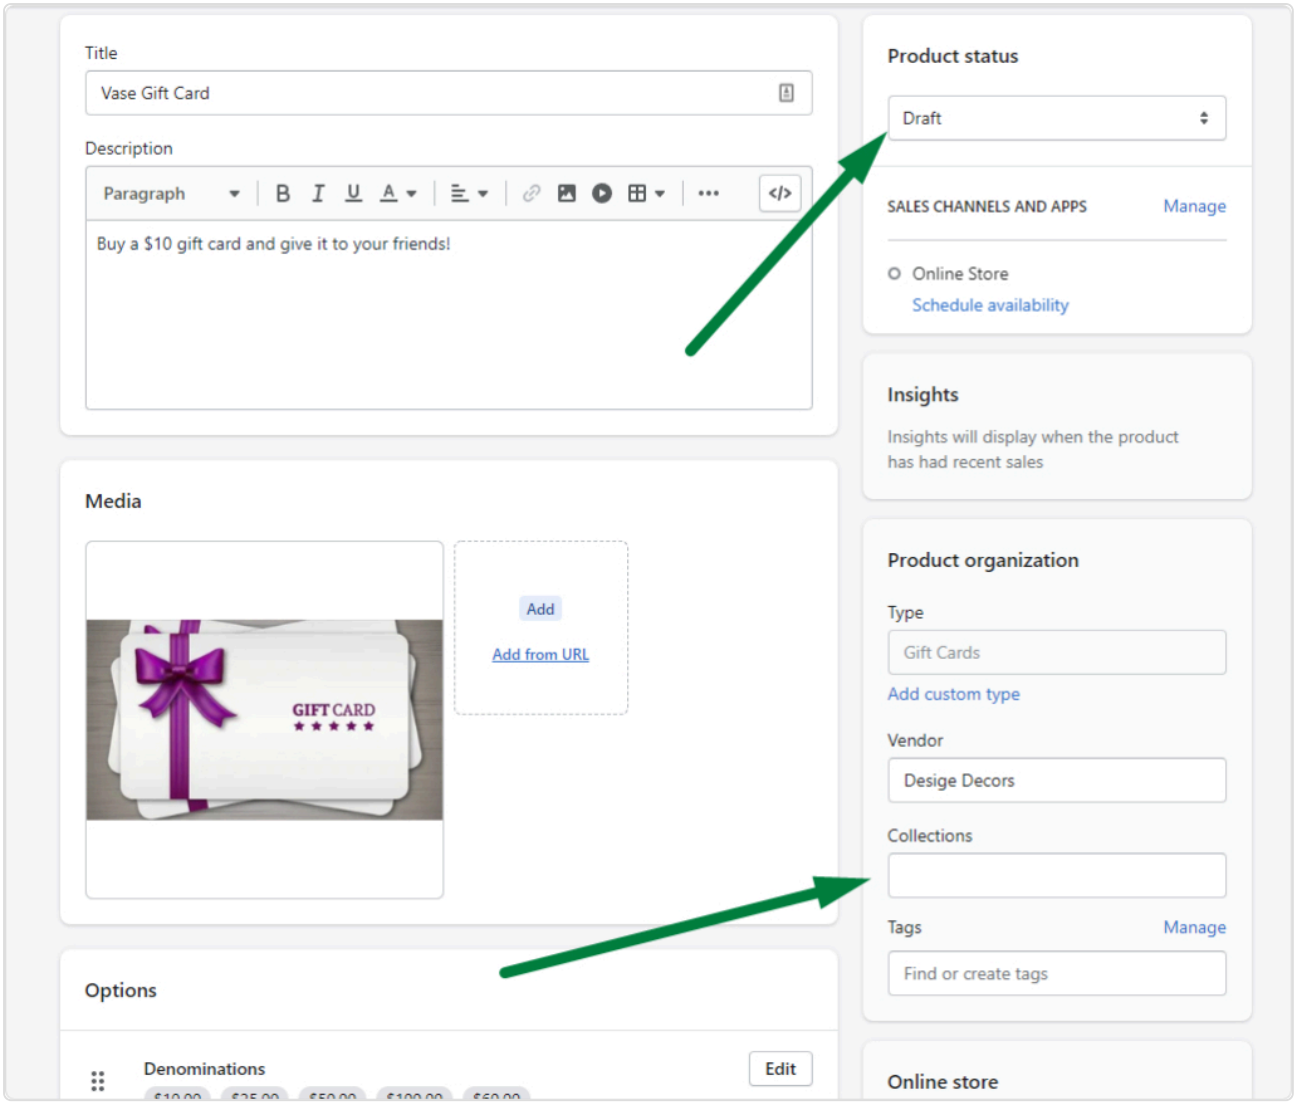


**Step 3.** Choose your denominations. Shopify creates four denominations by default ($10, $25, $50, and $100), but you can always add extra or remove some of them if you feel like it.

As a best practice, you should match your gift card denominations with the average price of your products. For example, say your products cost around $30 each. In that case, you might want to add a $60 denomination so people can gift two products simultaneously.

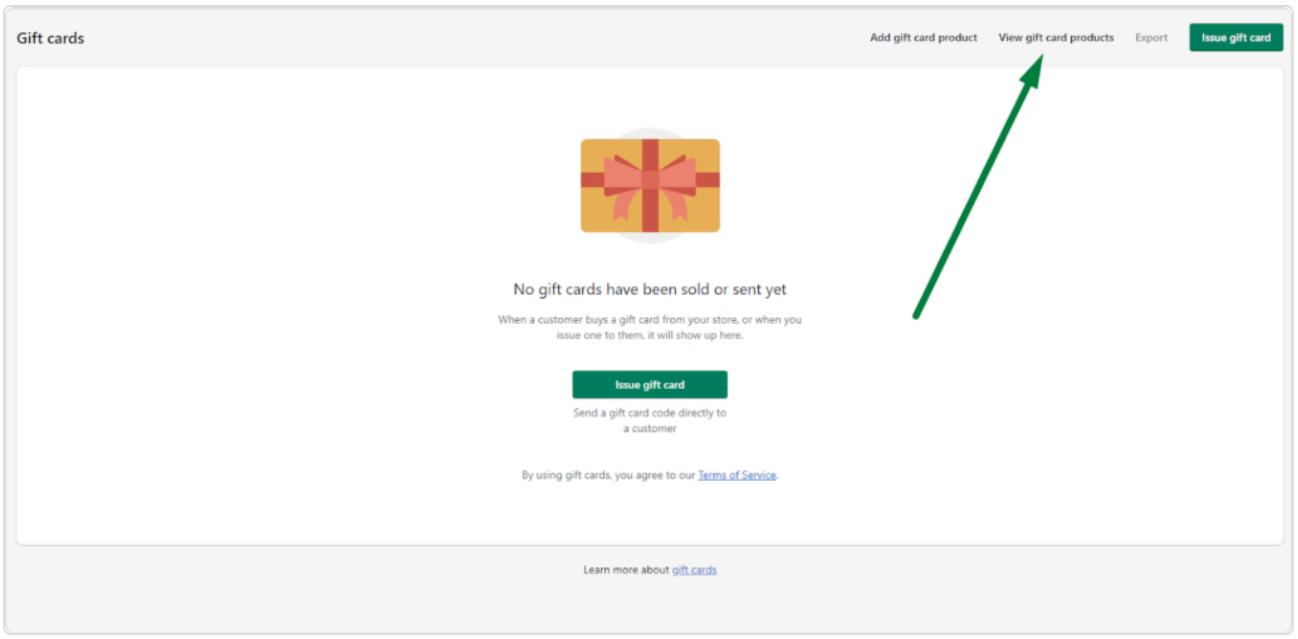


**Step 4.** Change the product status to “Active” and choose a collection. Once satisfied with the product details, it’s time to push it live.

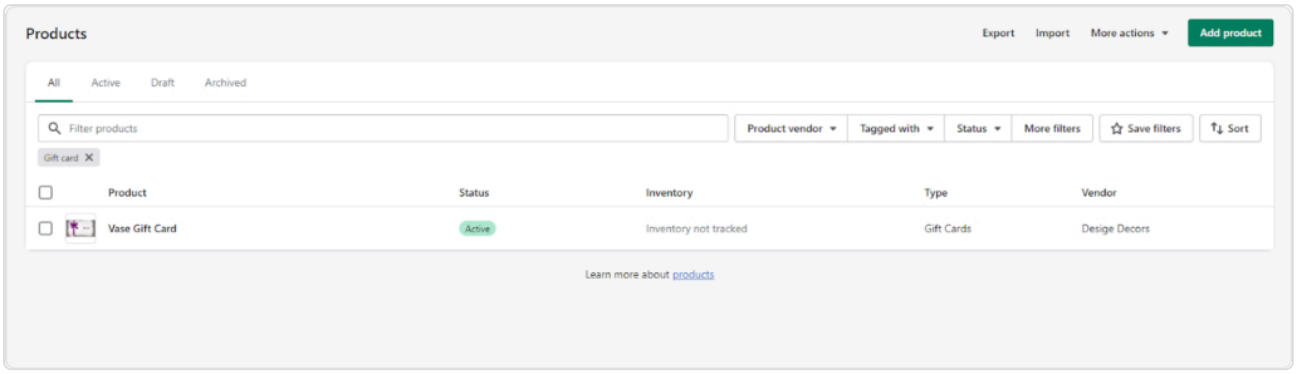


**Step 5.** Save your changes. Once you save your changes, you will be taken to your products page. If you want to create a new gift card or edit the one you just created, simply click on Gift cards (as you did in Step 1) and select “View gift card products.”

This will automatically filter your products, so you will only be able to see your Gift cards.



You can open the gift card editor by clicking on the corresponding gift card.

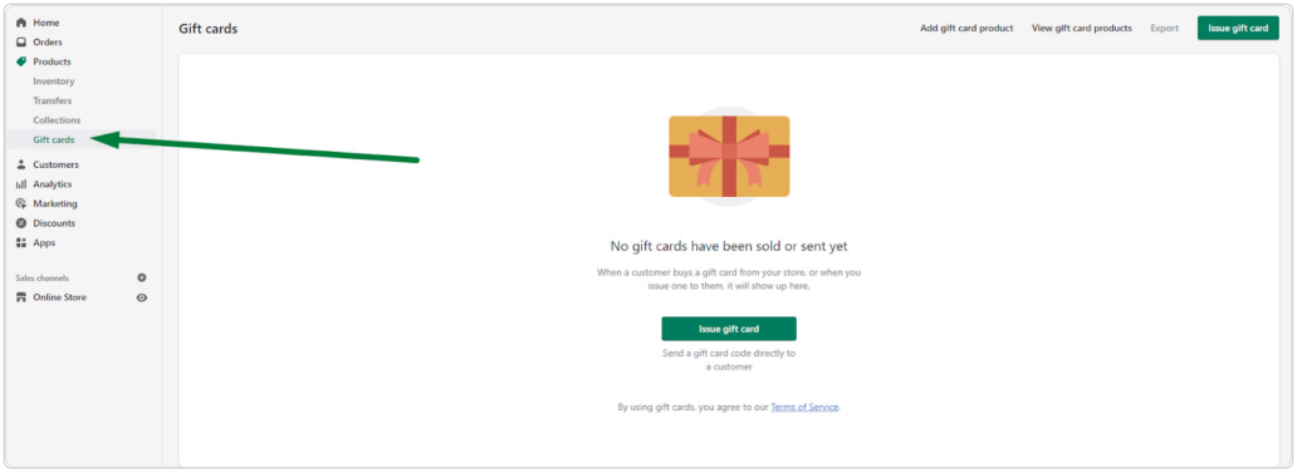


That's it. Now customers can purchase gift cards from your store.

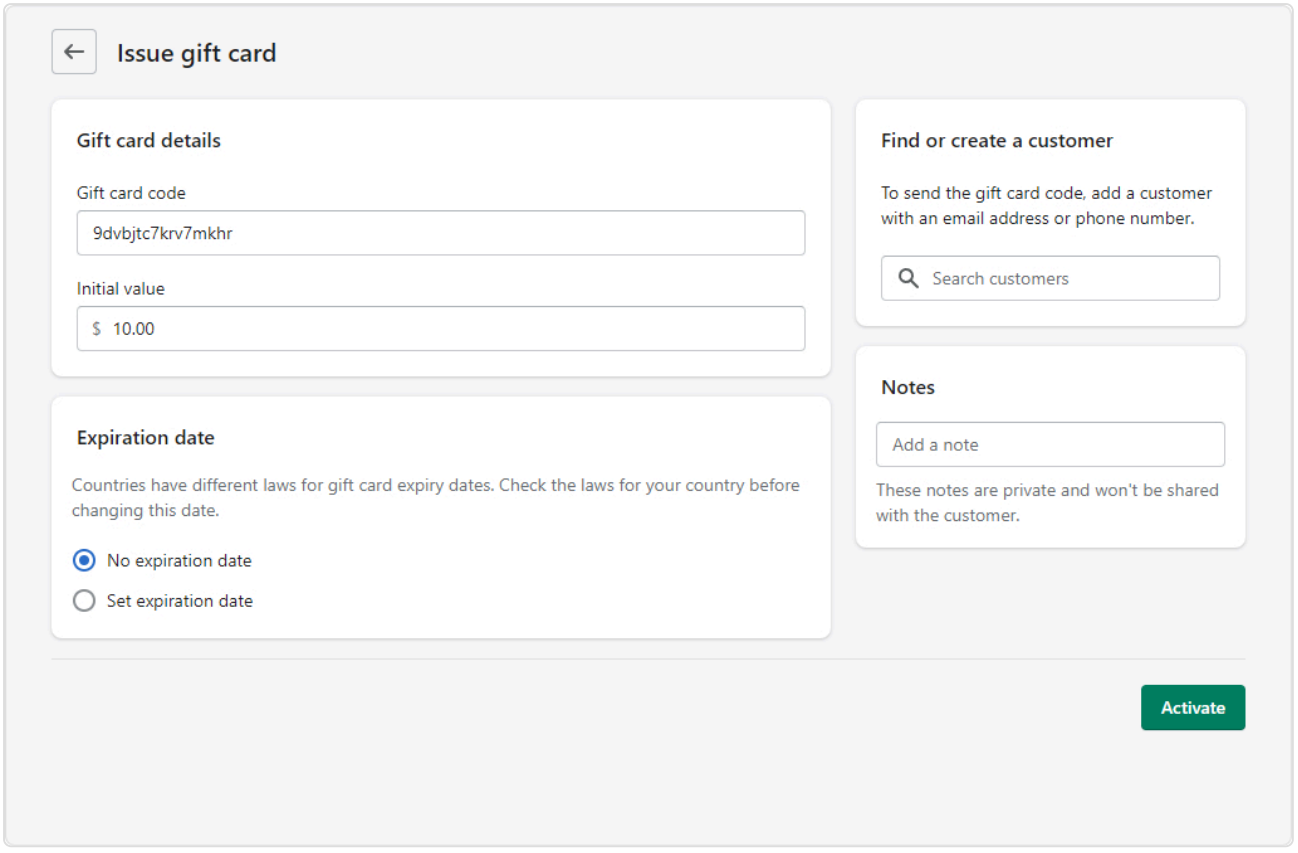
# How to issue single-use Shopify gift cards

This type of gift card is great if you want to thank loyal customers for purchasing from you multiple times. Your customers will appreciate a gift card more than a discount code.

**Step 1.** Navigate to the gift cards page.



**Step 2.** Click on the “Issue gift card” button. This will open up a page that will allow you to configure the gift card.



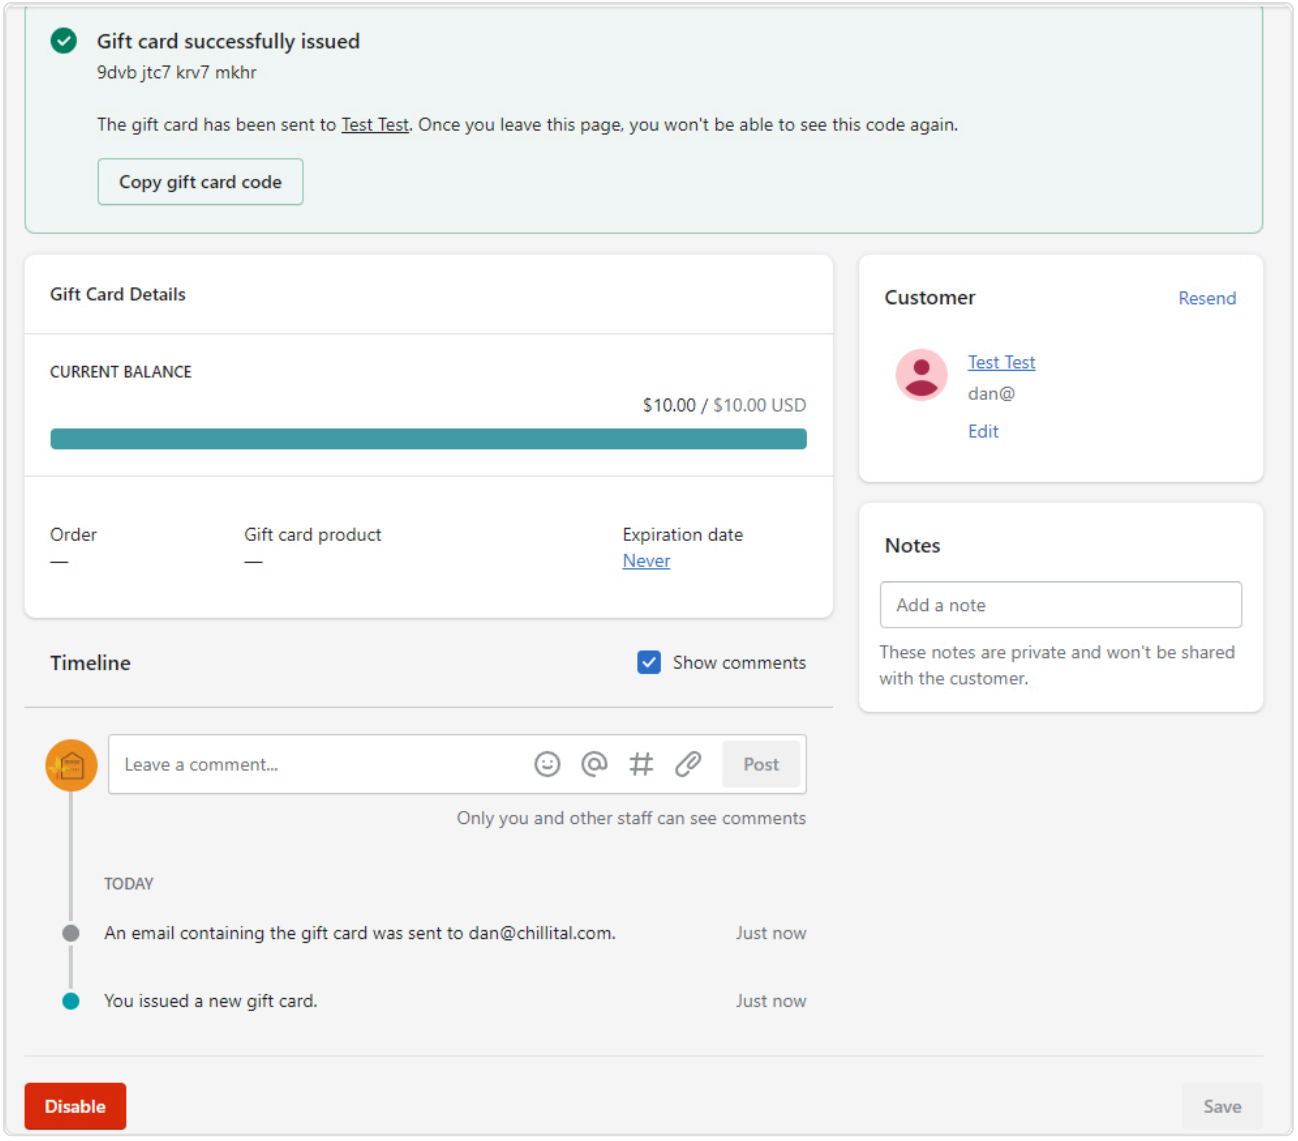
**Step 3.** Configure the gift card. Now you can edit the Initial amount of the gift card, select which customer it applies to, set an expiration date, and even add a note so you remember why you created it.

:::important note: Make sure you copy this code right now, as you will not be able to see it again after you create the gift card. :::

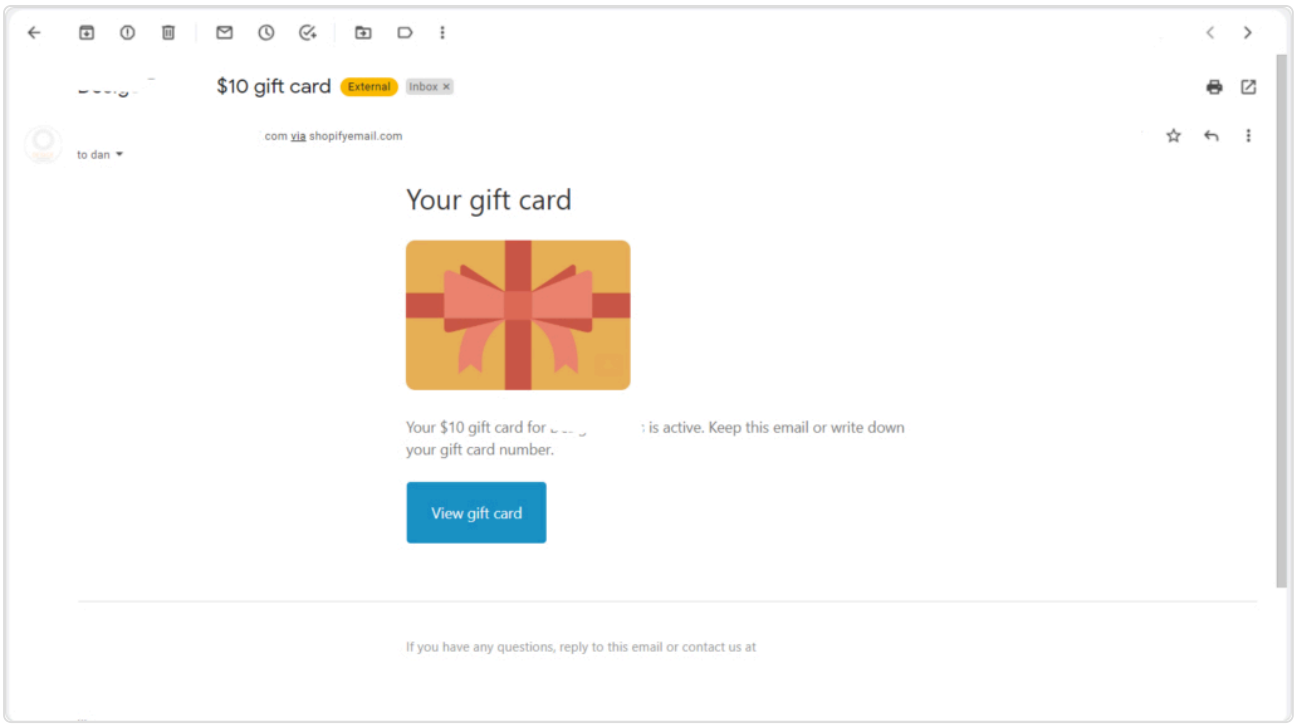
**Step 4.** Select or create a customer and click “Activate.” Once satisfied with your gift card options, you just need to select the customer you want to send it to and click on the “Activate” button.

Right after that, you will see this page featuring all relevant information regarding your newly issued gift card.

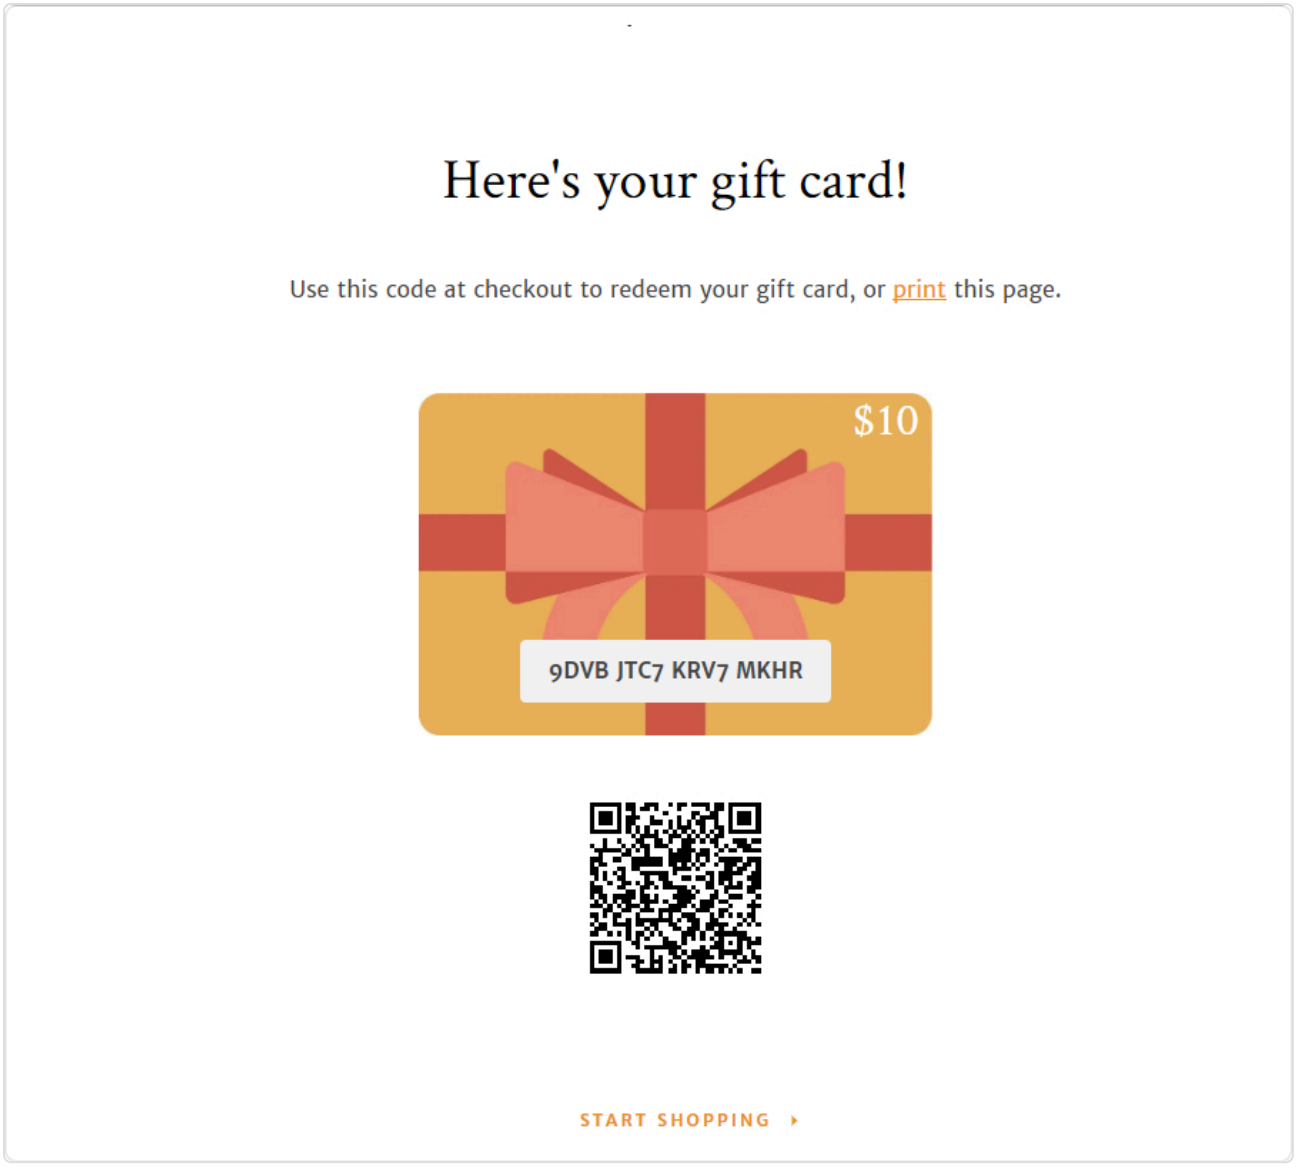
This is the last time you can copy that code, so make sure you do so in case you skipped it earlier.



That’s it. Your customer will instantly get an email letting them know they have a gift card they can use in your store.



Depending on your store's theme, your customer will see something like this when they click on the "View gift card" button inside the email.



Another essential thing to mention is that you do not need to add a customer when issuing a gift card. If you want to share the code via WhatsApp or Facebook Messenger, you can simply create the gift card, copy it, and share it. That simple.

Notice the QR code beneath the gift card code? You can create a QR code for your gift cards to easily share with your loyal customers when they make a return purchase or want to gift their friends.

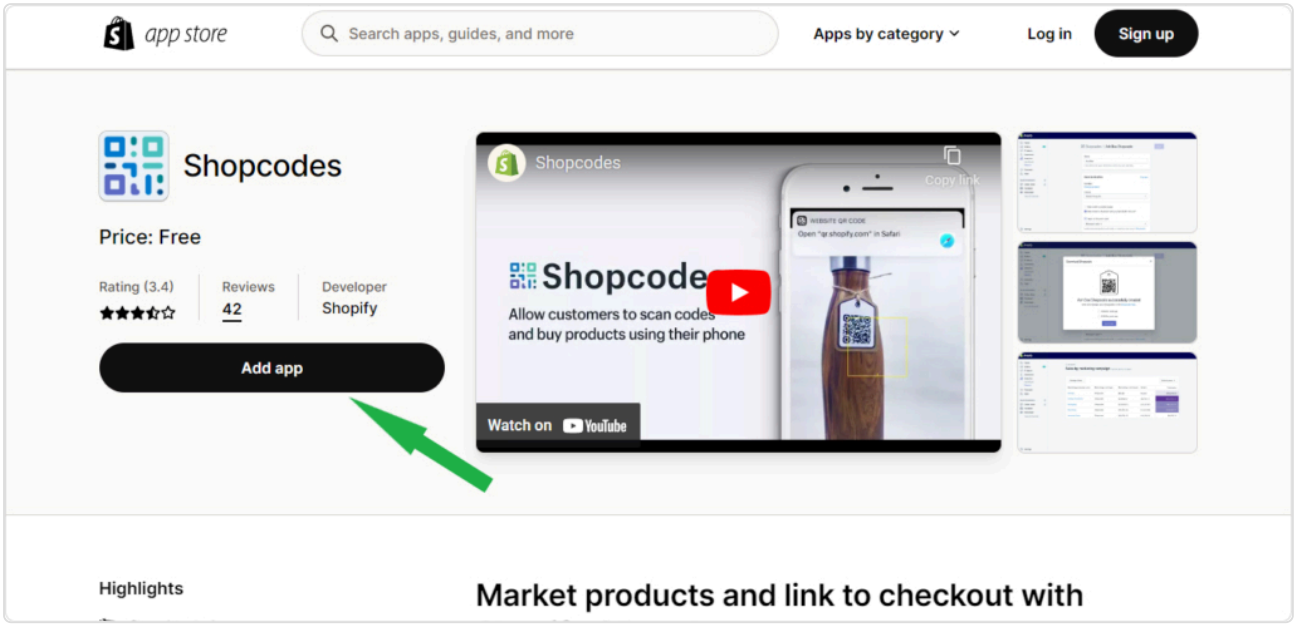
Here’s how.

# How to Create QR codes for Shopify gift cards

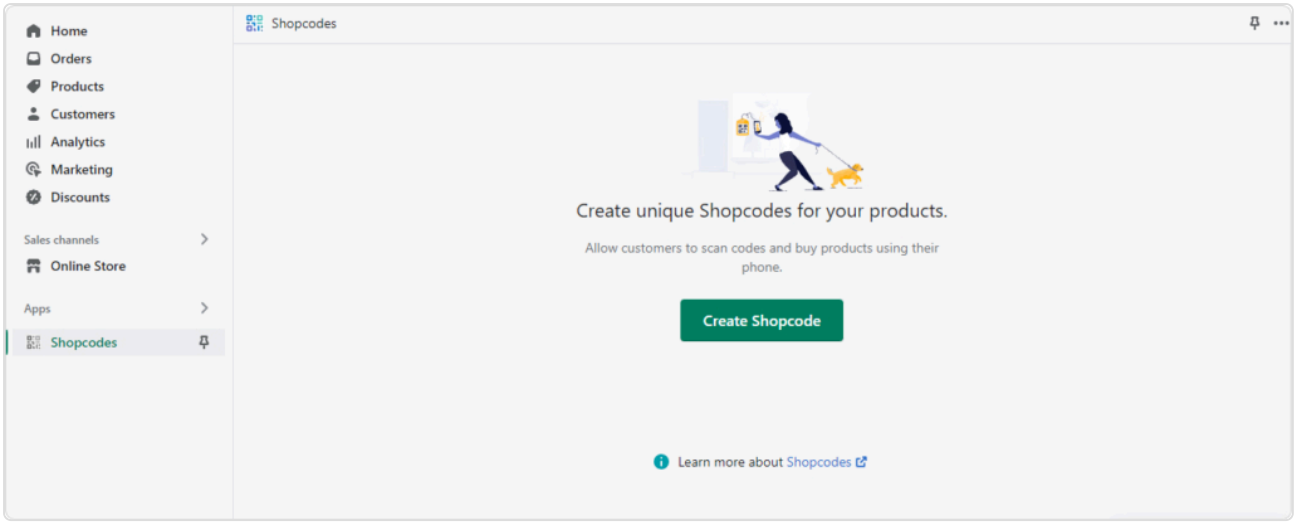
The easiest way to create a gift card on Shopify is through the Shopcode App. And that's our first order of business.

**Step 1.** Install the Shopcode app

- Head to the Shopcode app page in the Shopify app store
- Select Add App. Note that you'll have to log in to your Shopify account before you can do this. If you're not already logged in, Shopify will prompt you to do so.

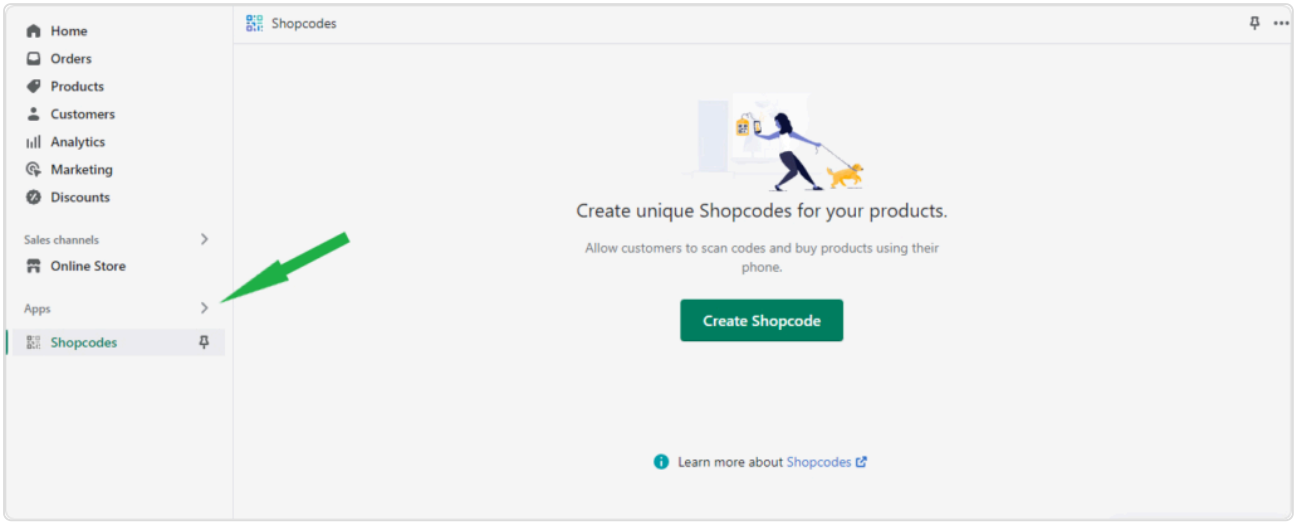


- Click on Install to complete the process Once you complete the installation, you should be redirected to this page:

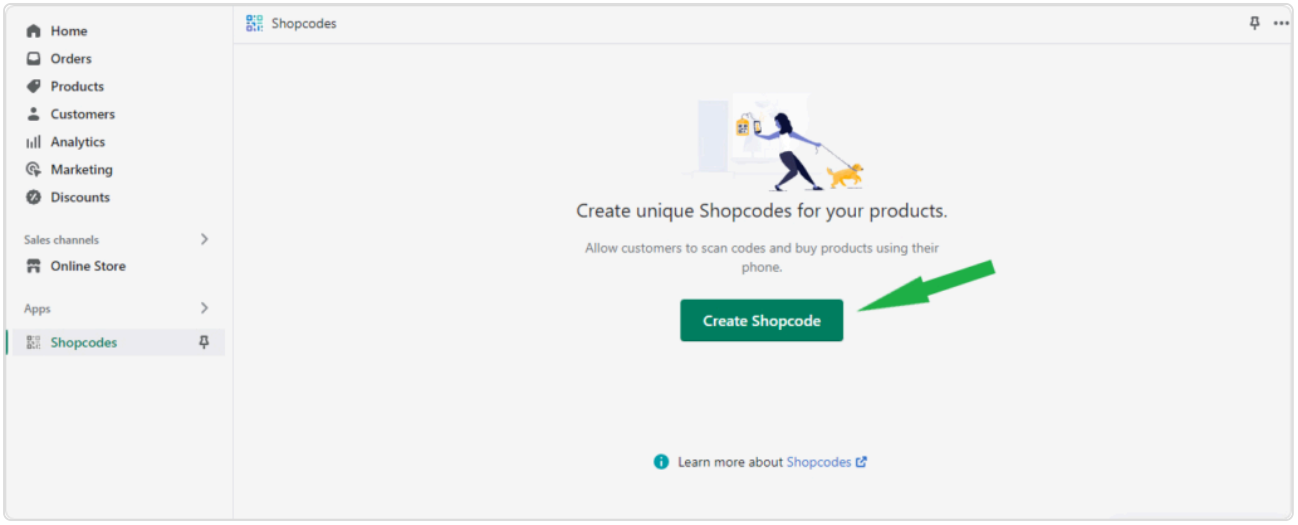


Now, you can begin creating your QR codes.

**Step 2.** Find the Apps column on the left-hand side of your Shopify window and select Shopcodes. You should be there already if you just installed the Shopcode app.

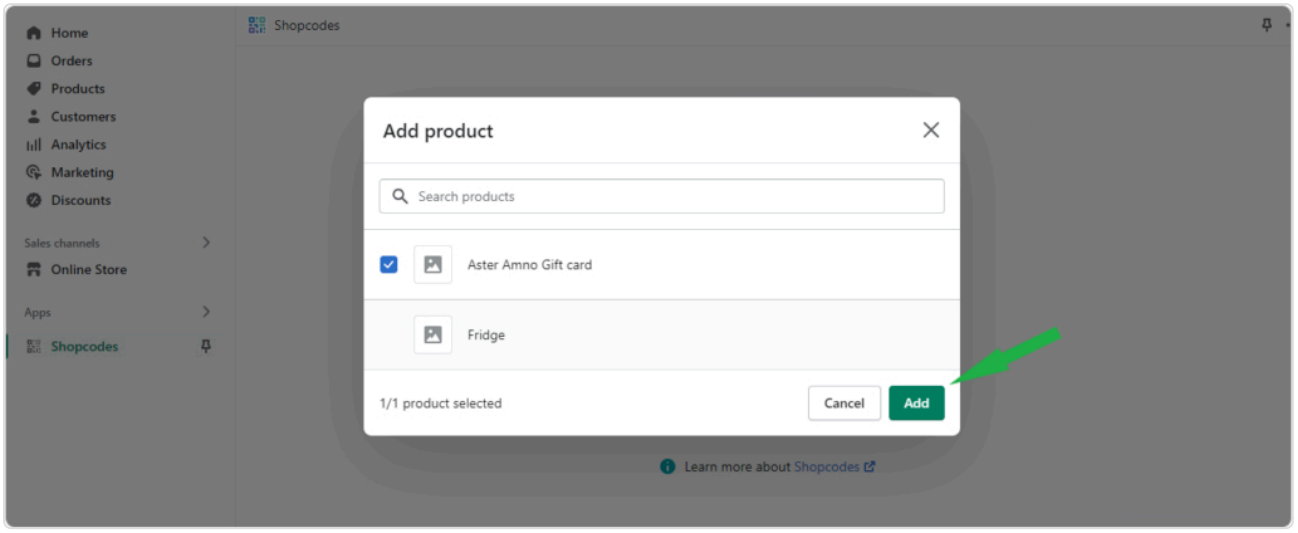


**Step 3.** Click on Create Shopcode.



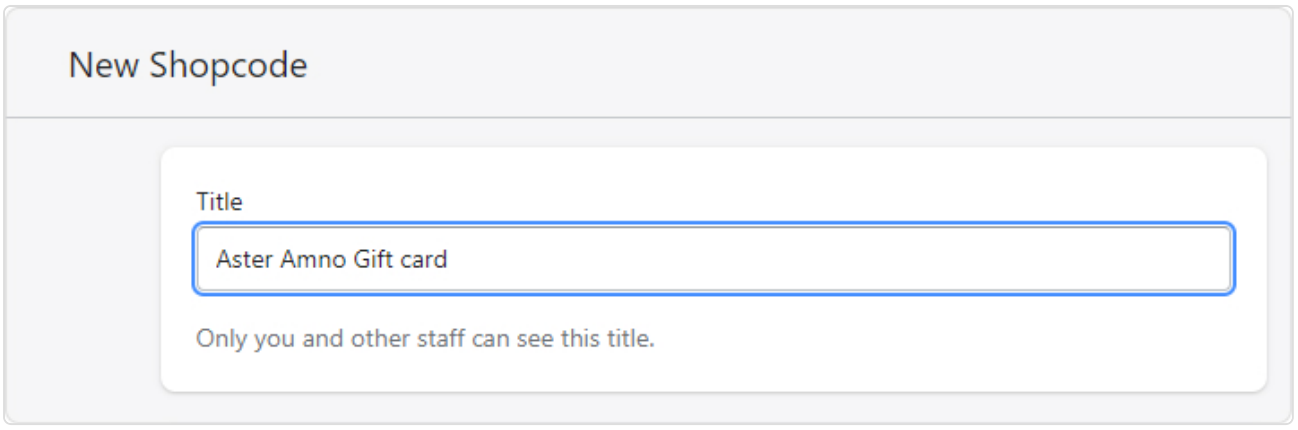
You'll then be prompted to select the product you want to create the QR code for.

**Step 4.** Select the gift card in the list of products and click Add.

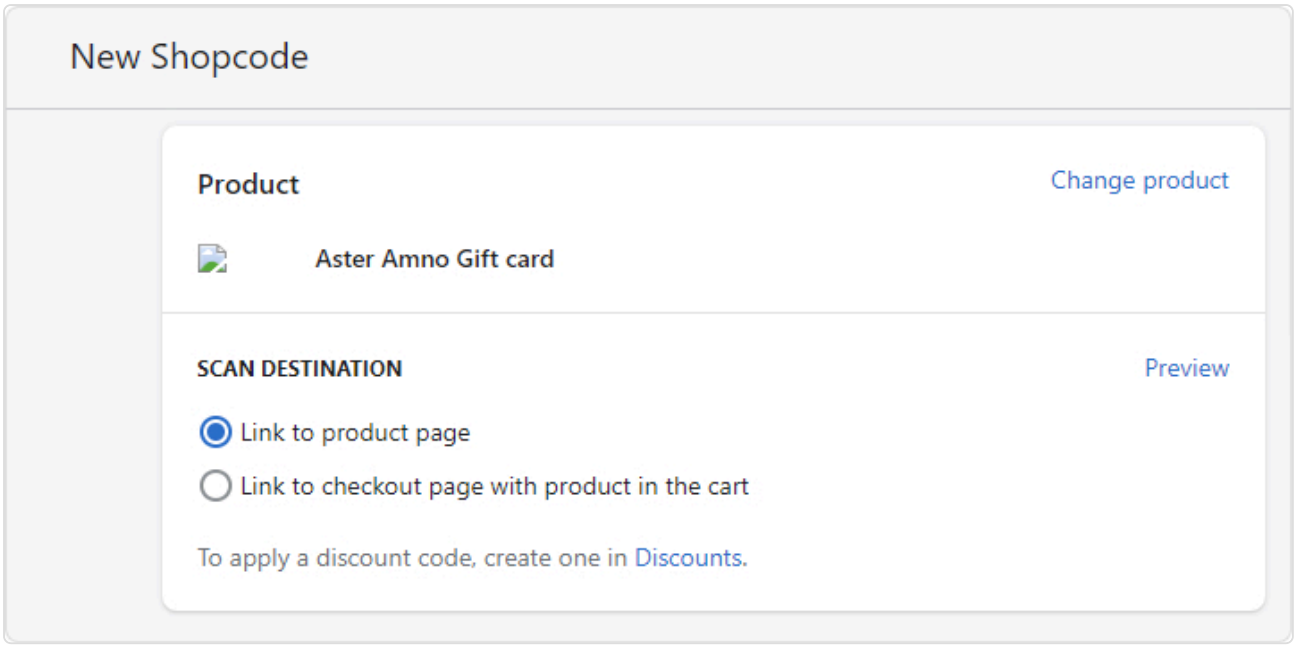


On the next page, you can work out the remaining kinks for your QR code.

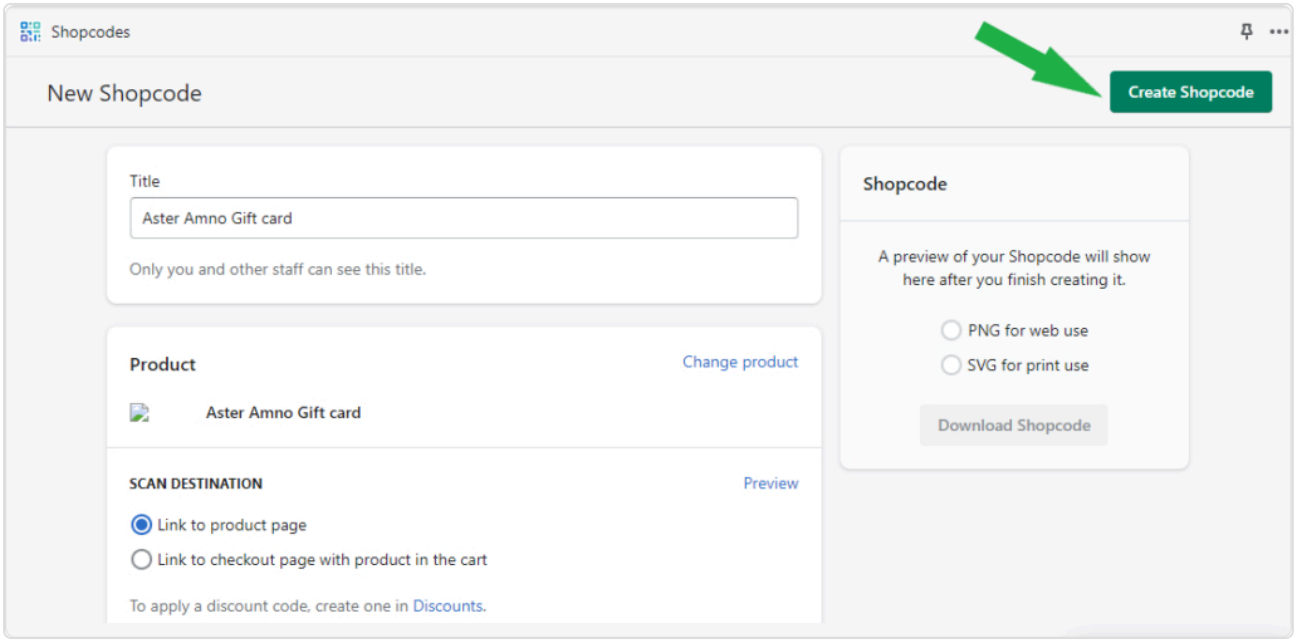
**Step 5.** Enter the title of the QR code. The default name is usually the name of the product you choose, but if you want, you can change the name.



**Step 6.** Choose the QR code scan destination. Where do you want to direct users when they scan your gift card QR code? You can direct them to the gift card product page or to your checkout page with the gift card in the cart.

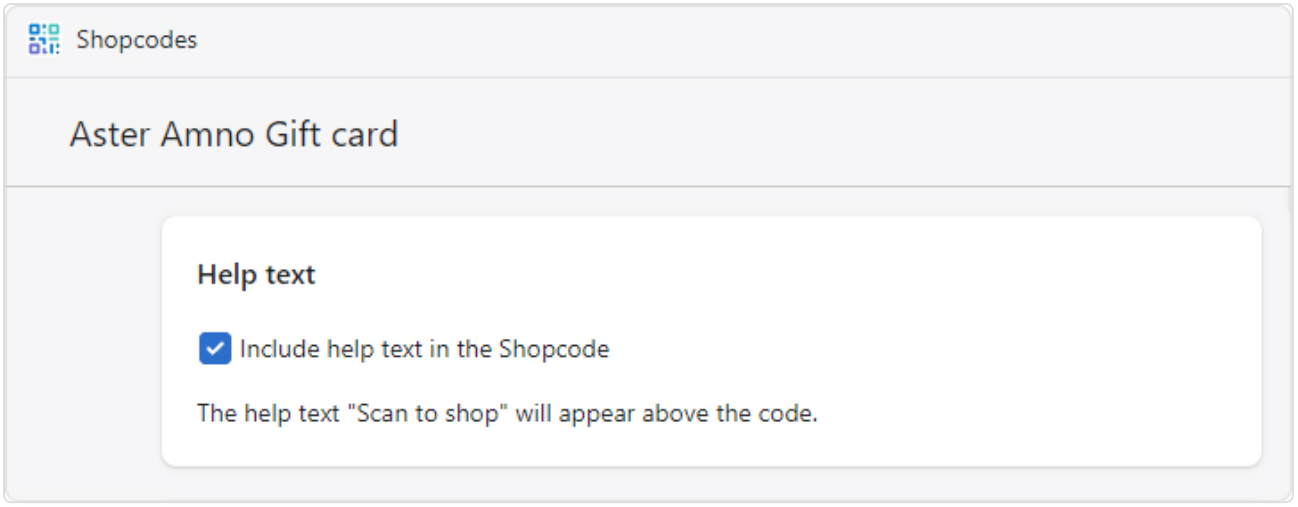


**Step 7.** Click on Create Shopcode to activate your QR code.



**Step 8.** Download the Shopcode in the format you want: PNG or SVG. We recommend the PNG format if you'll be sharing the QR code online, but if you'll be printing these codes, your best option is SVG.

**Pro tip:** If you want to add any explanatory notes to your gift card QR code, check the **Help Text** box under the scan destination. Also, test out your QR code before issuing them out to customers. Your goal is to get repeat customers and more prospects, not to push away customers with bad-functioning QR codes.

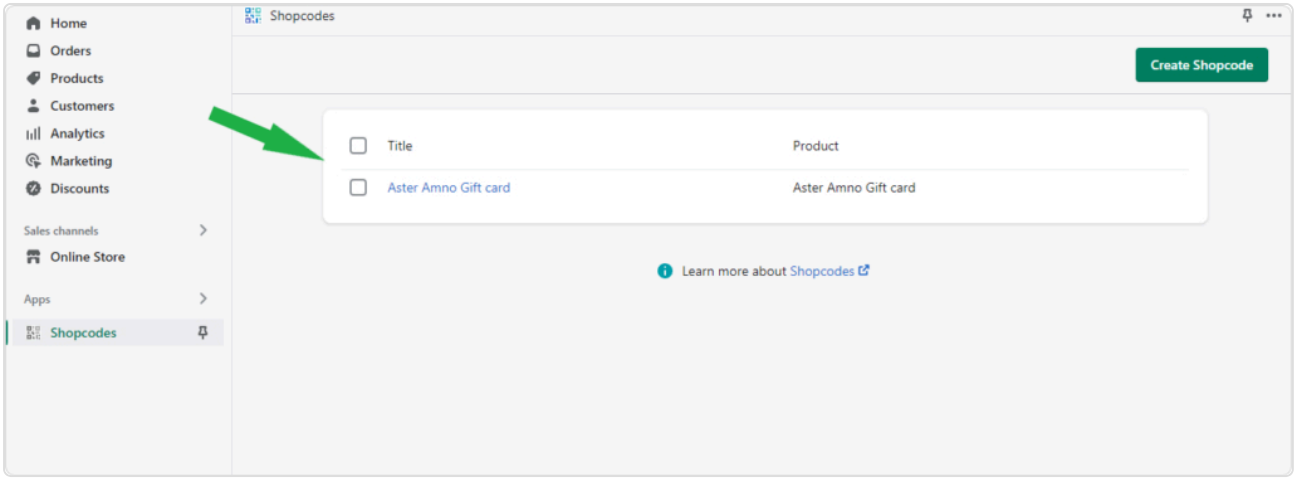


Now, that you have your QR codes out there, you'll want to know how many people are scanning them and how many of those scanners you're converting. Thankfully, you can do that right from the Shopcode app.

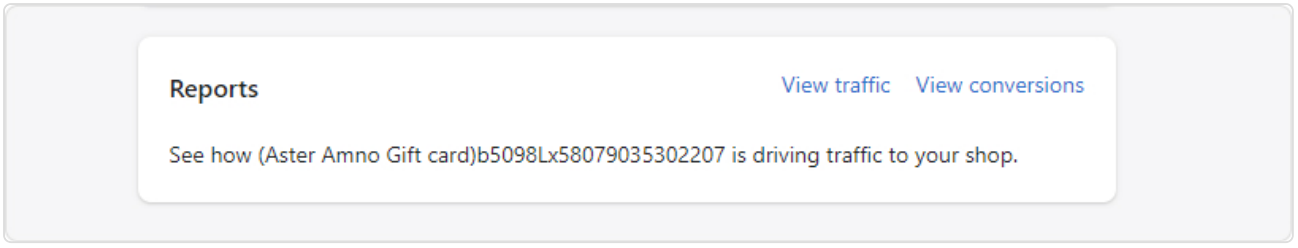
# How to track QR code activity

**Step 1.** Go to the Shopcode app as we saw above.

**Step 2.** Choose the code you want to track from your list of Shopcodes.



**Step 3.** Scroll to the Report section at the bottom of the page.

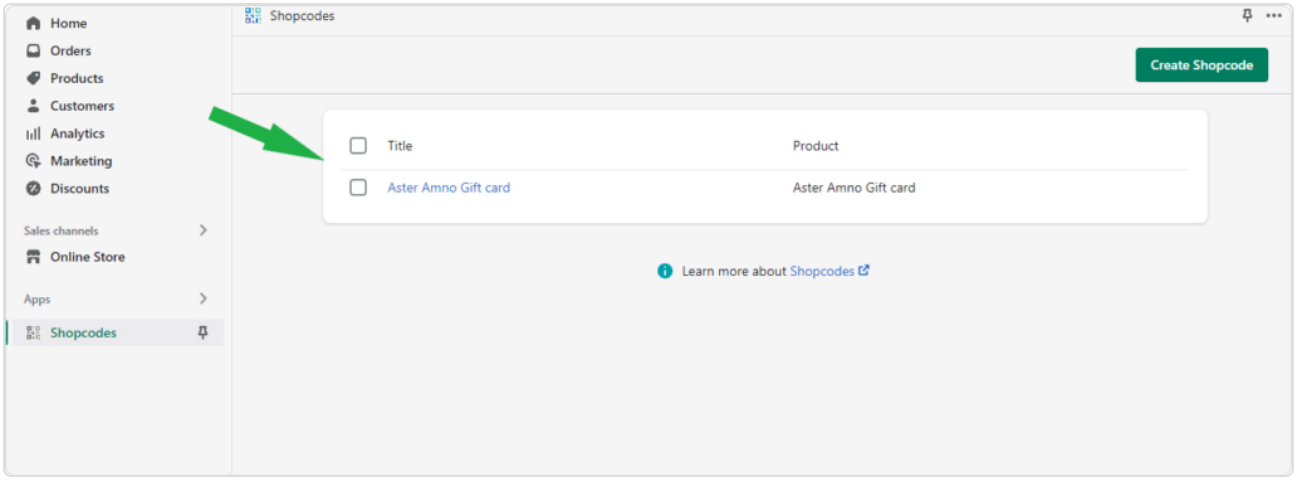


From here, you'll need to choose what exactly you're looking to track: tra ffic or conversion. You can then make informed decisions from there.

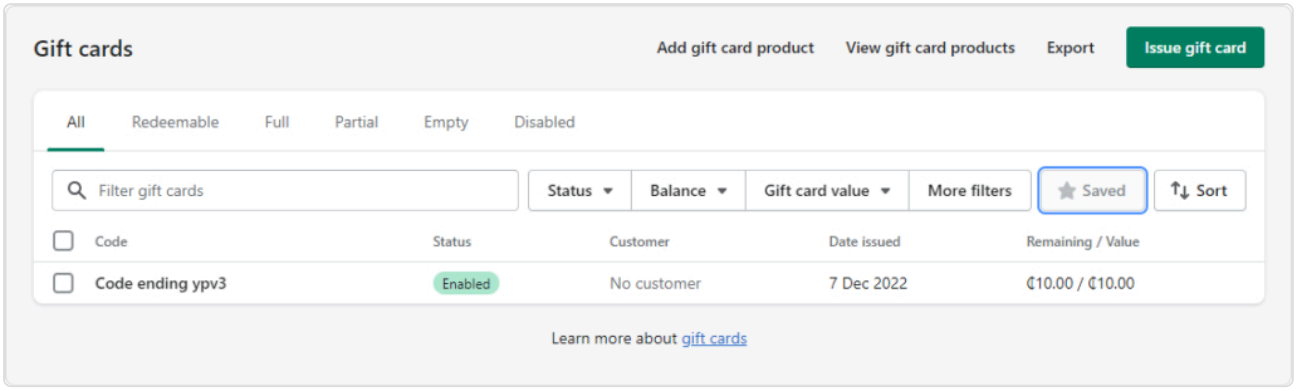
# How to check Shopify gift card balance

As of today, Shopify gift card recipients can't check the balance of gift cards on their own. All they can do is ask you, the vendor, for that information. Here's how to find Shopify gift card balance for your customers:

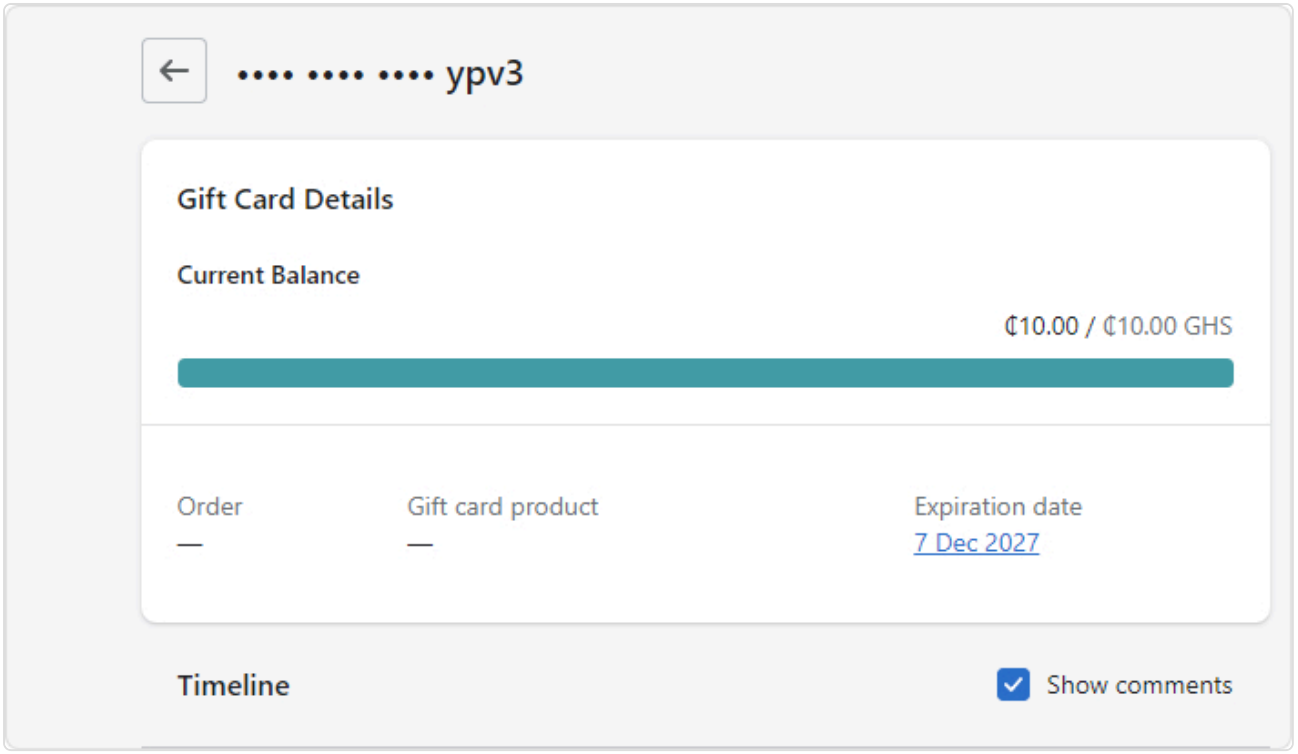
**Step 1.** Enter the **Products** section in your admin panel and select **Gift cards**.



**Step 2.** Select the gift card code from the list of gift cards (the customer should have this code).



**Step 3.** Once you find the gift card, click on the name. You can then find the gift card balance and other information, like the expiration date, in the next window.



Send this info back to your customer, and you're good to go.

Alternatively, you can issue an updated gift card to the customer, especially if they've lost the gift card information they have. To do this, select the gift card code in the gift card list and click **Resend gift card.**

The customer would receive the gift card with updated information if they had partially used it.

# Faq v3

Create beautiful FAQ page, support page or product FAQs

:::tip[steps:] Add Faq to the page

1. In the theme editor **(Customize)**, click **Add** section
2. Locate **Faq**
3. **Save** :::

Use the provided text fields to add a suitable **Sub heading/Heading**. Insert `<br>` to break the line.

![faq demo](https://cdn.shopify.com/s/files/1/0821/2375/1728/files/faq4.jpg?v=1715762719)

# About v1

It isn't enough to just market your product to consumers. You need to earn their trust too. One way to do this is by explaining who you are and what your company is about. The easiest and most effect

![About demo](https://docs.engotheme.com/img/other-page/about-v1.jpg)

:::tip[steps]

1. In the theme editor (**Customize**), open the template selector
2. Select **Pages**, then **About**.
3. Make necessary changes
4. **Save** :::

## 1. Section about setting

**Container type:** You can choose among Box, Wide, Fullwidth for the about layout.

![layout setting](https://docs.engotheme.com/img/other-page/about-setting1.jpg)

**Columns gap:** Determine the space between 2 items

Use the provided text fields to add a suitable title/subtitle/description. Leave any of them blank if you do not want to display them.

![layout setting](https://docs.engotheme.com/img/other-page/about-setting2.jpg)

Select the **image** you want to display in about

![layout setting](https://docs.engotheme.com/img/other-page/about-setting3.jpg)

> ℹ️ **Info**
>
> Insert `<br>` to break the line in description.

## 2. General settings

**Color schema**: Set text color and background color with preset scheme
**Background image** The priority is higher than **Background color**
Section padding allows you to specify the space between the testimonials and the preceding or following sections, or both.

![layout setting](https://docs.engotheme.com/img/other-page/about-setting4.jpg)

# About v2

It isn't enough to just market your product to consumers. You need to earn their trust too. One way to do this is by explaining who you are and what your company is about. The easiest and most effect

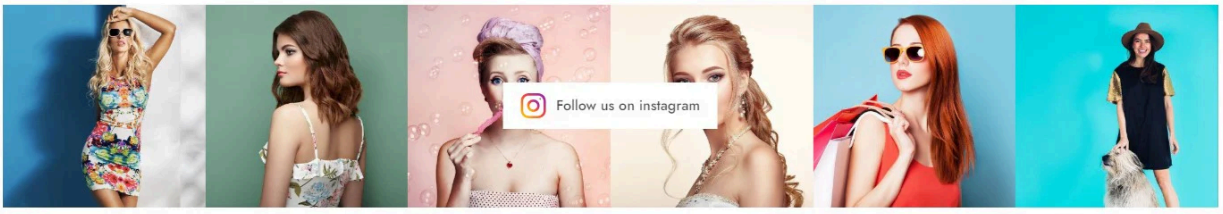
# Instagram v3

Instagram is one of the most influential social platforms that can attract potential customers. Using it in your store can be a tactic move.



:::tip[steps:] Add Instagram to the home page

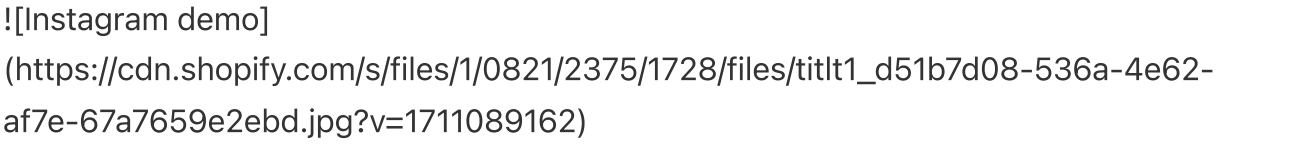
1. In the theme editor **(Customize)**, click **Add** section

2. Locate **Instagram**
3. **Save** :::

# Section settings

## 1. Section Title and General:

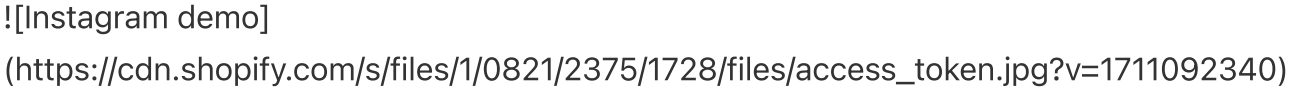
**- Title** Use the provided fields to add a title for the section. Leave any of the fields blank if you do not want to display them.



**- Access token**

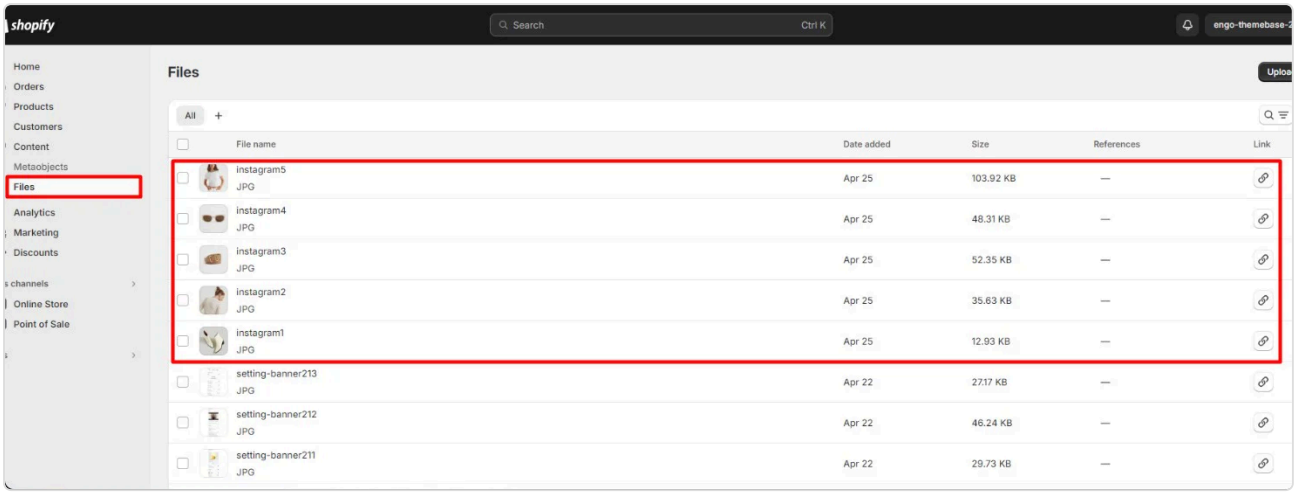
> ℹ️ **Info**
>
> Instructions on how to get access token ***link***

> ⚠ **Warning**
>
> After 90 days the access token will expire. Please always update your Instagram token



When you don't have an access token but still want to display images on the Instagram section, follow these steps:

1. Save the images you want to display in .jpg format, and the images must be named as follows: instagram1.jpg, instagram2.jpg.
2. For the number of Instagram images you want to display, take that many images and save them sequentially from 1 to n: For example, if I want to display 3 Instagram images, save the images as instagram1.jpg, instagram2.jpg, instagram3.jpg. Note that Instagram images should be square. Then go to the settings of the store, select the content section, choose file -> upload the Instagram images you just saved here.



**- General settings**

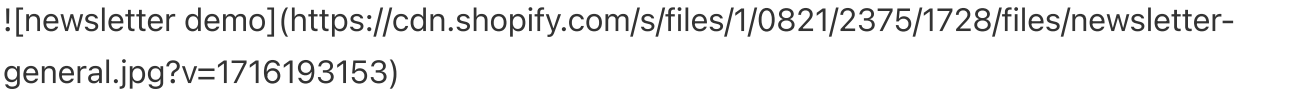
Section padding allows you to specify the space between the newsletter and the preceding or following sections, or both.



# Update theme

If you wish to update your theme to the latest version, you will need to manually apply the changes. Updating requires replacing or editing template files, while keeping your existing settings safe.

## Step 1: Download and Install the Latest Theme

Log in to your Envato Market account (where you purchased the theme).

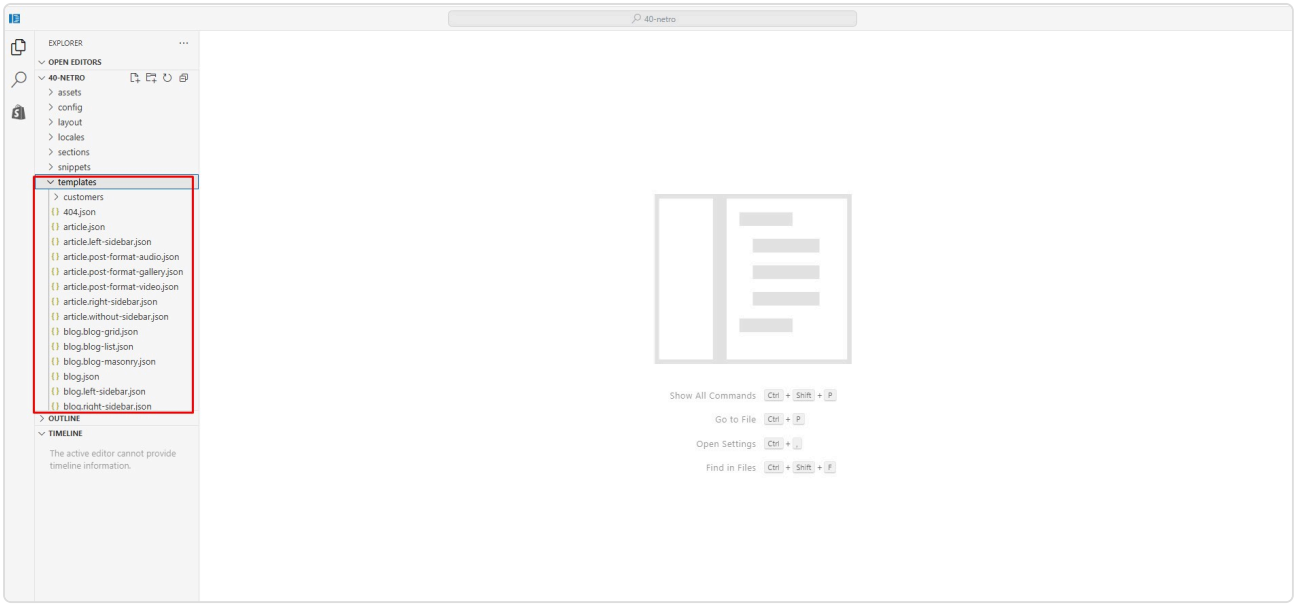
Follow the same steps as installing the theme.

In Shopify Admin, go to Online Store > Themes > Upload theme and upload the new version.

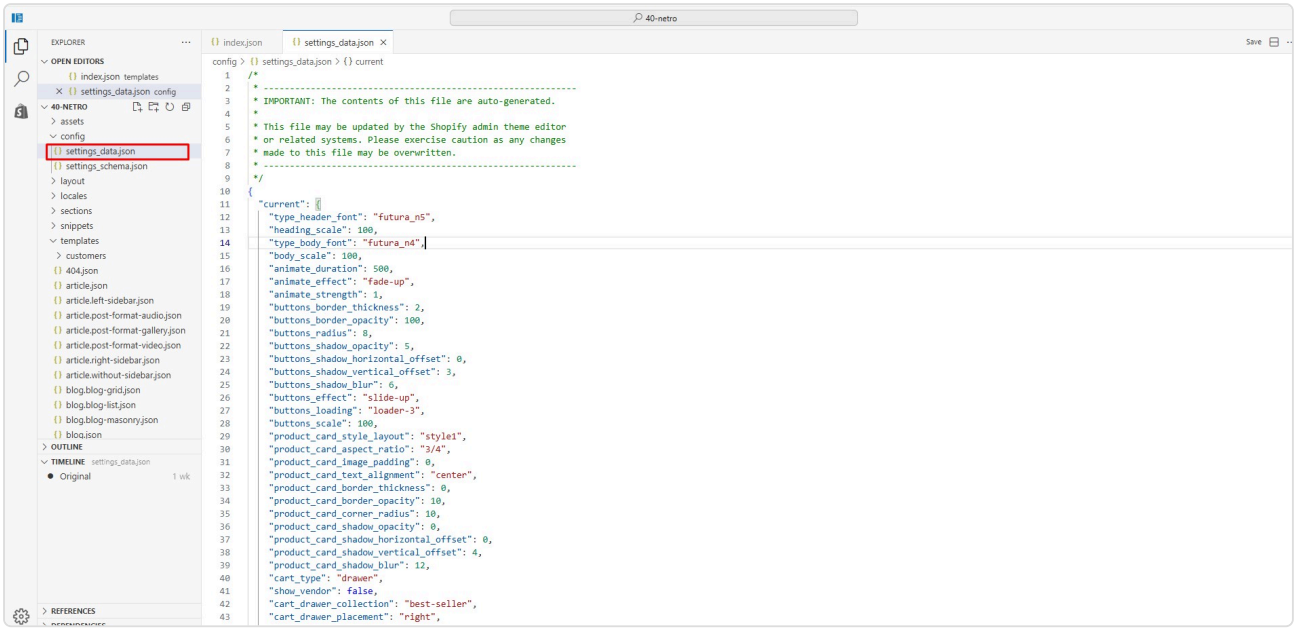
## Step 2: Copy Settings from Old Theme

In Shopify Admin, go to Online Store > Themes > Edit code on your current (old) theme.

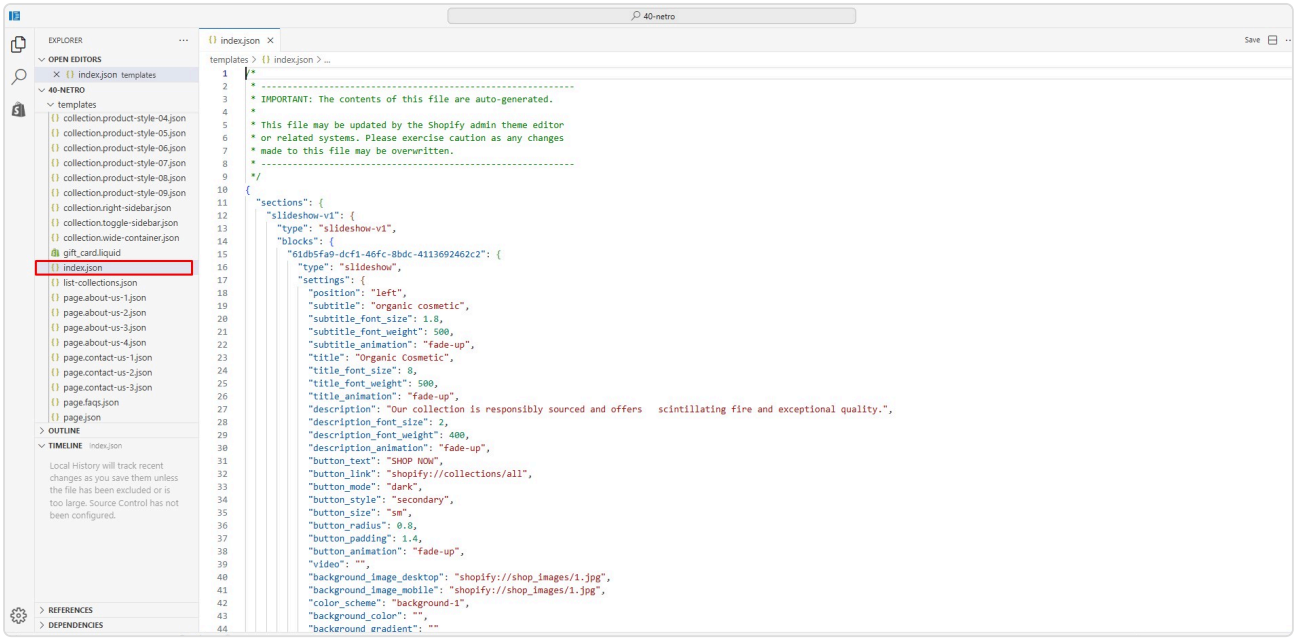
Open the template files where you have modified the content and need to preserve it when updating to the new theme.



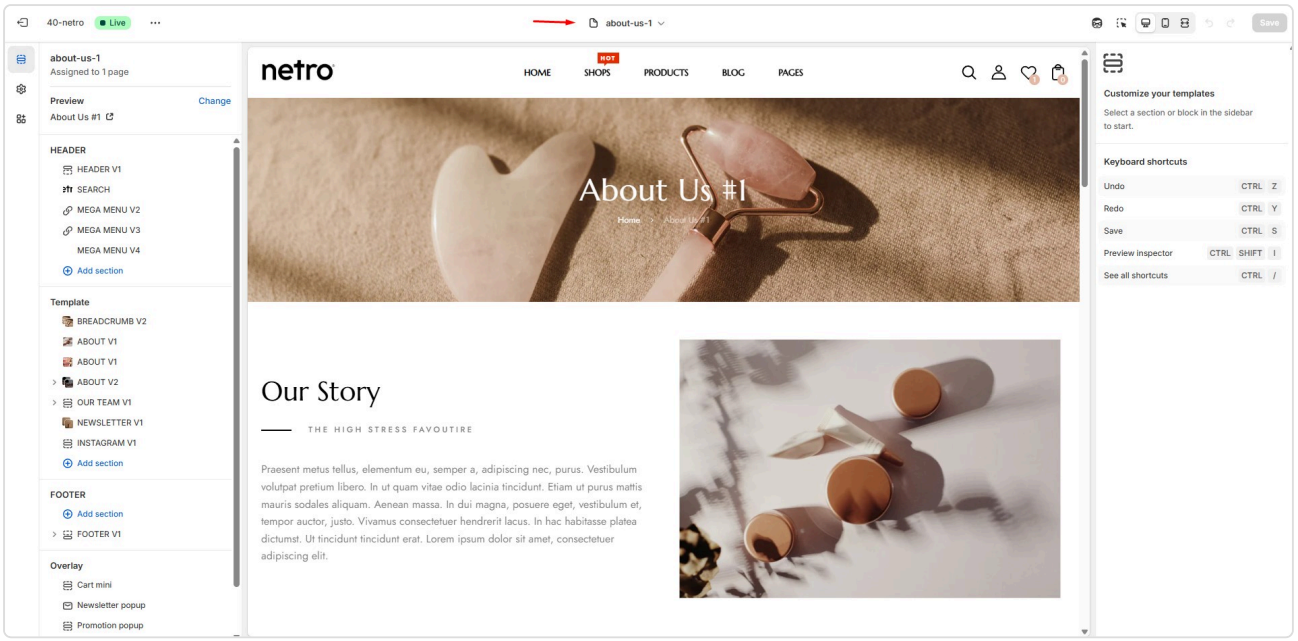
- The settings_data.json file contains fonts, colors, and other theme settings, so you need to review it carefully and copy only the necessary parts.



- index.json



- You can identify the templates by going to Customize for each page you want to update. The template name is displayed at the top center of the page.



# Step 3. Paste Settings into New Theme

In the new theme, go to Edit code.

Replace the content of:

- config/settings_data.json
- Each templates/*.json file you copied
- Save the changes.

# Step 4. Reapply Custom Code (if any)

If you had customized Liquid files in sections/ or snippets/, you will need to reapply those edits manually in the new theme.

# Step 5. Publish the New Theme

Preview the new theme to make sure everything looks correct.

Once confirmed, click Publish.
